Image 079-create-files-folder-adjusted.png

What it shows: The user switches one suggestion off and gives an unrecognised file a type and a time zone.
How to reach it: Change the type and time-zone selects in the list.

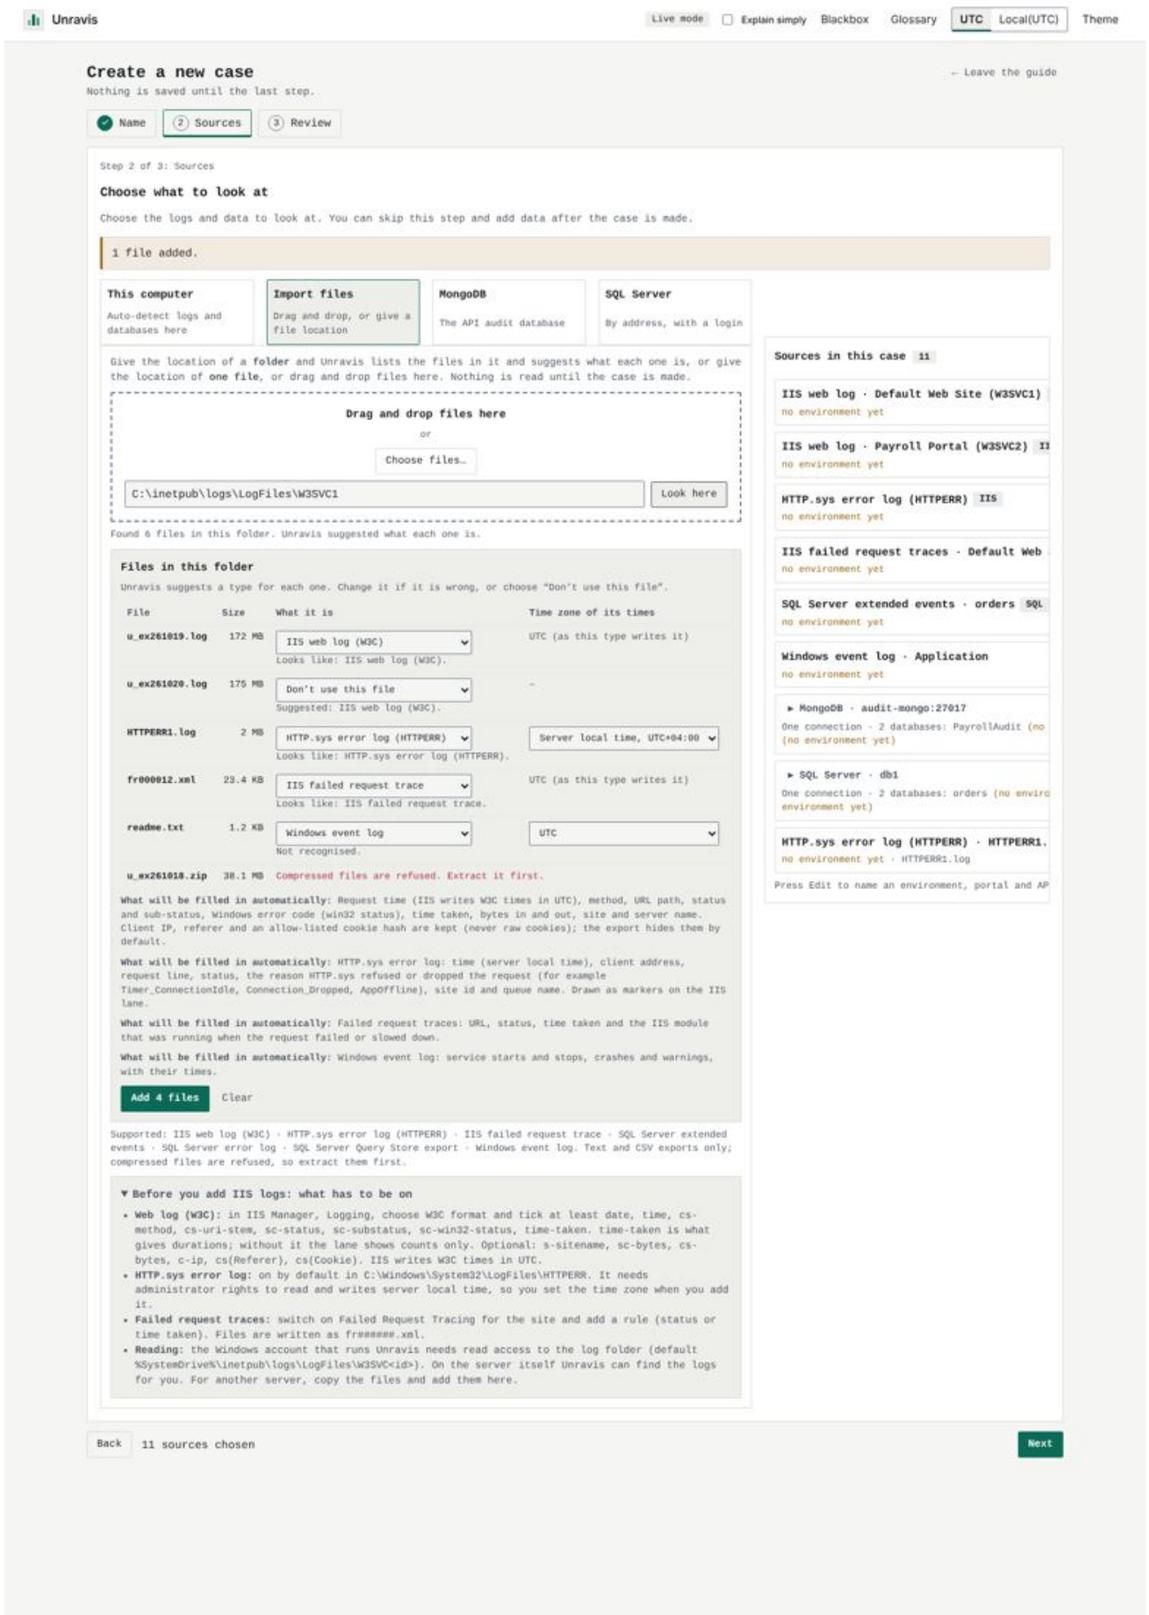

Image 080-create-files-folder-added.png

What it shows: The chosen files added in one go; the rest are reported as left out.
How to reach it: Press Add N files.

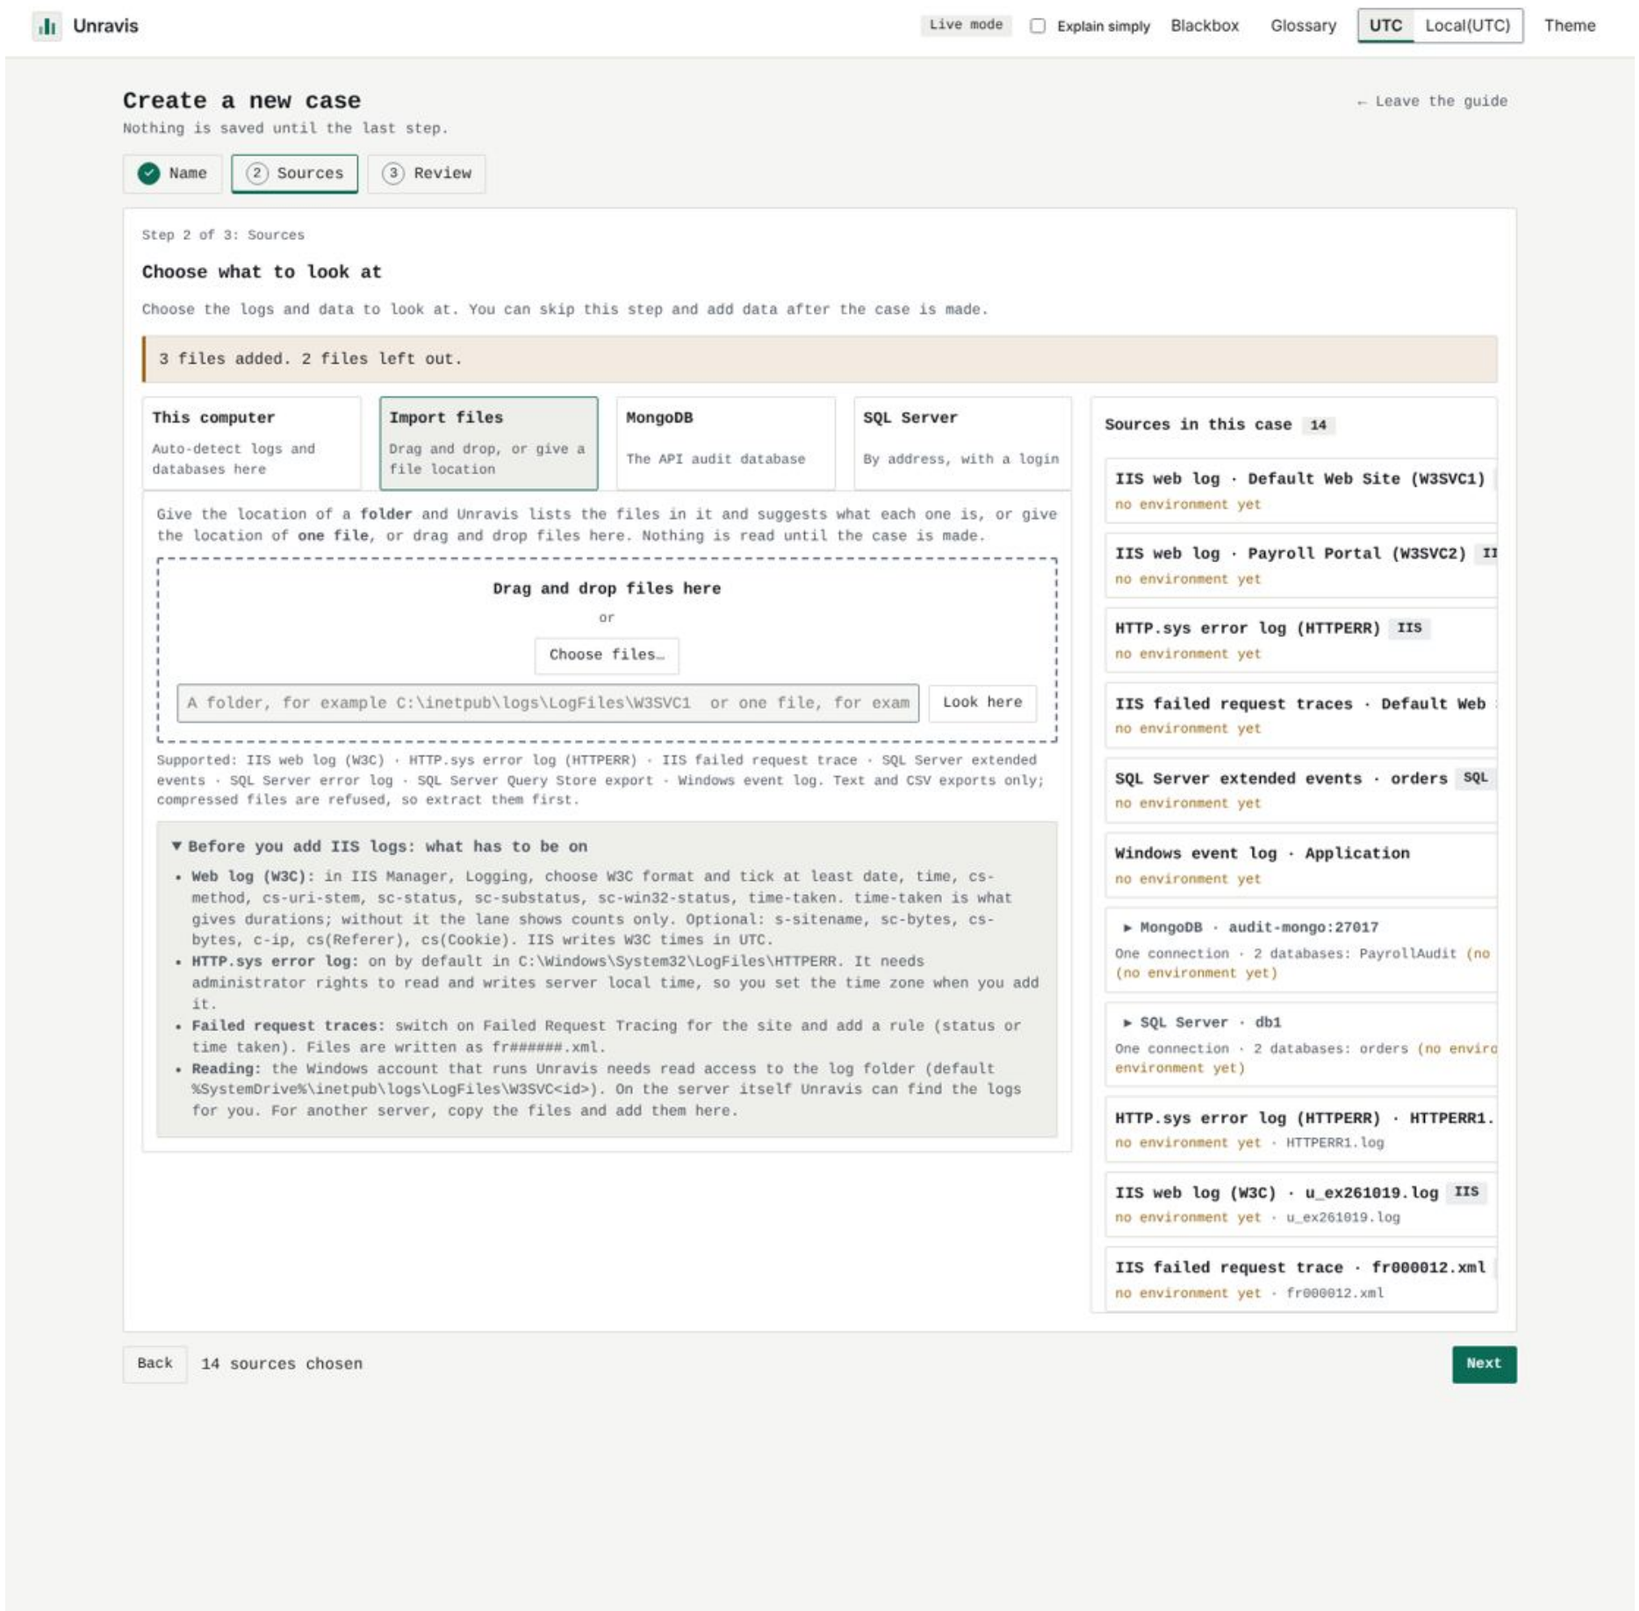

Image 081-create-files-by-one-file.png

What it shows: A single file location selects just that file.
How to reach it: Type C:\inetpub\logs\LogFiles\W3SVC1\u_ex261020.log, Look here.

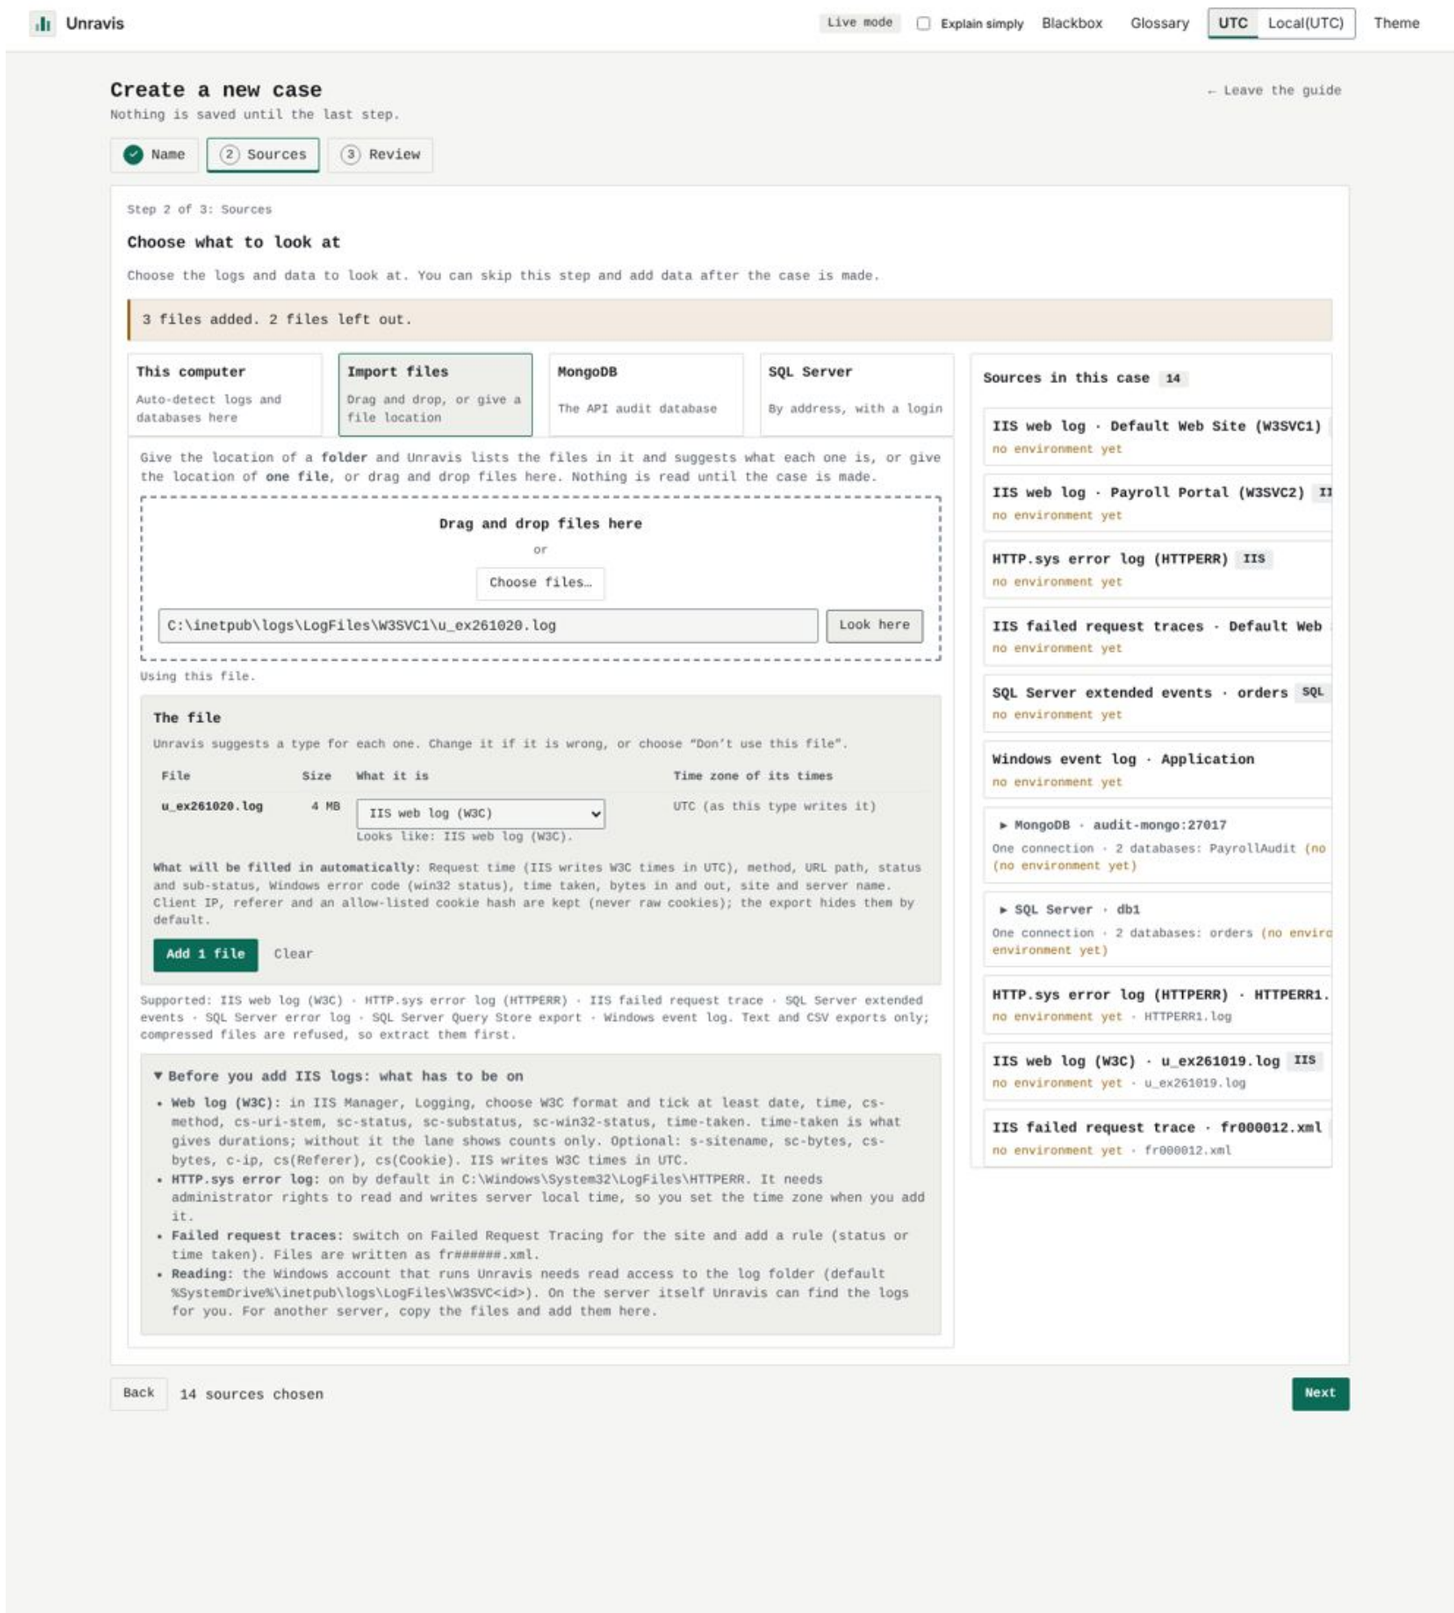

Image 082-create-files-relative-path-refused.png

What it shows: A relative path is refused with an example.
How to reach it: Type logs\x, Look here.

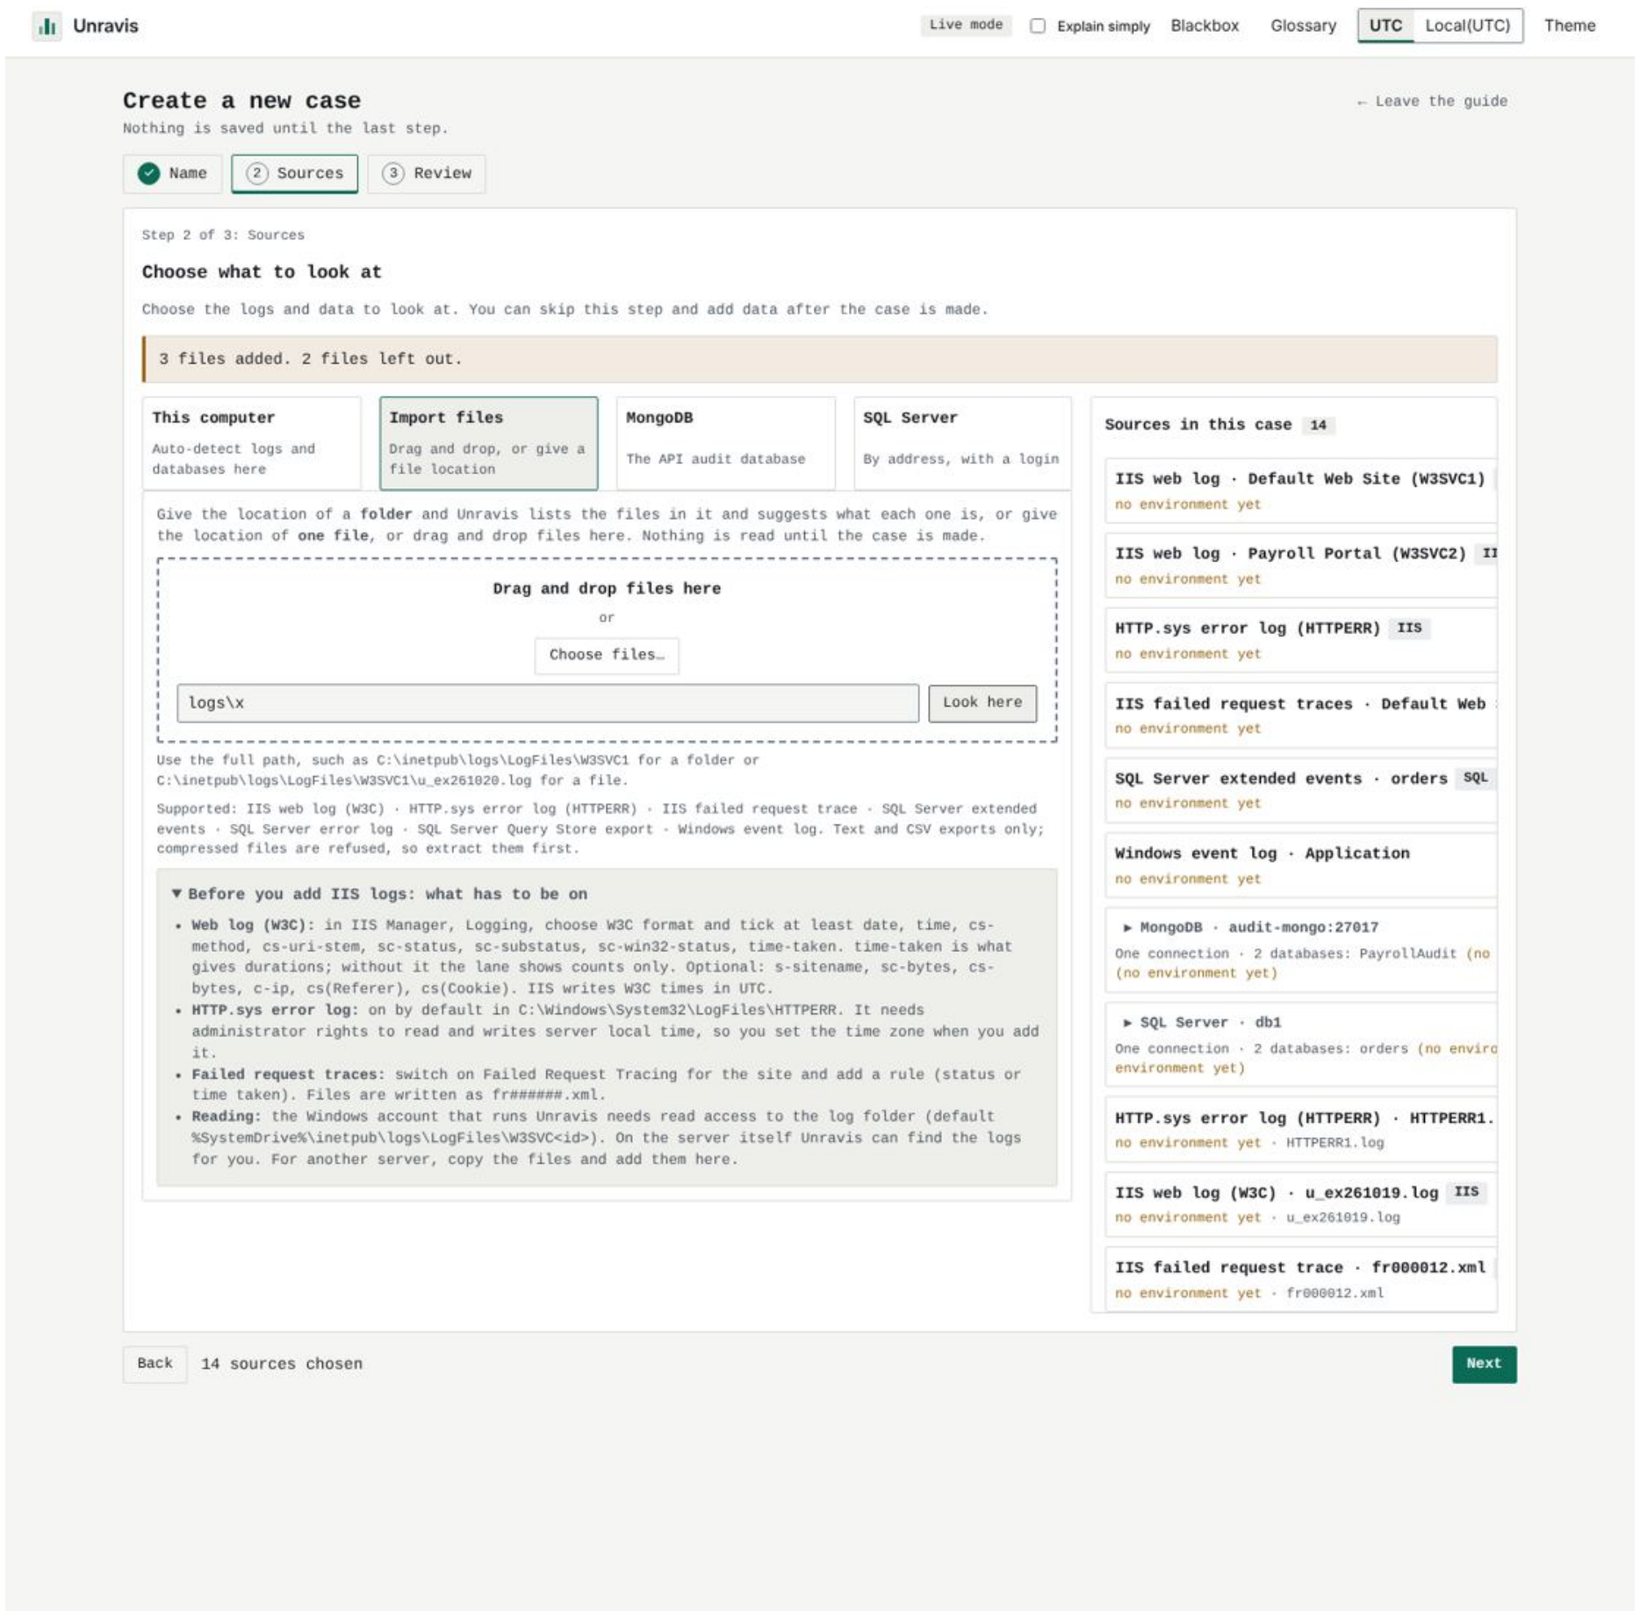

Image 083-create-chosen-sources-summary.png

What it shows: The chosen-sources panel as a short collapsed summary.
How to reach it: After adding sources, look at the right-hand panel.

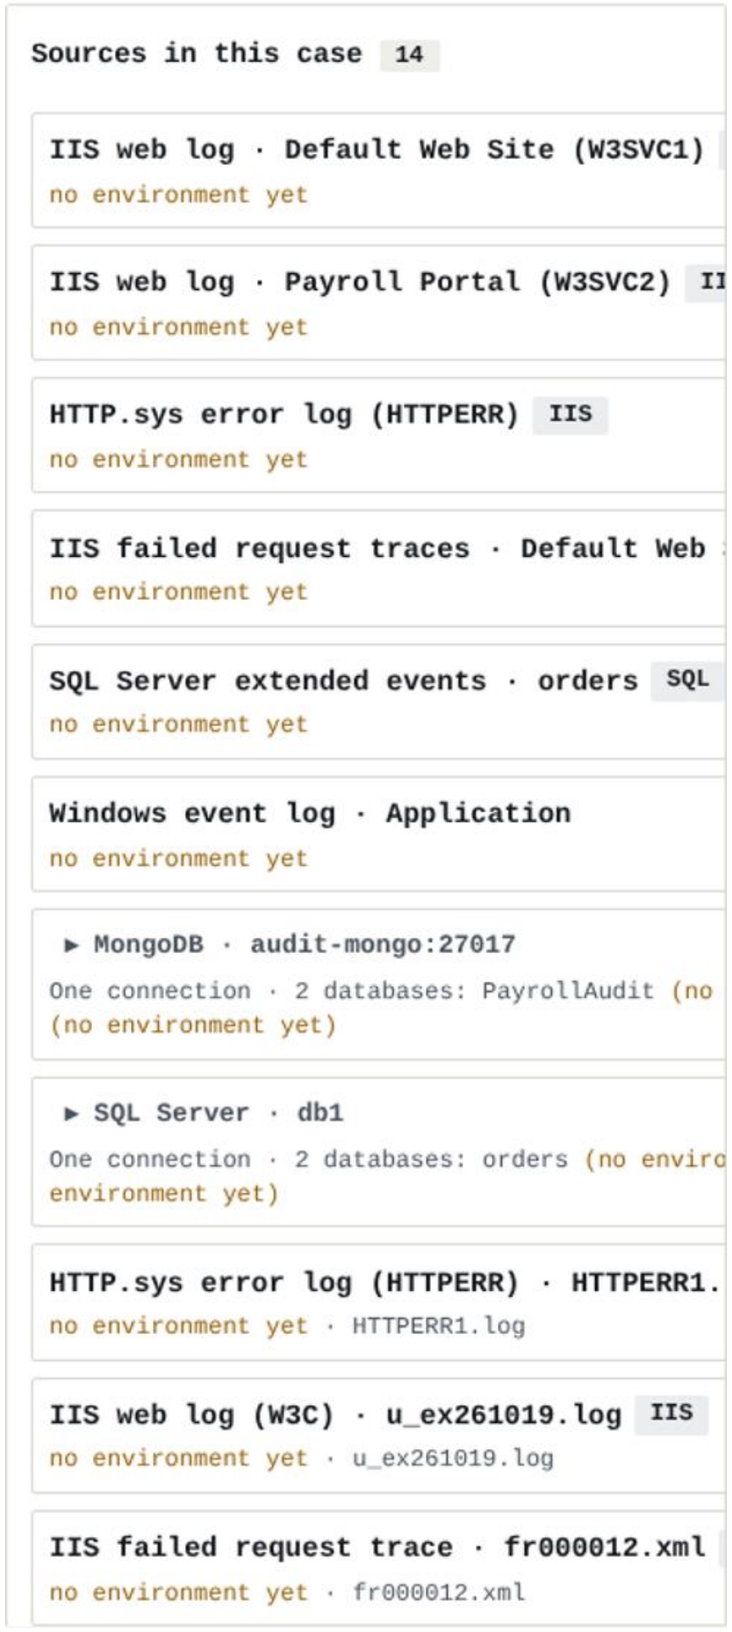

Image 084-create-chosen-sources-edit-all.png

What it shows: Edit all opens every source with its environment pills, portal and API choices and Remove.
How to reach it: Press Edit all.

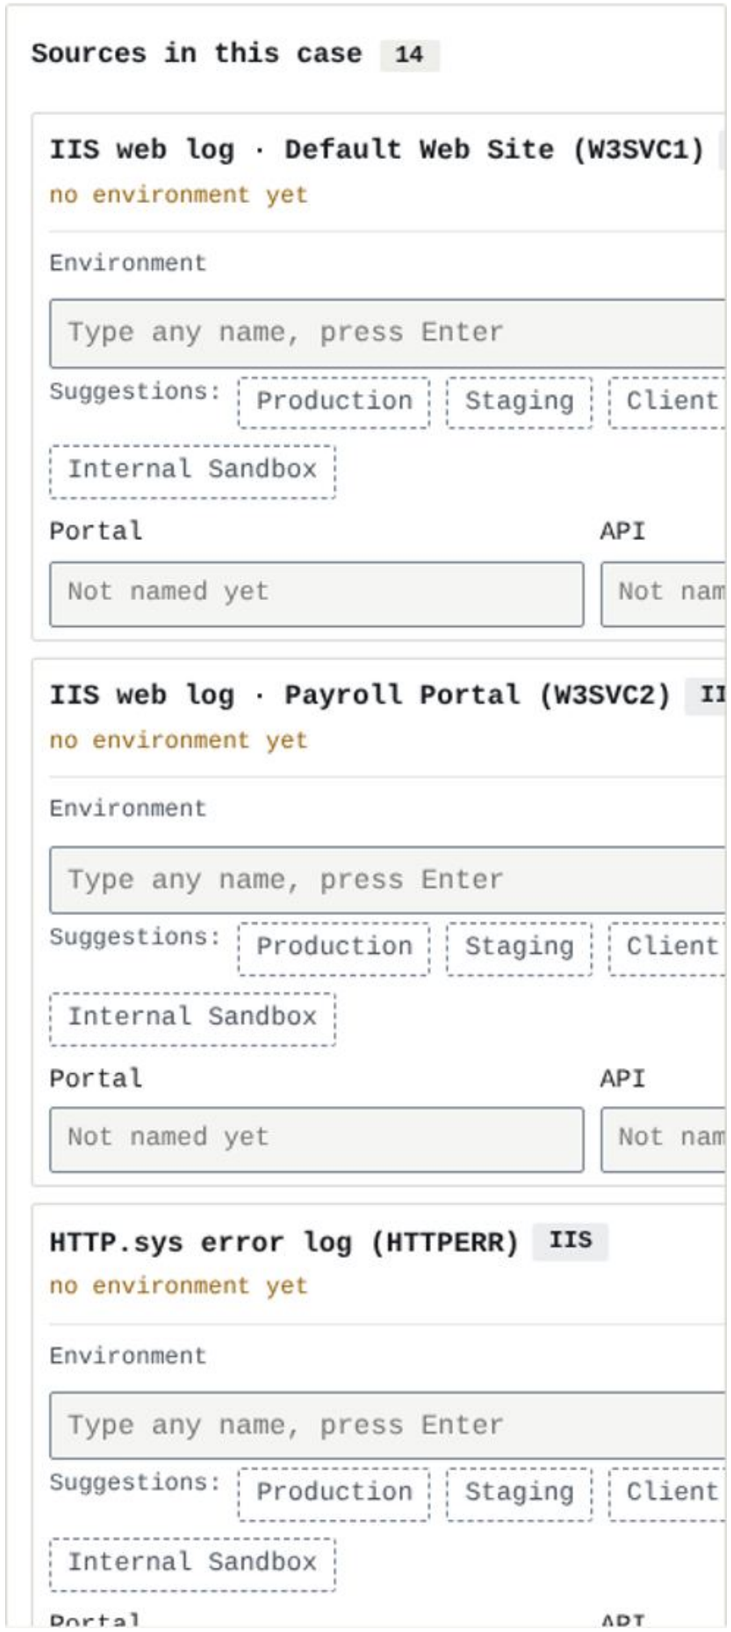

Image 085-create-chosen-sources-env-pills.png

What it shows: Environment is free text: several pills per source, with suggestions from earlier names.
How to reach it: In the first source, type "Client A Staging", Enter, "Client B Live", Enter.

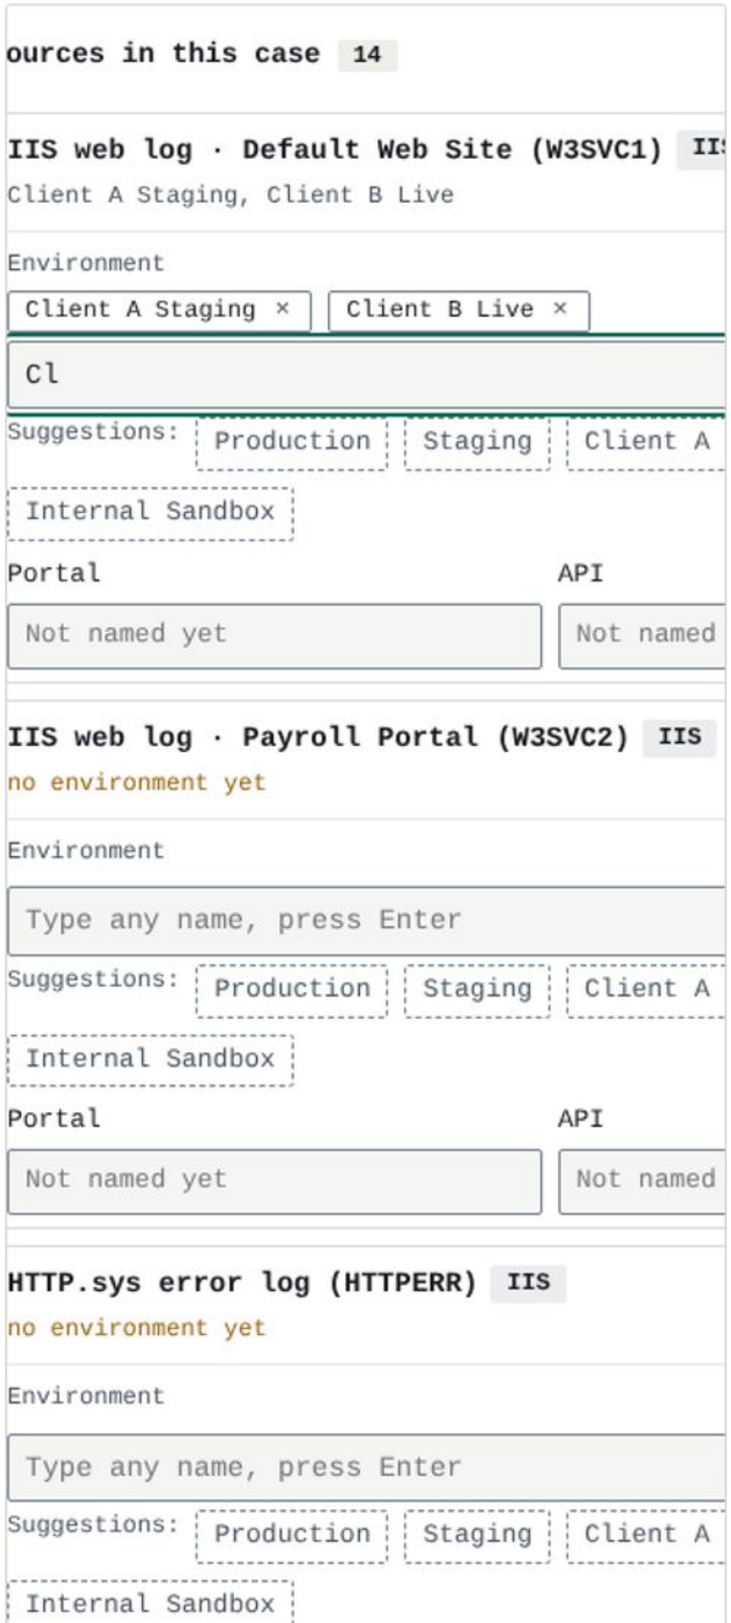

Image 086-create-chosen-sources-collapsed-again.png

What it shows: Collapse all returns to the summary.
How to reach it: Press Collapse all.

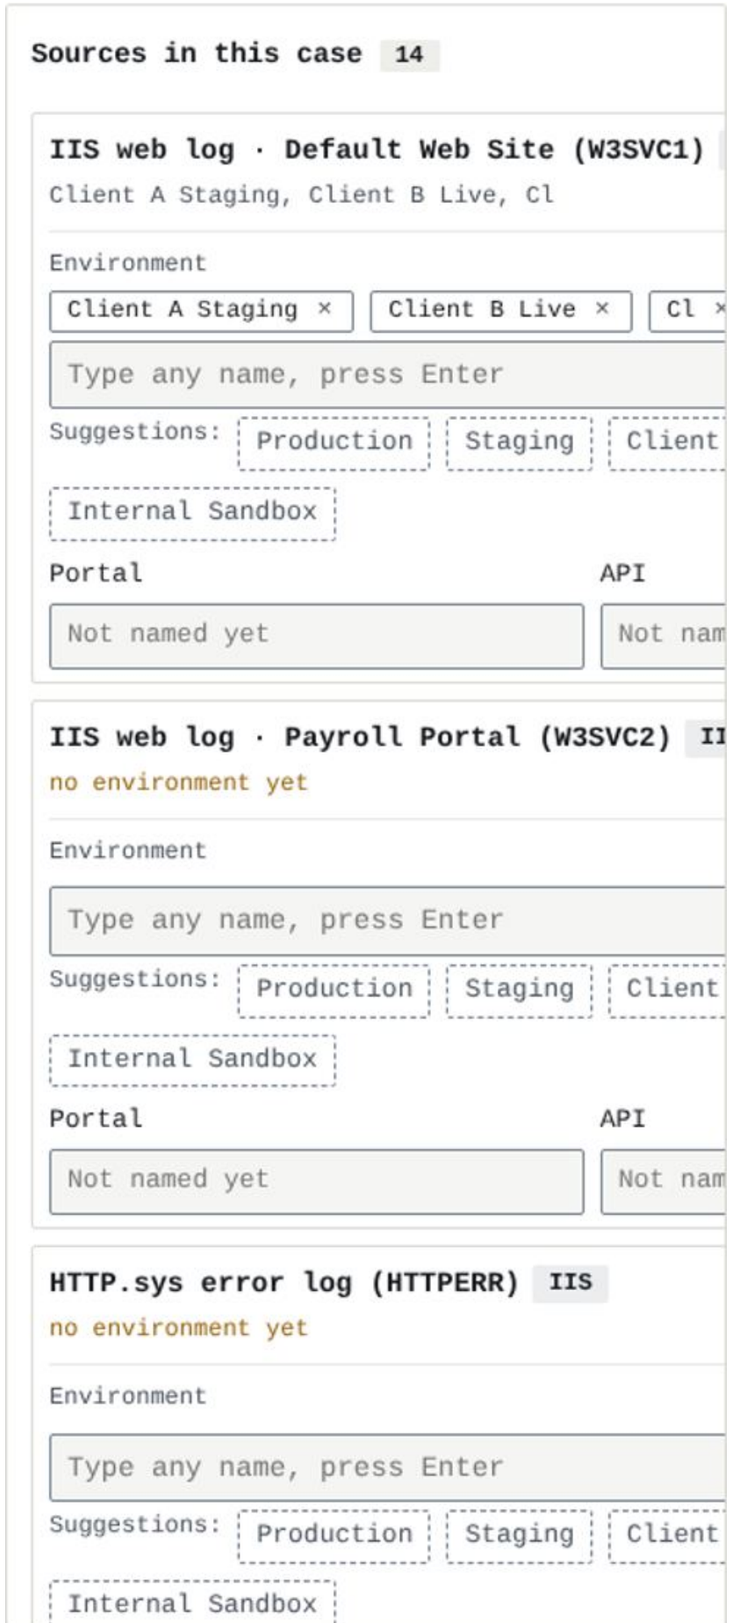

Image 087-create-review-step.png

What it shows: Step 3 of 3: Review lists what will be made, with the admin notice and how far back.
How to reach it: Press Next.

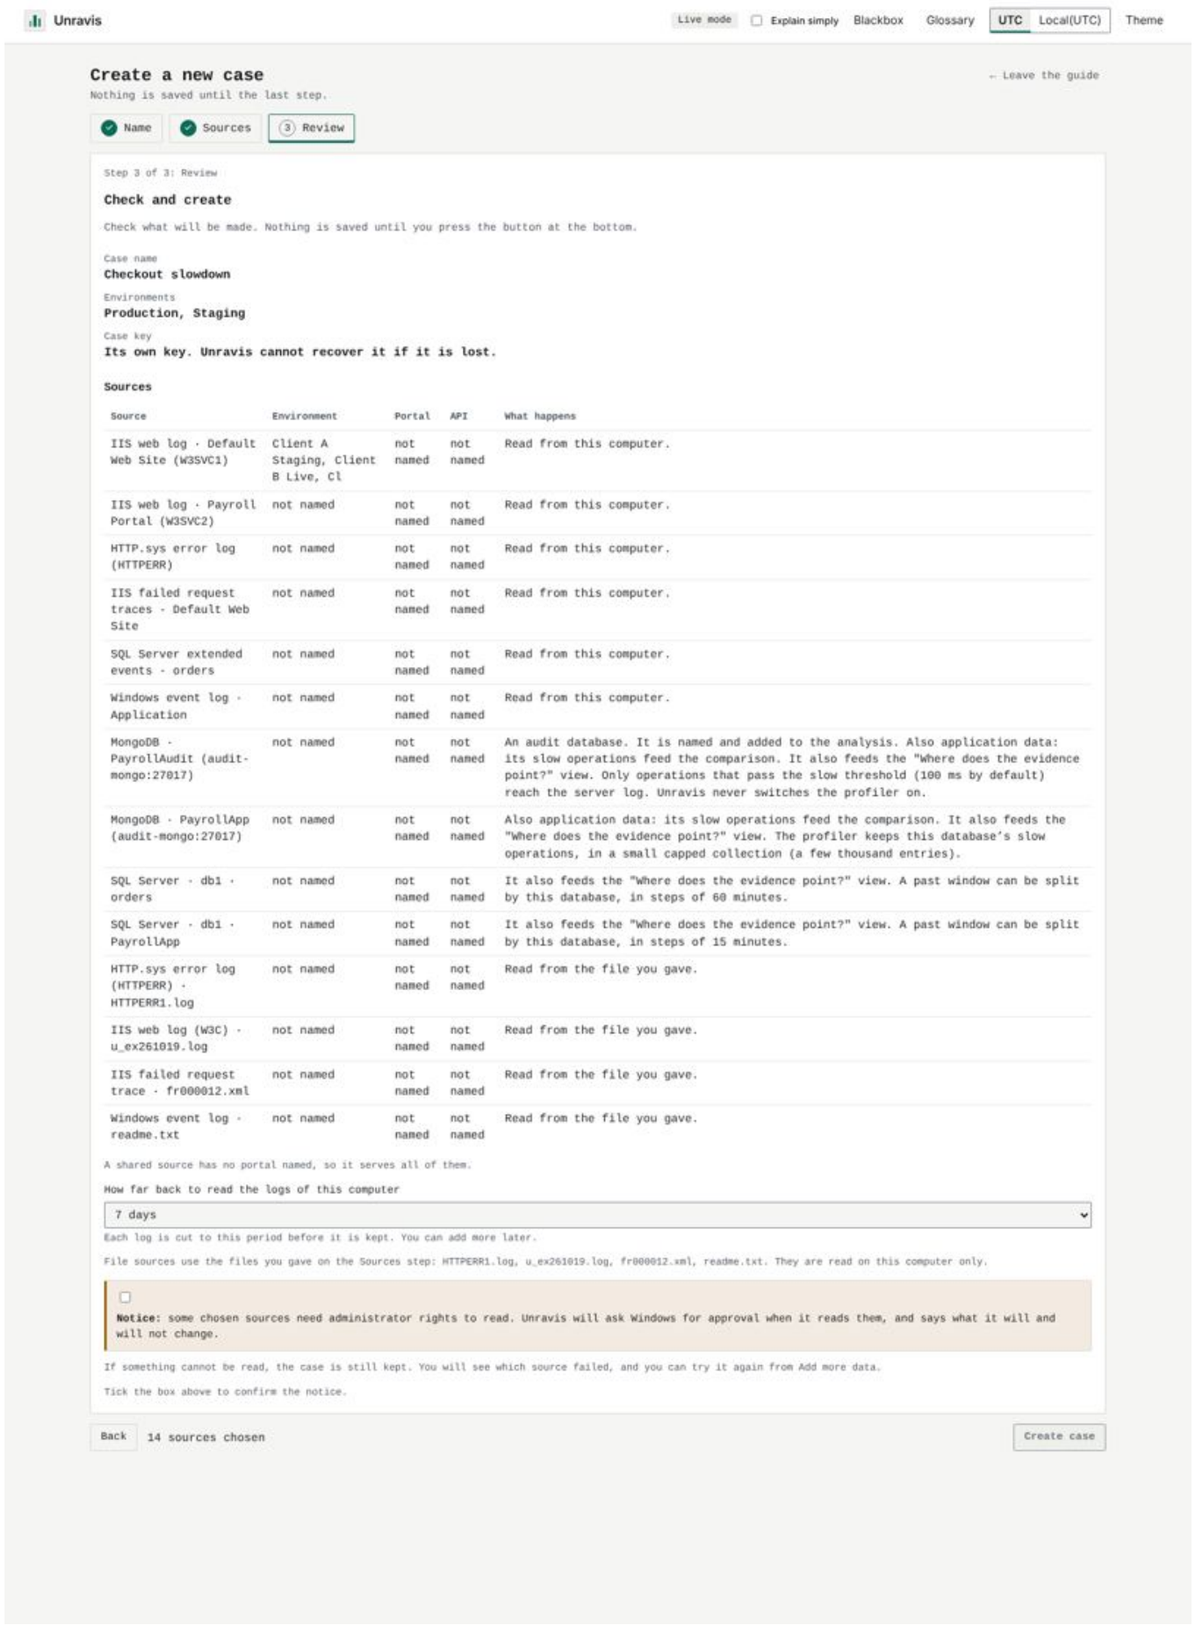

Image 088-create-review-admin-notice-ticked.png

What it shows: Review: some sources need administrator rights; the notice box must be ticked before Create case is on (until then the page says Tick the box above to confirm the notice).
How to reach it: Tick the administrator notice box.

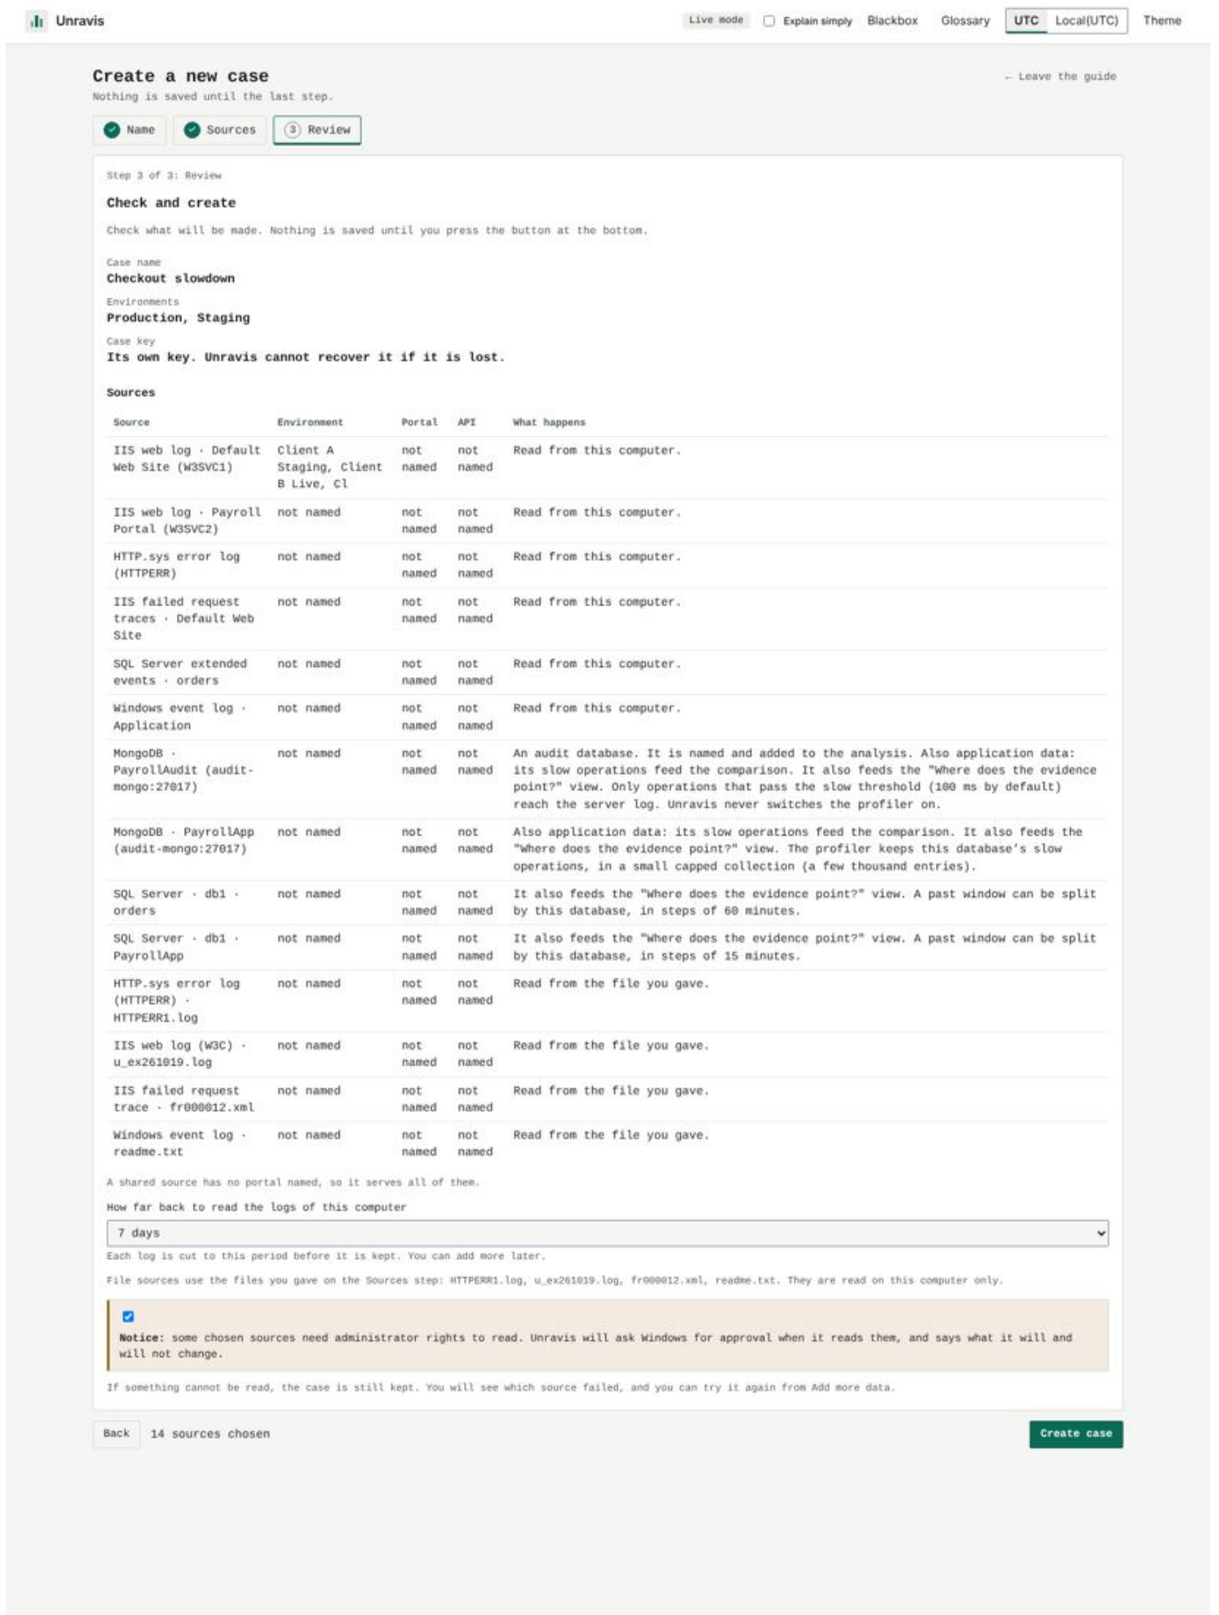

Image 089-create-leave-guide-asks.png

What it shows: Leaving a draft with entries asks first: Keep working or Leave and discard.
How to reach it: Press Leave the guide.

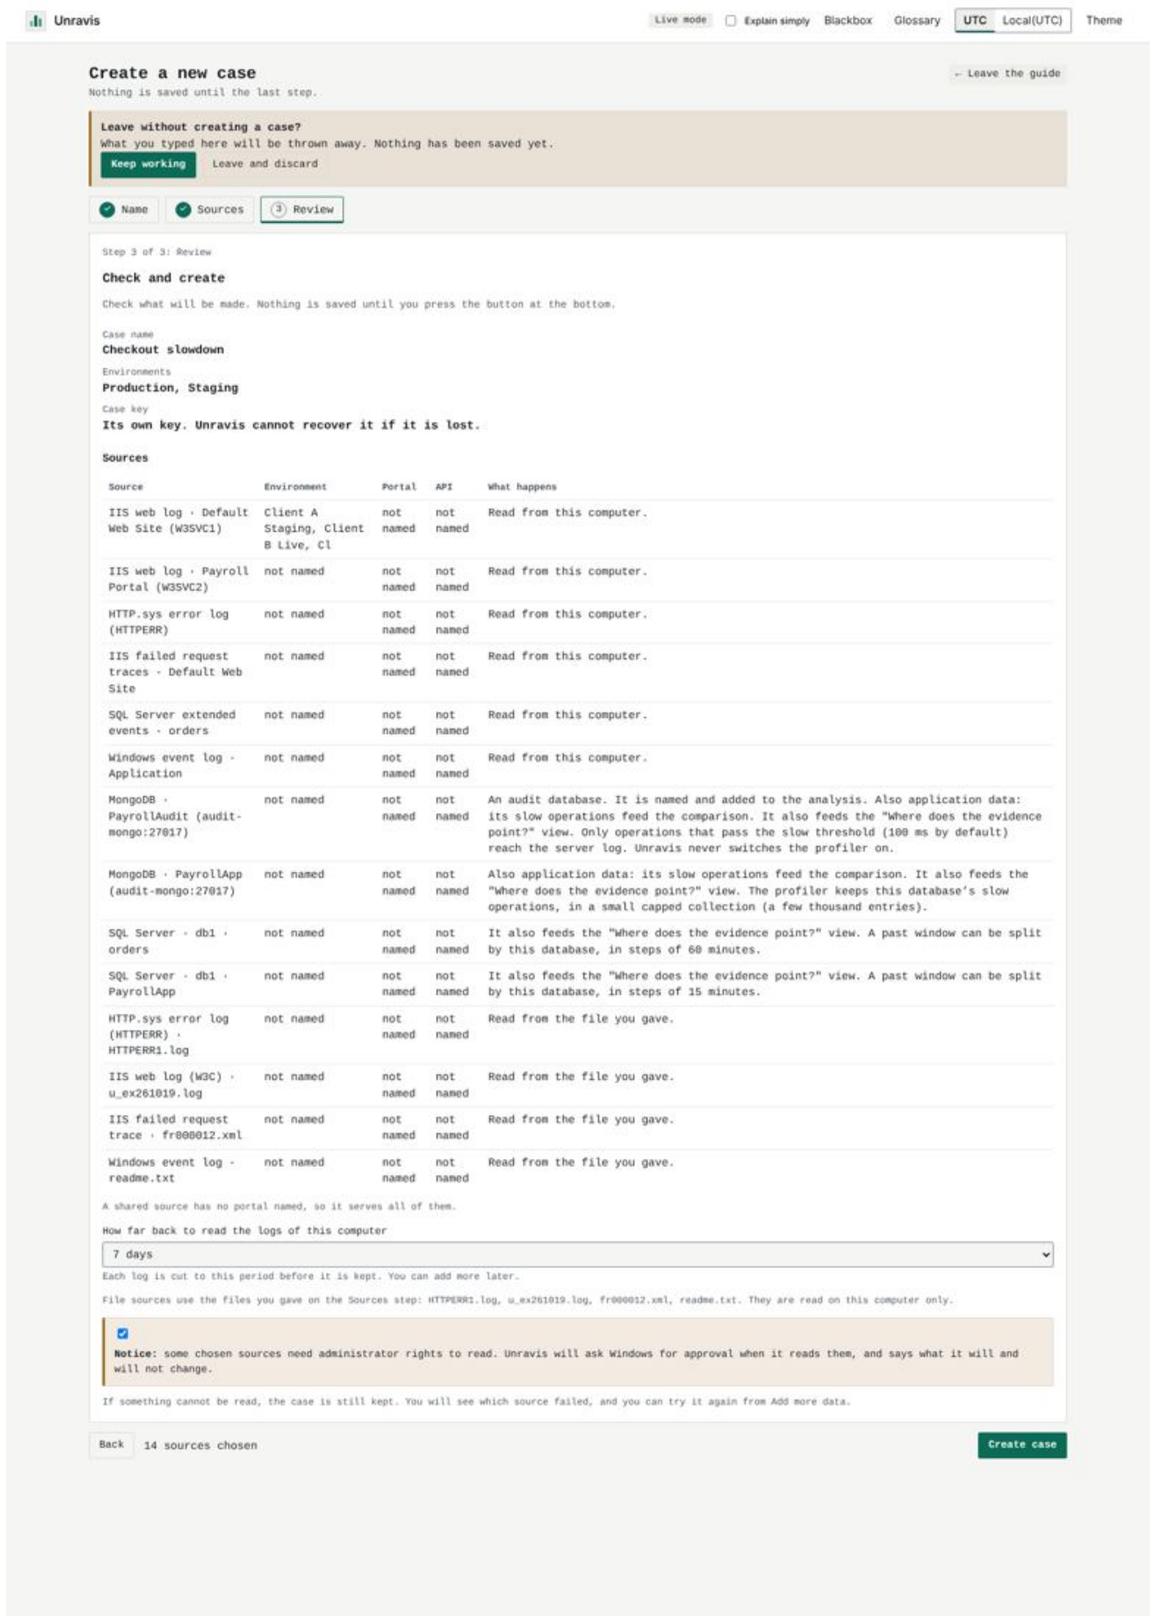

Image 090-create-creating-progress.png

What it shows: Creation progress: the case, environments and each source read in turn.
How to reach it: Press Keep working, then Create case (the screen is brief; captured as soon as it appears).

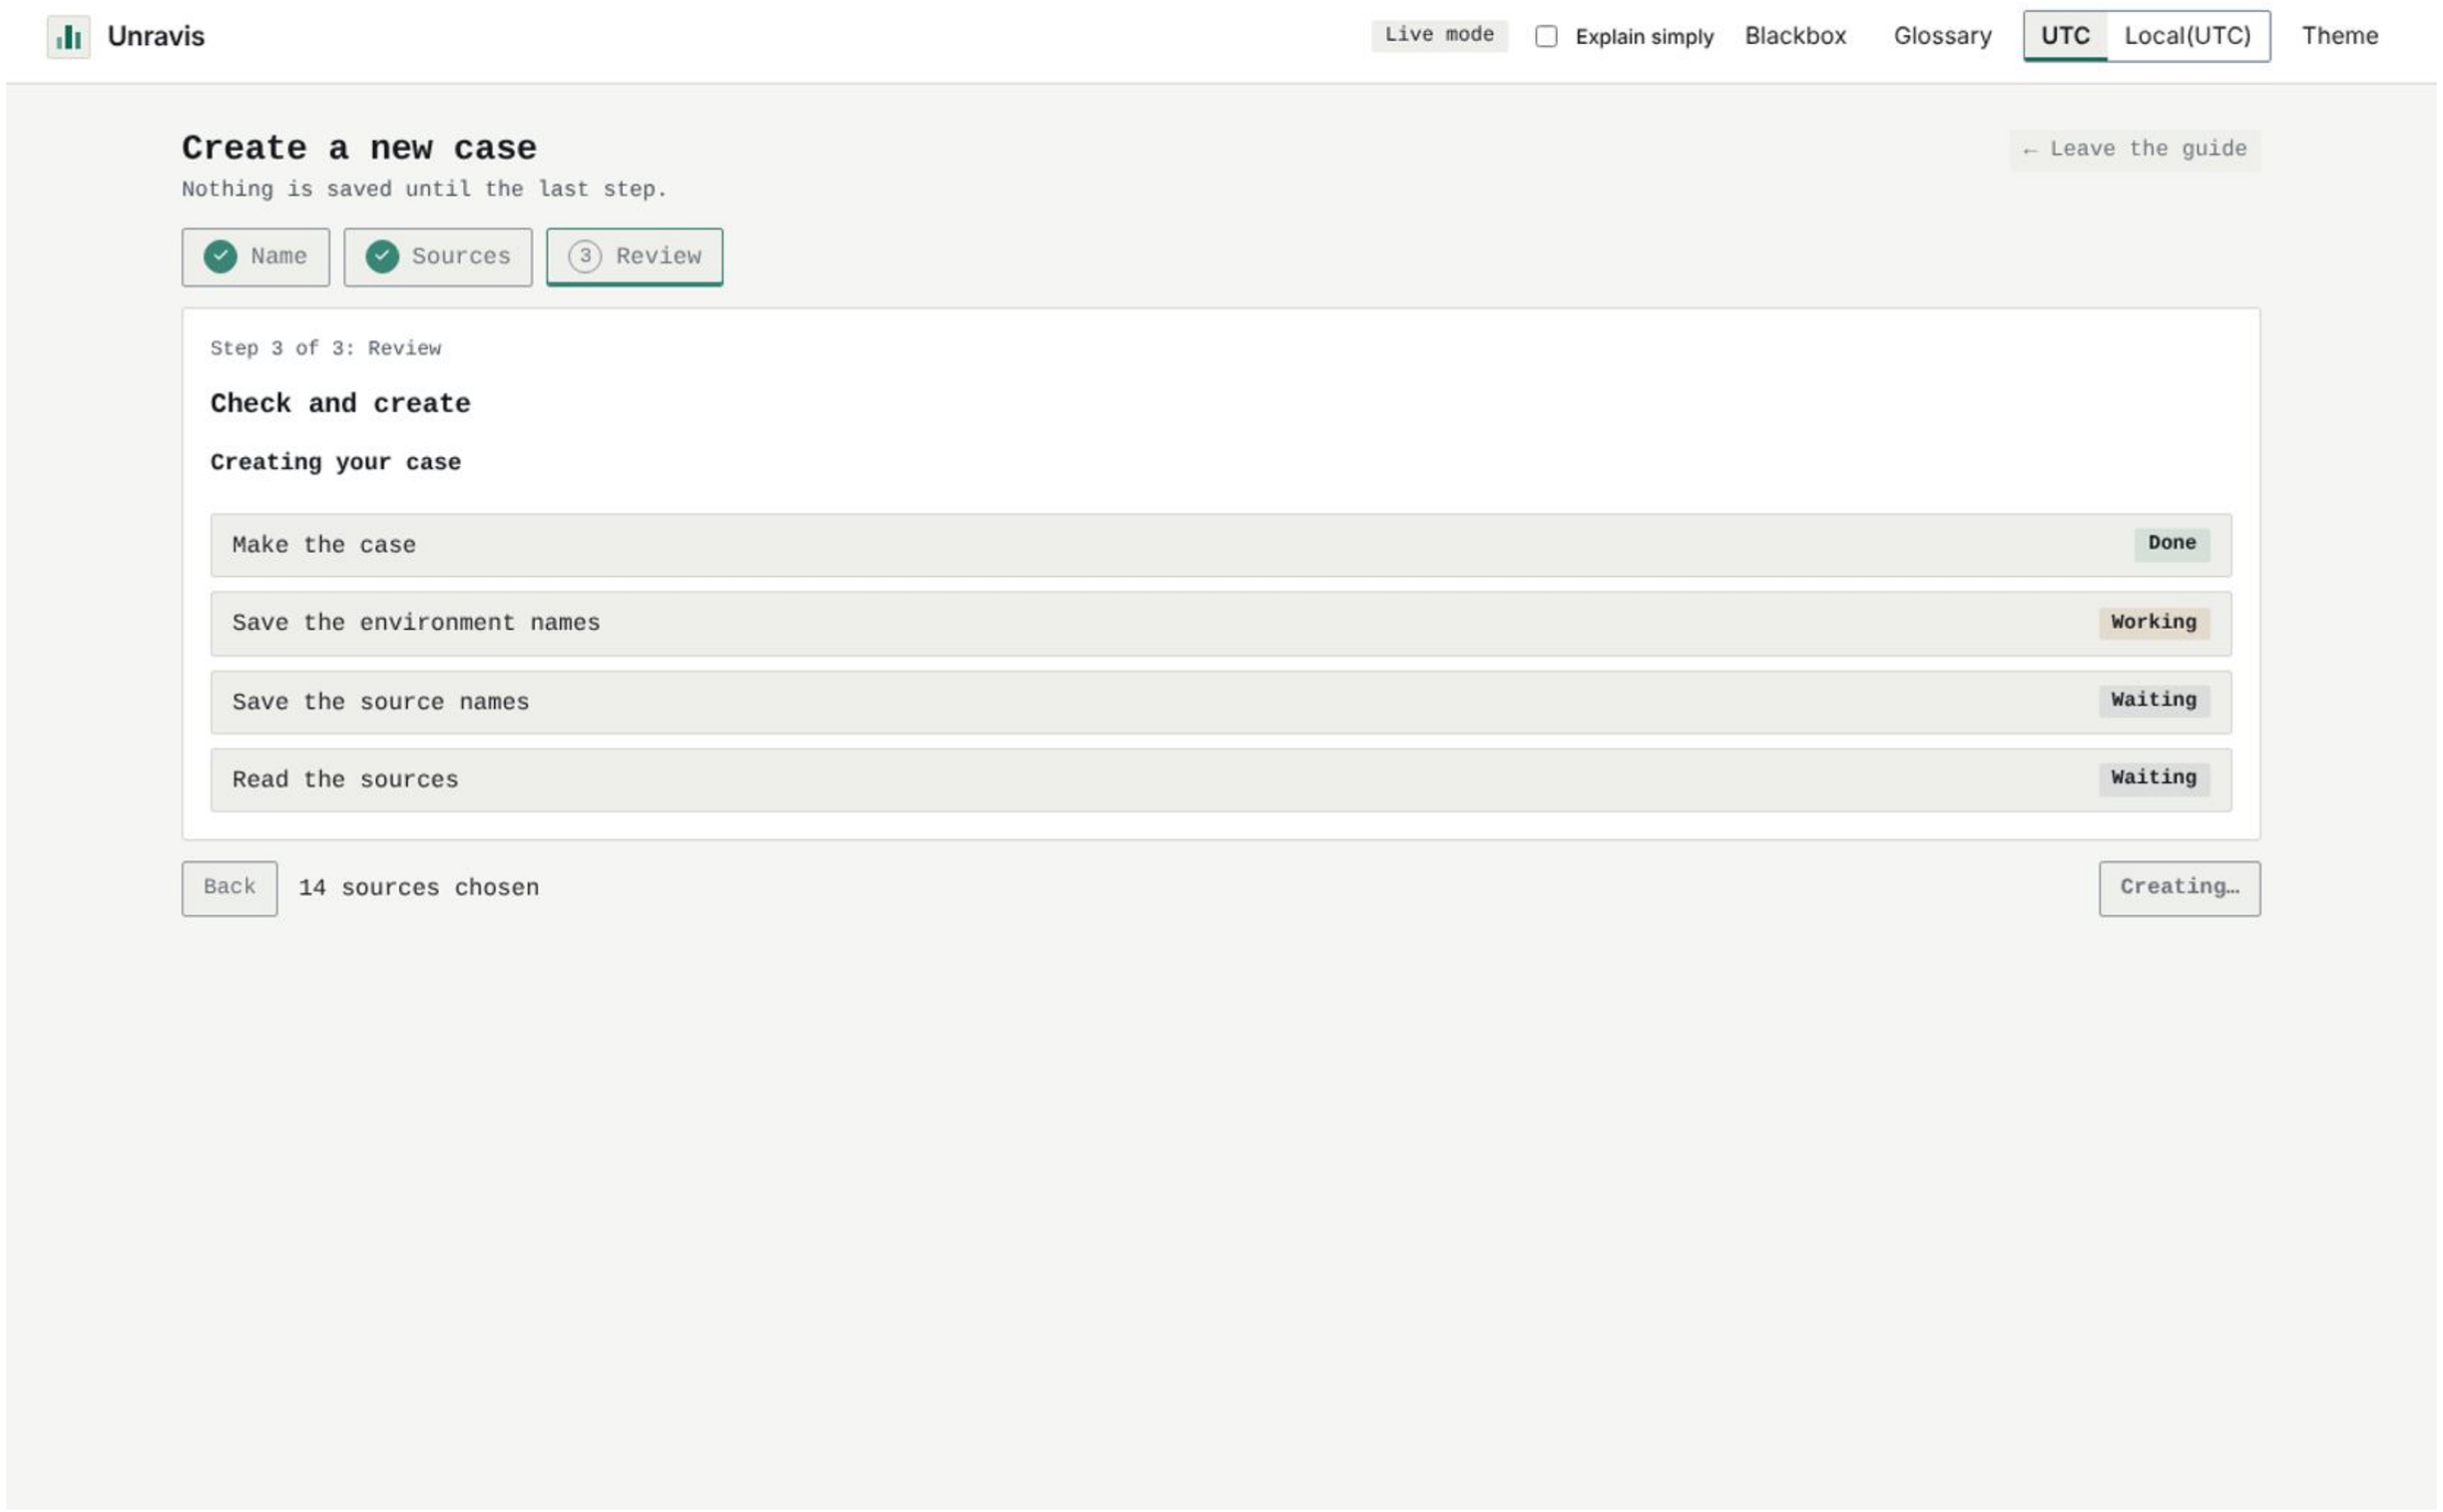

Image 091-create-failed-source-open-anyway.png

What it shows: One source could not be read; the case was kept; Open the case anyway.
How to reach it: Wait for the progress to end.

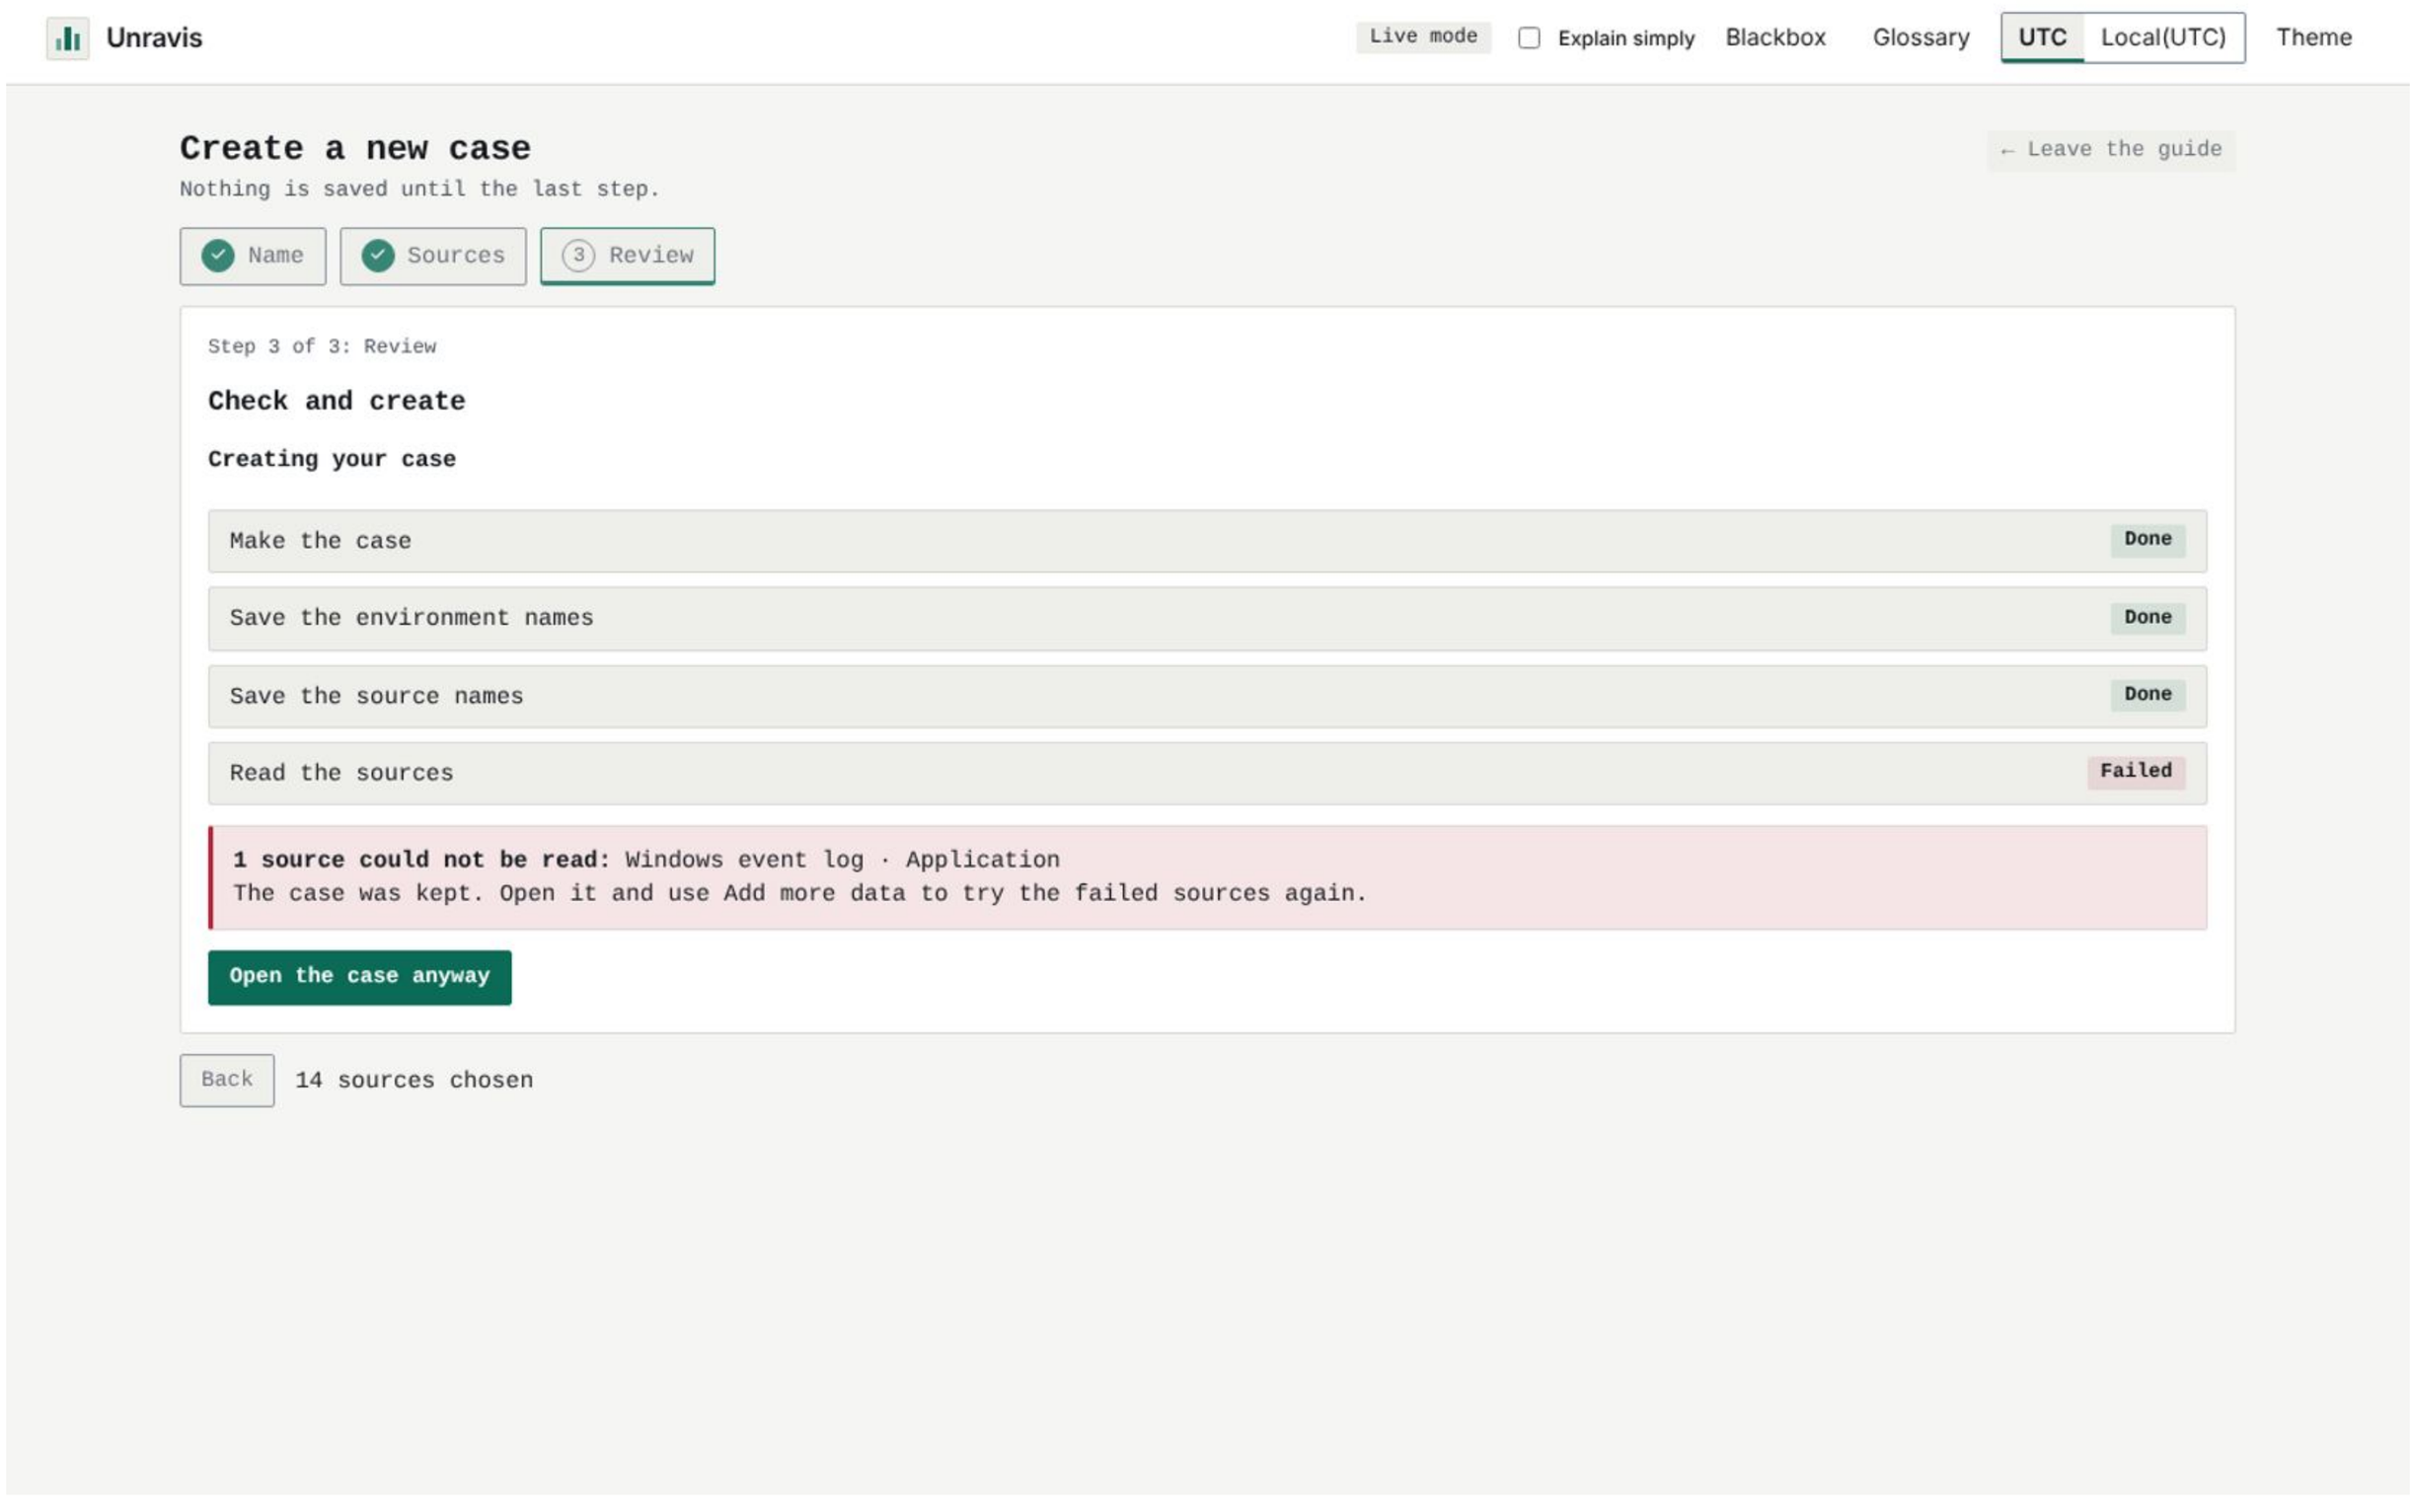

Image 092-create-opened-with-retry-list.png

What it shows: The new case home with Needs another try (the failed source).
How to reach it: Press Open the case anyway.

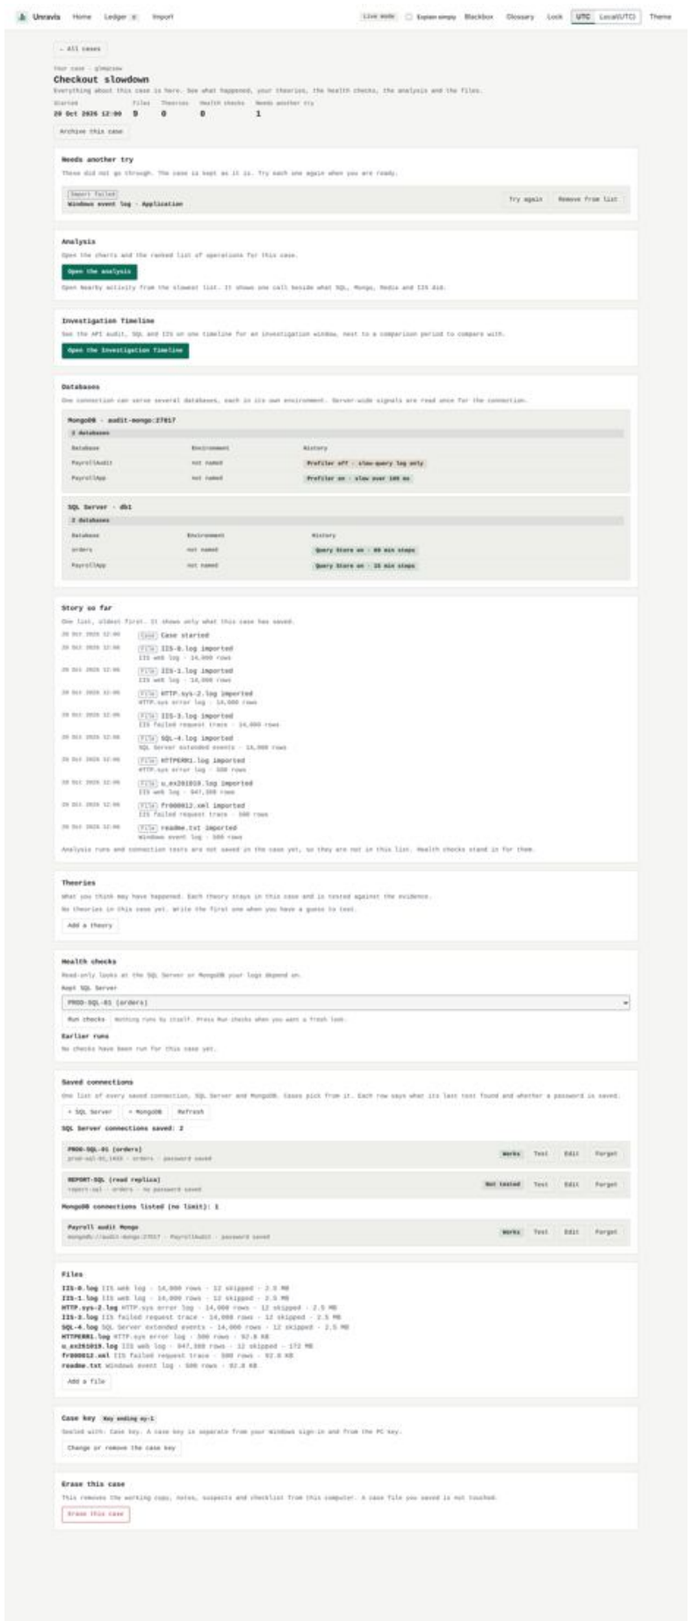

Image 093-create-retry-fails-once.png

What it shows: Try again fails the first time and stays listed (simulated).
How to reach it: Press Try again.

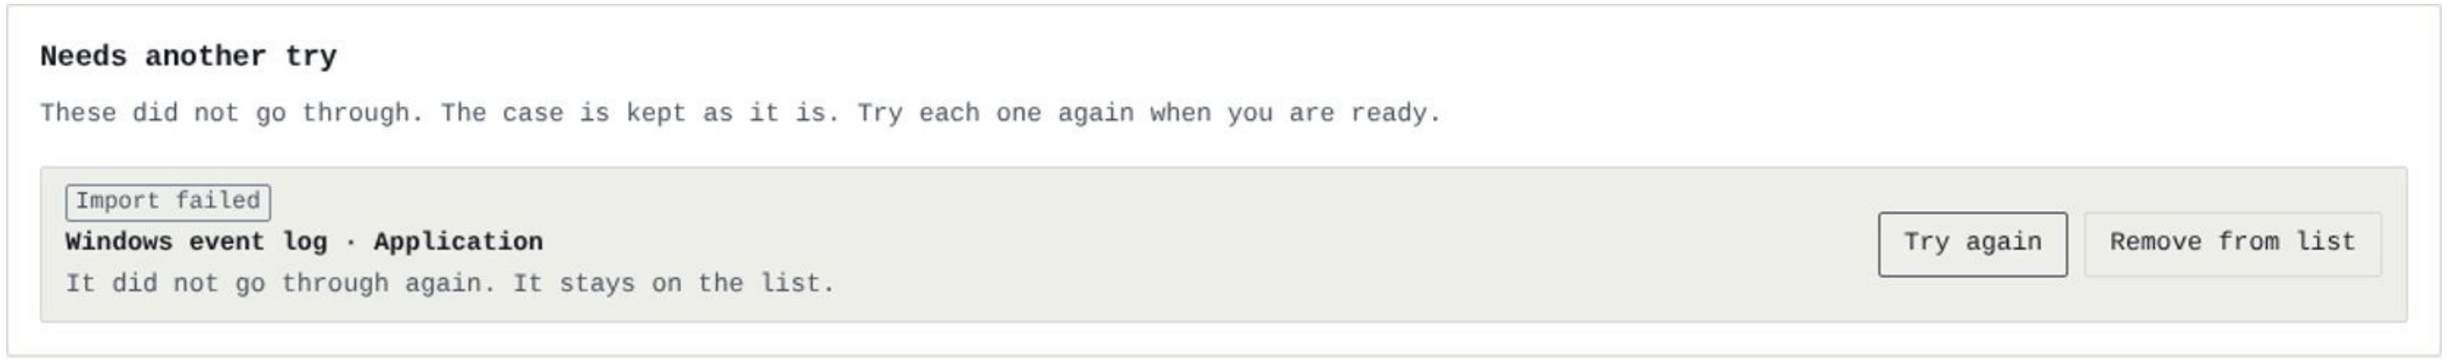

Image 094-create-retry-succeeds.png

What it shows: Second Try again succeeds; the list is gone.
How to reach it: Press Try again again.

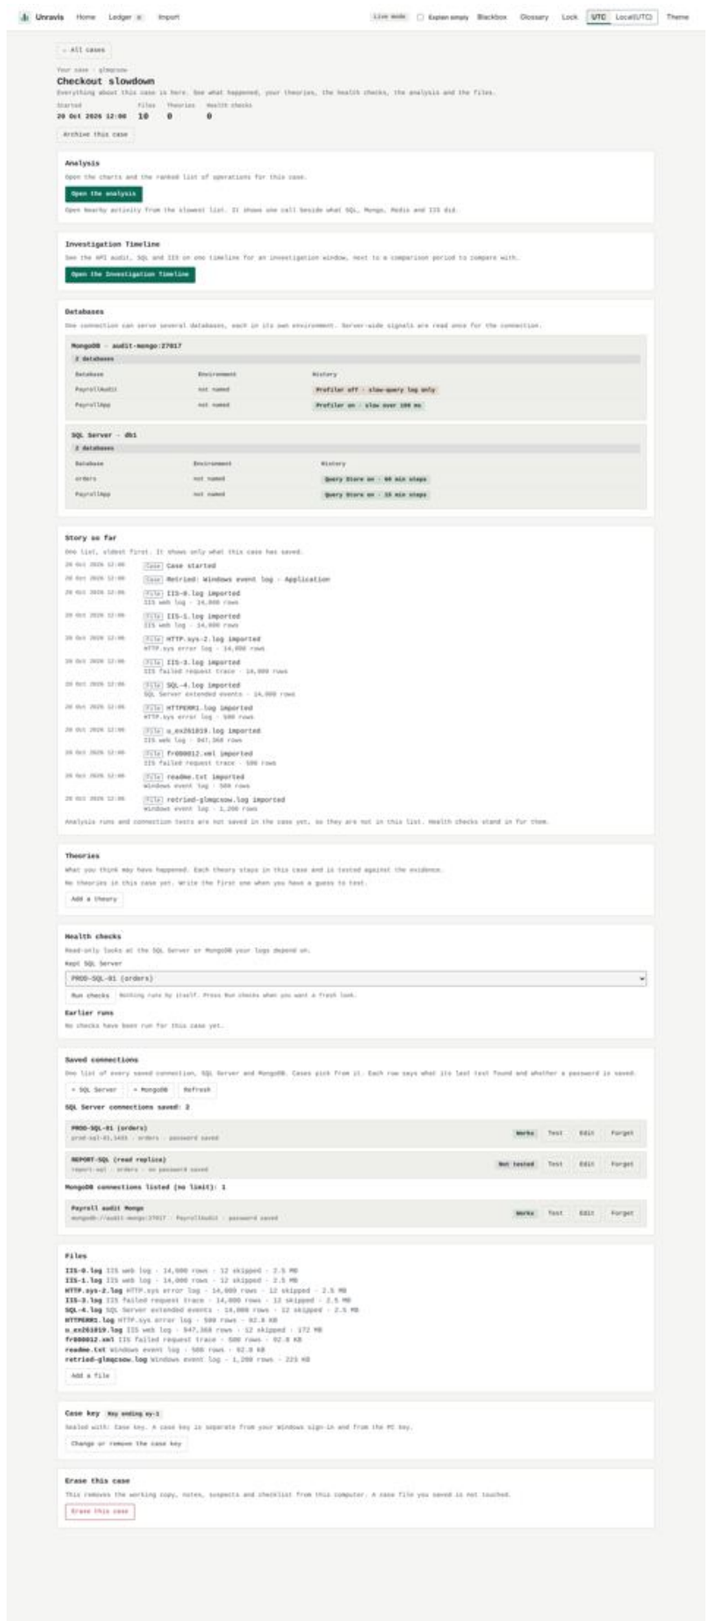

Image 095-create-resume-draft-banner.png

What it shows: A left-behind draft is offered again, with Start over.
How to reach it: Scenario w-resumed (Resume an earlier draft).

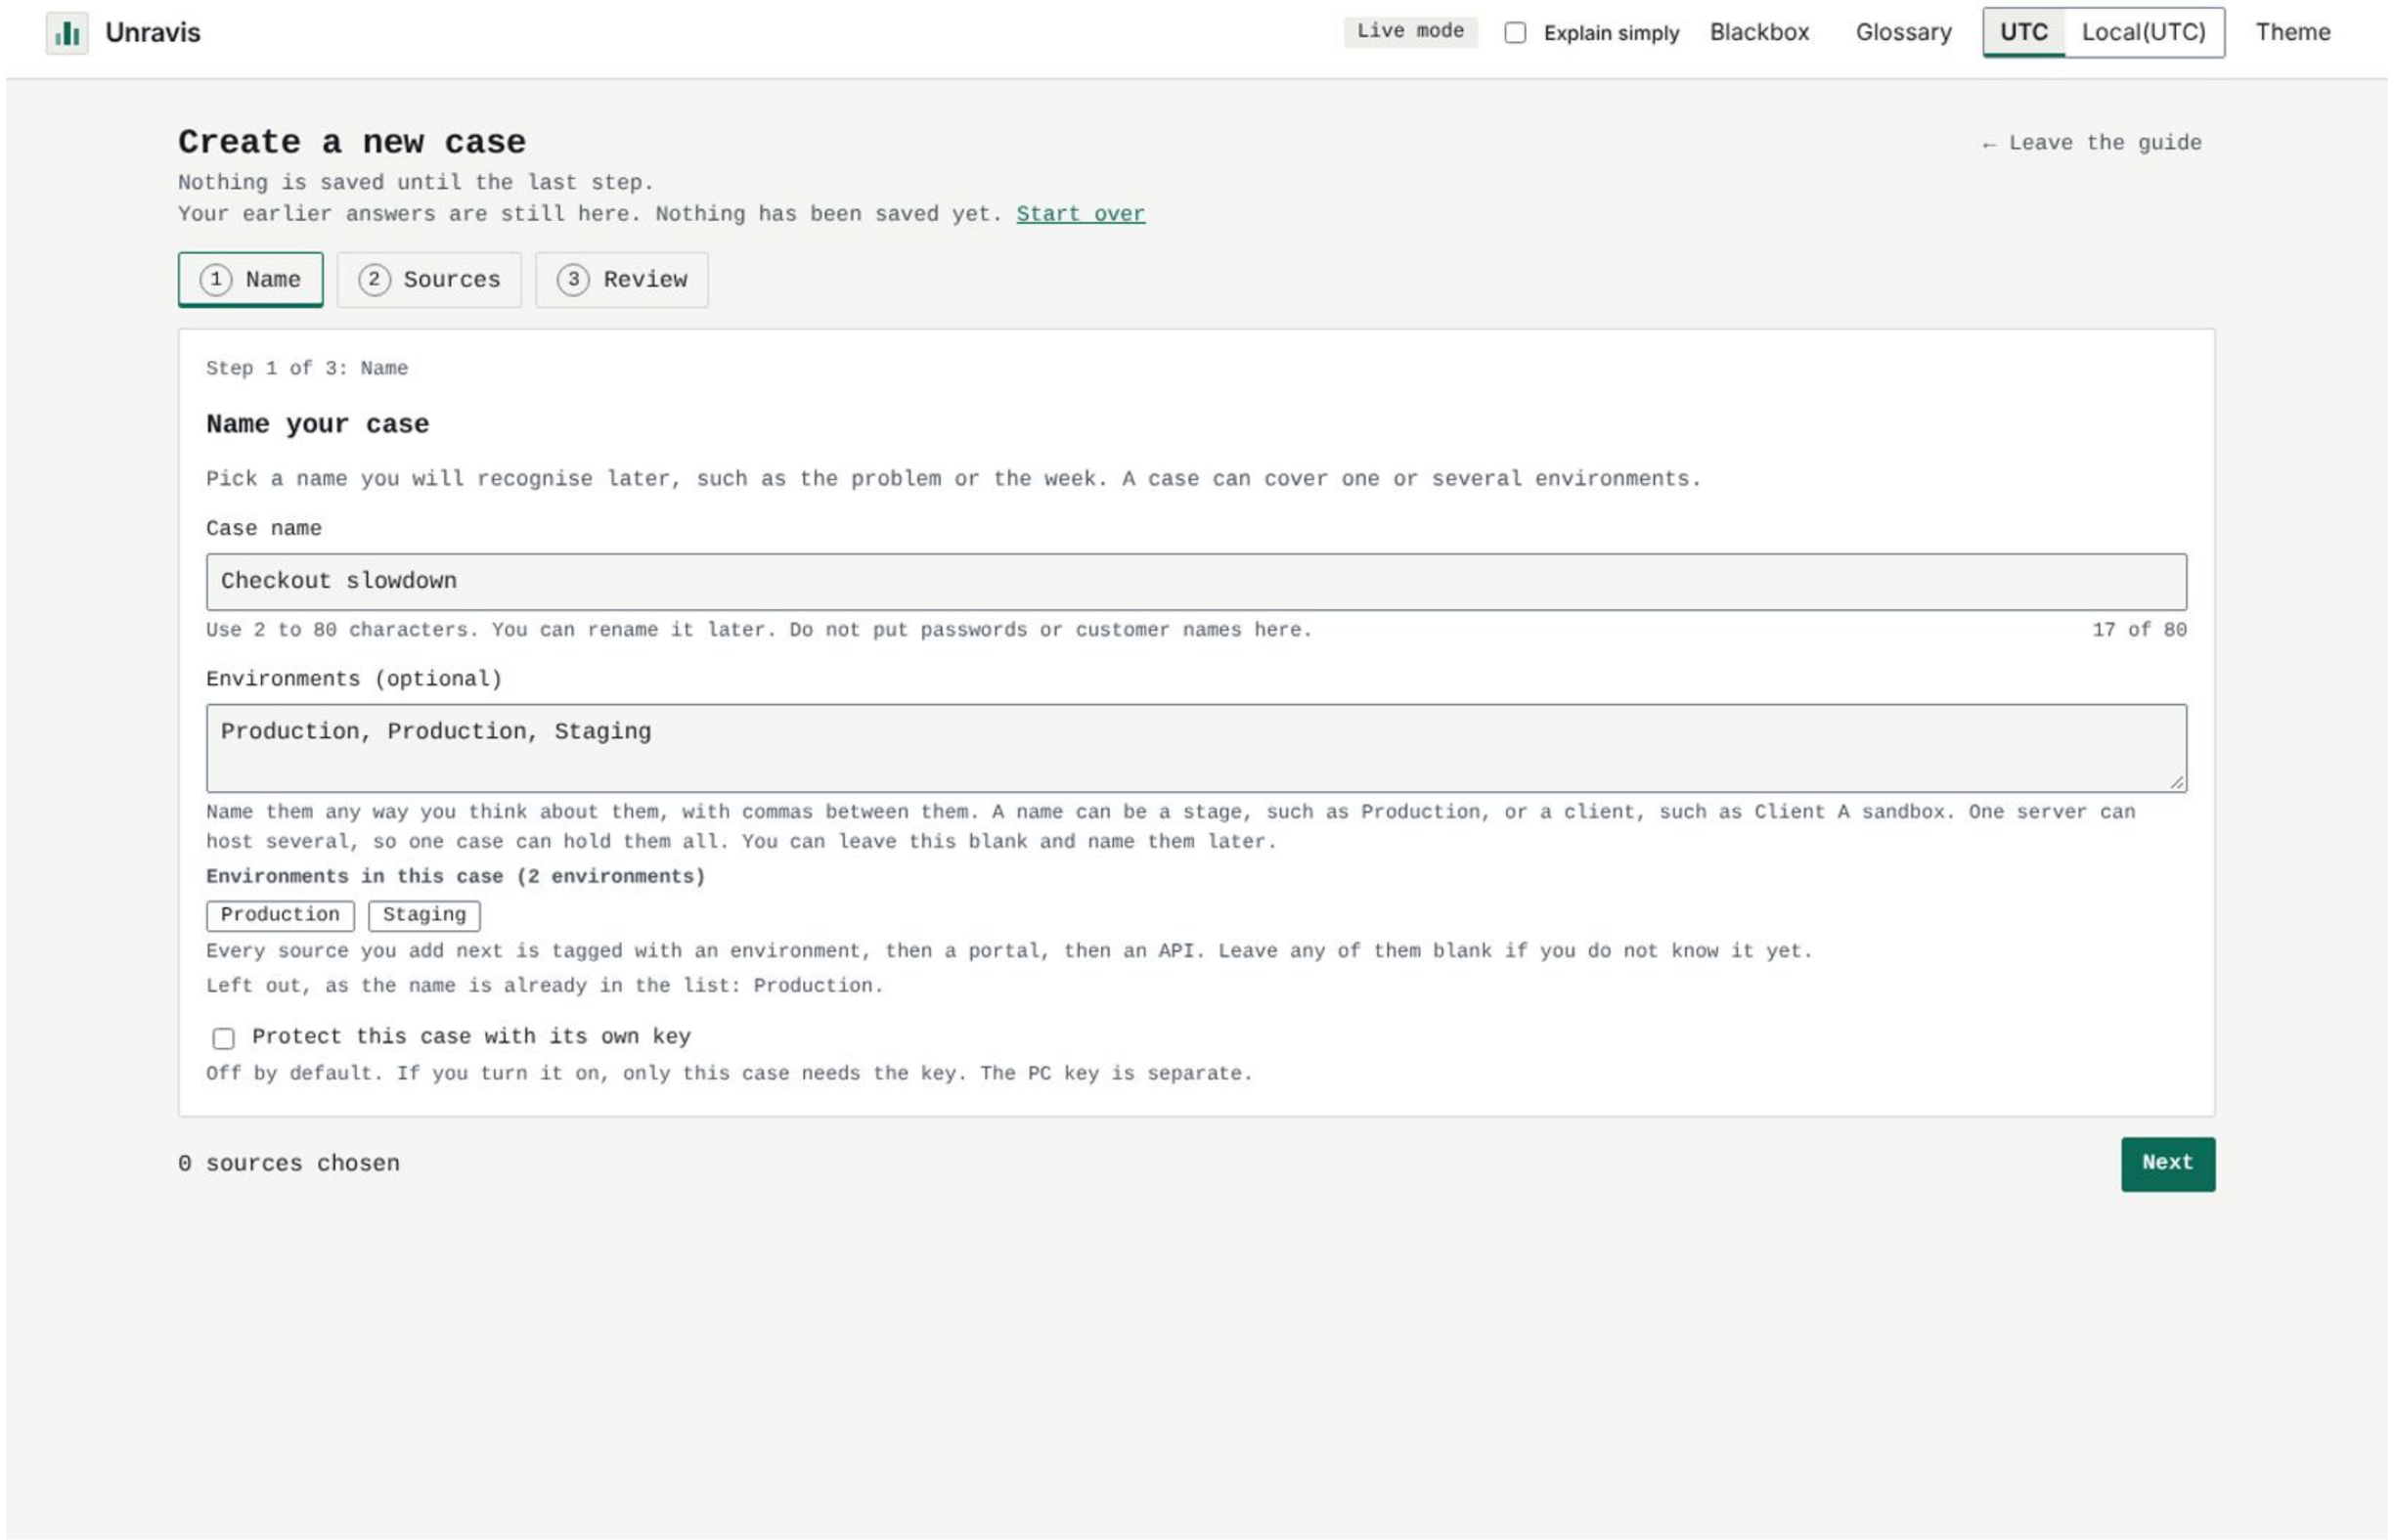

Image 096-create-review-empty-case.png

What it shows: Review with a name and no sources: the button says Create empty case.
How to reach it: Scenario w-empty.

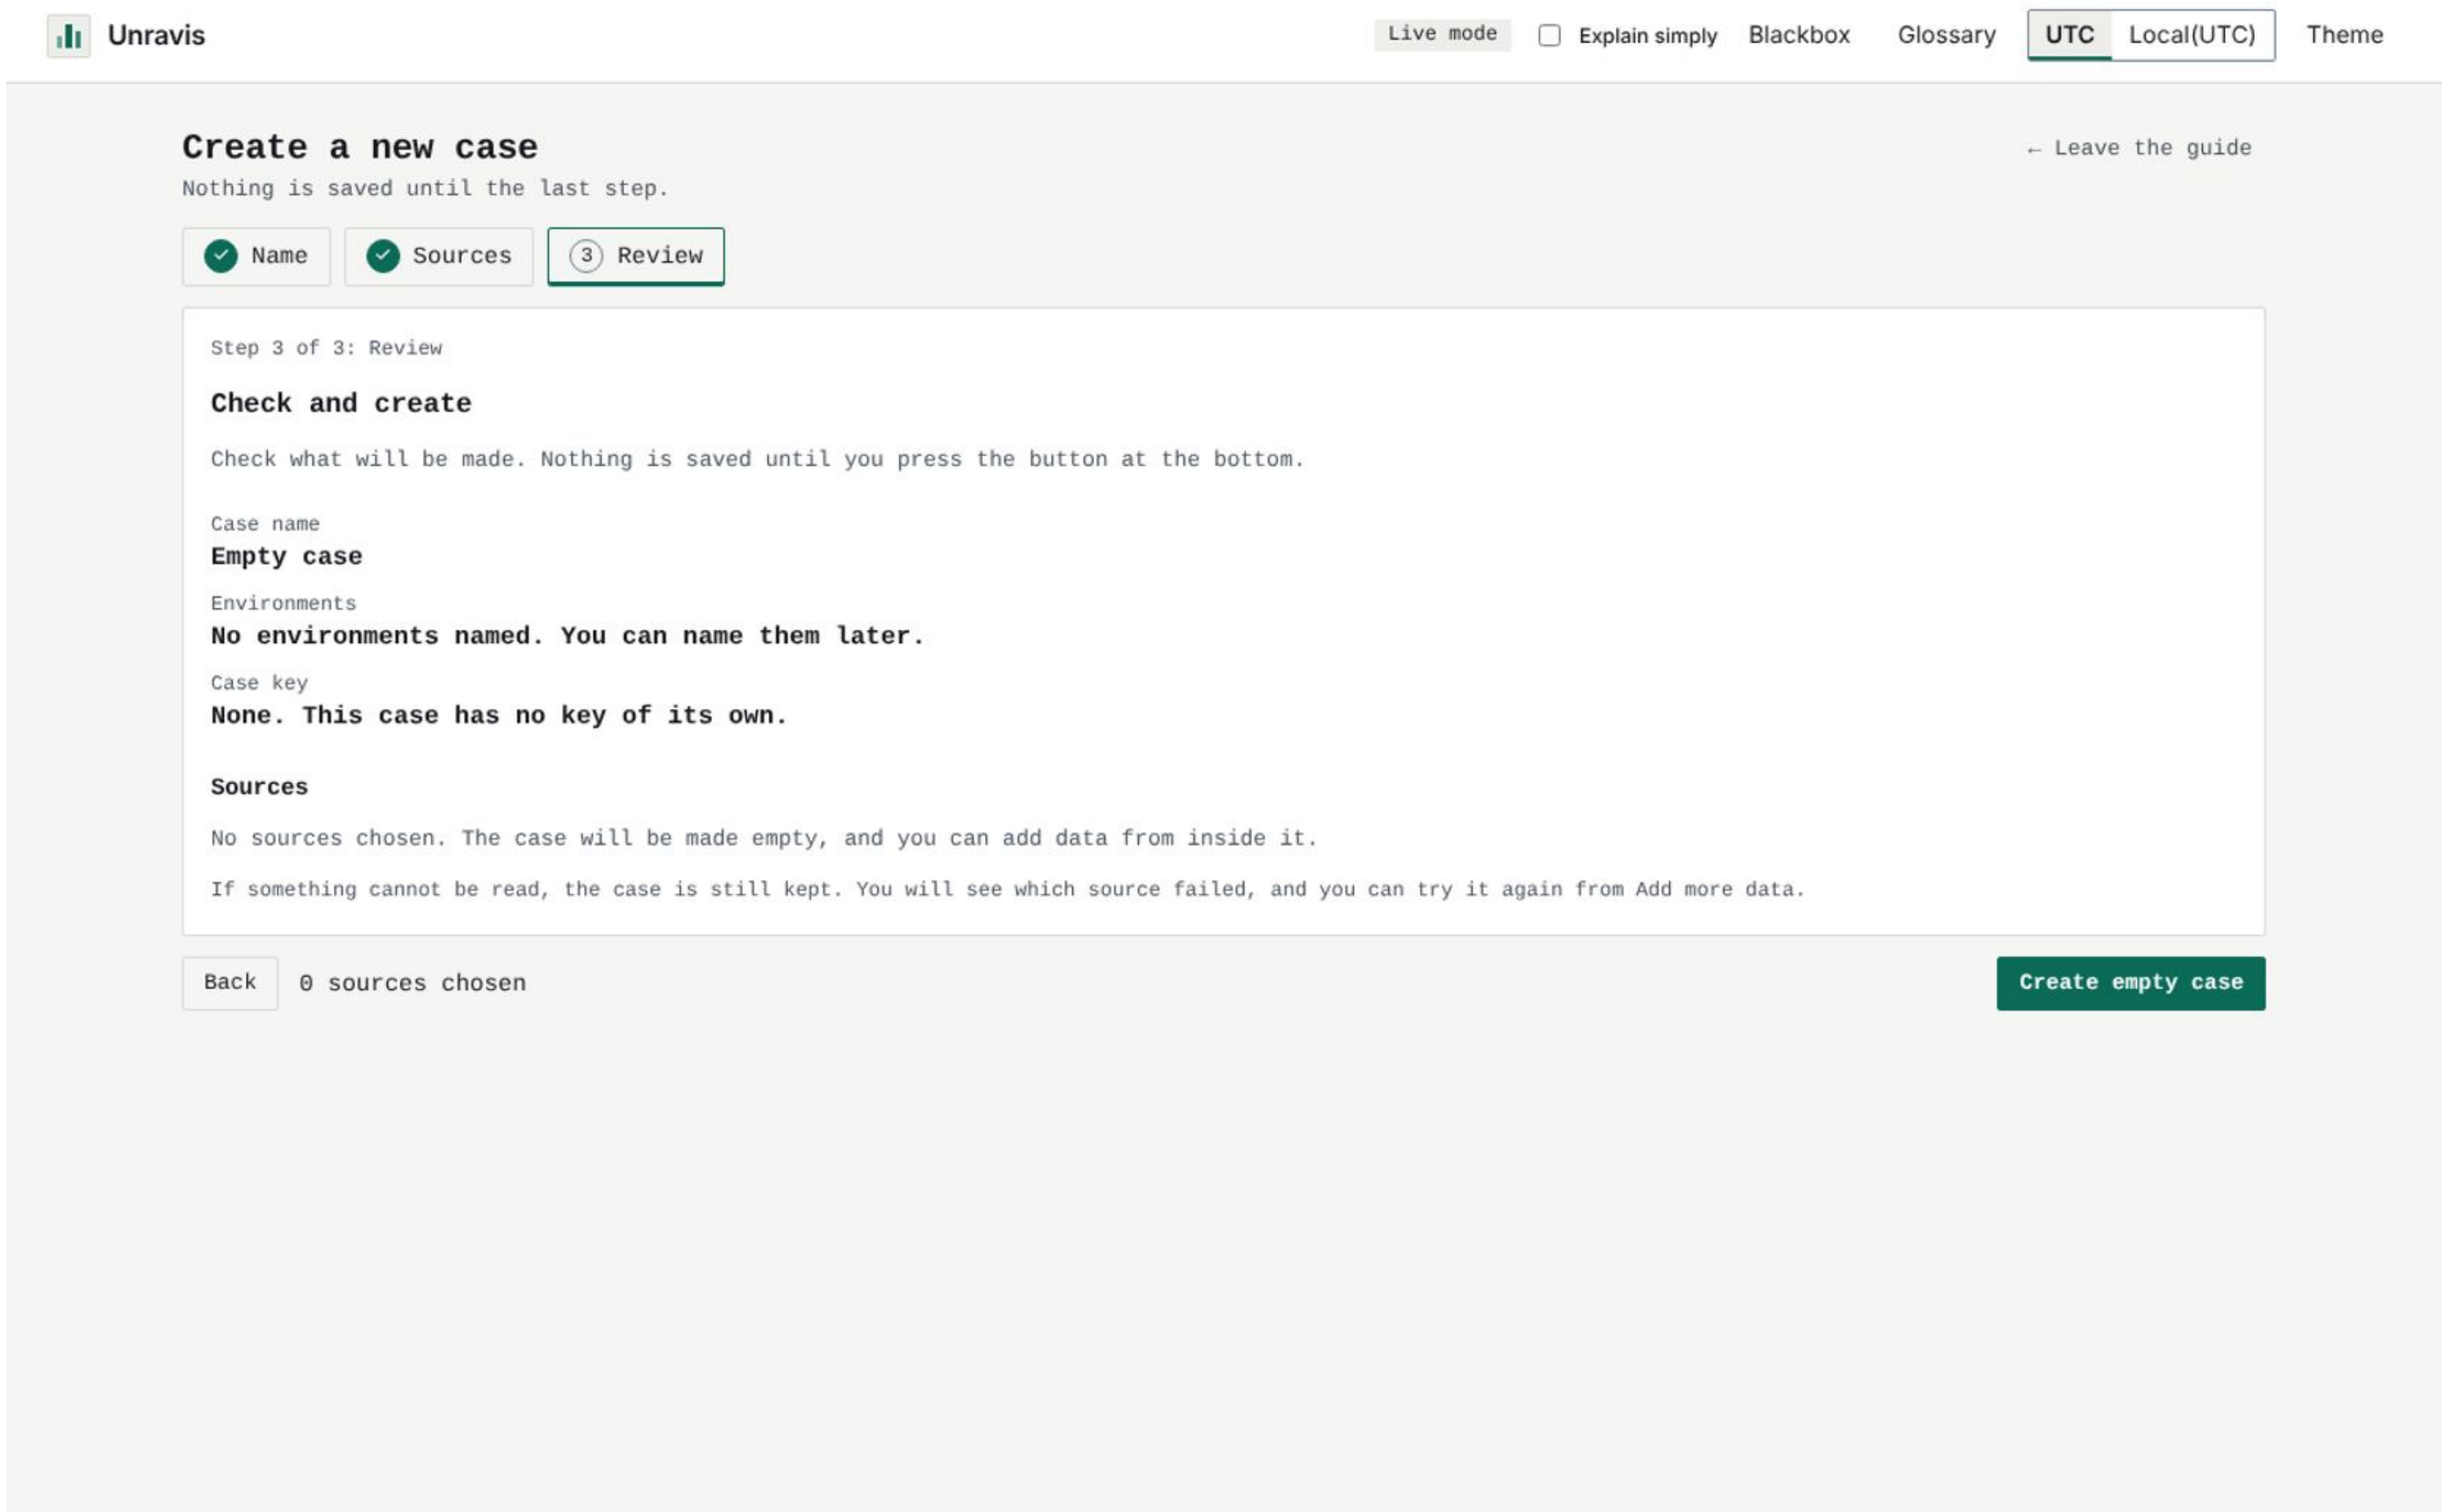

Image 097-create-review-one-source-will-fail.png

What it shows: Review where one source will fail to read.
How to reach it: Scenario w-review.

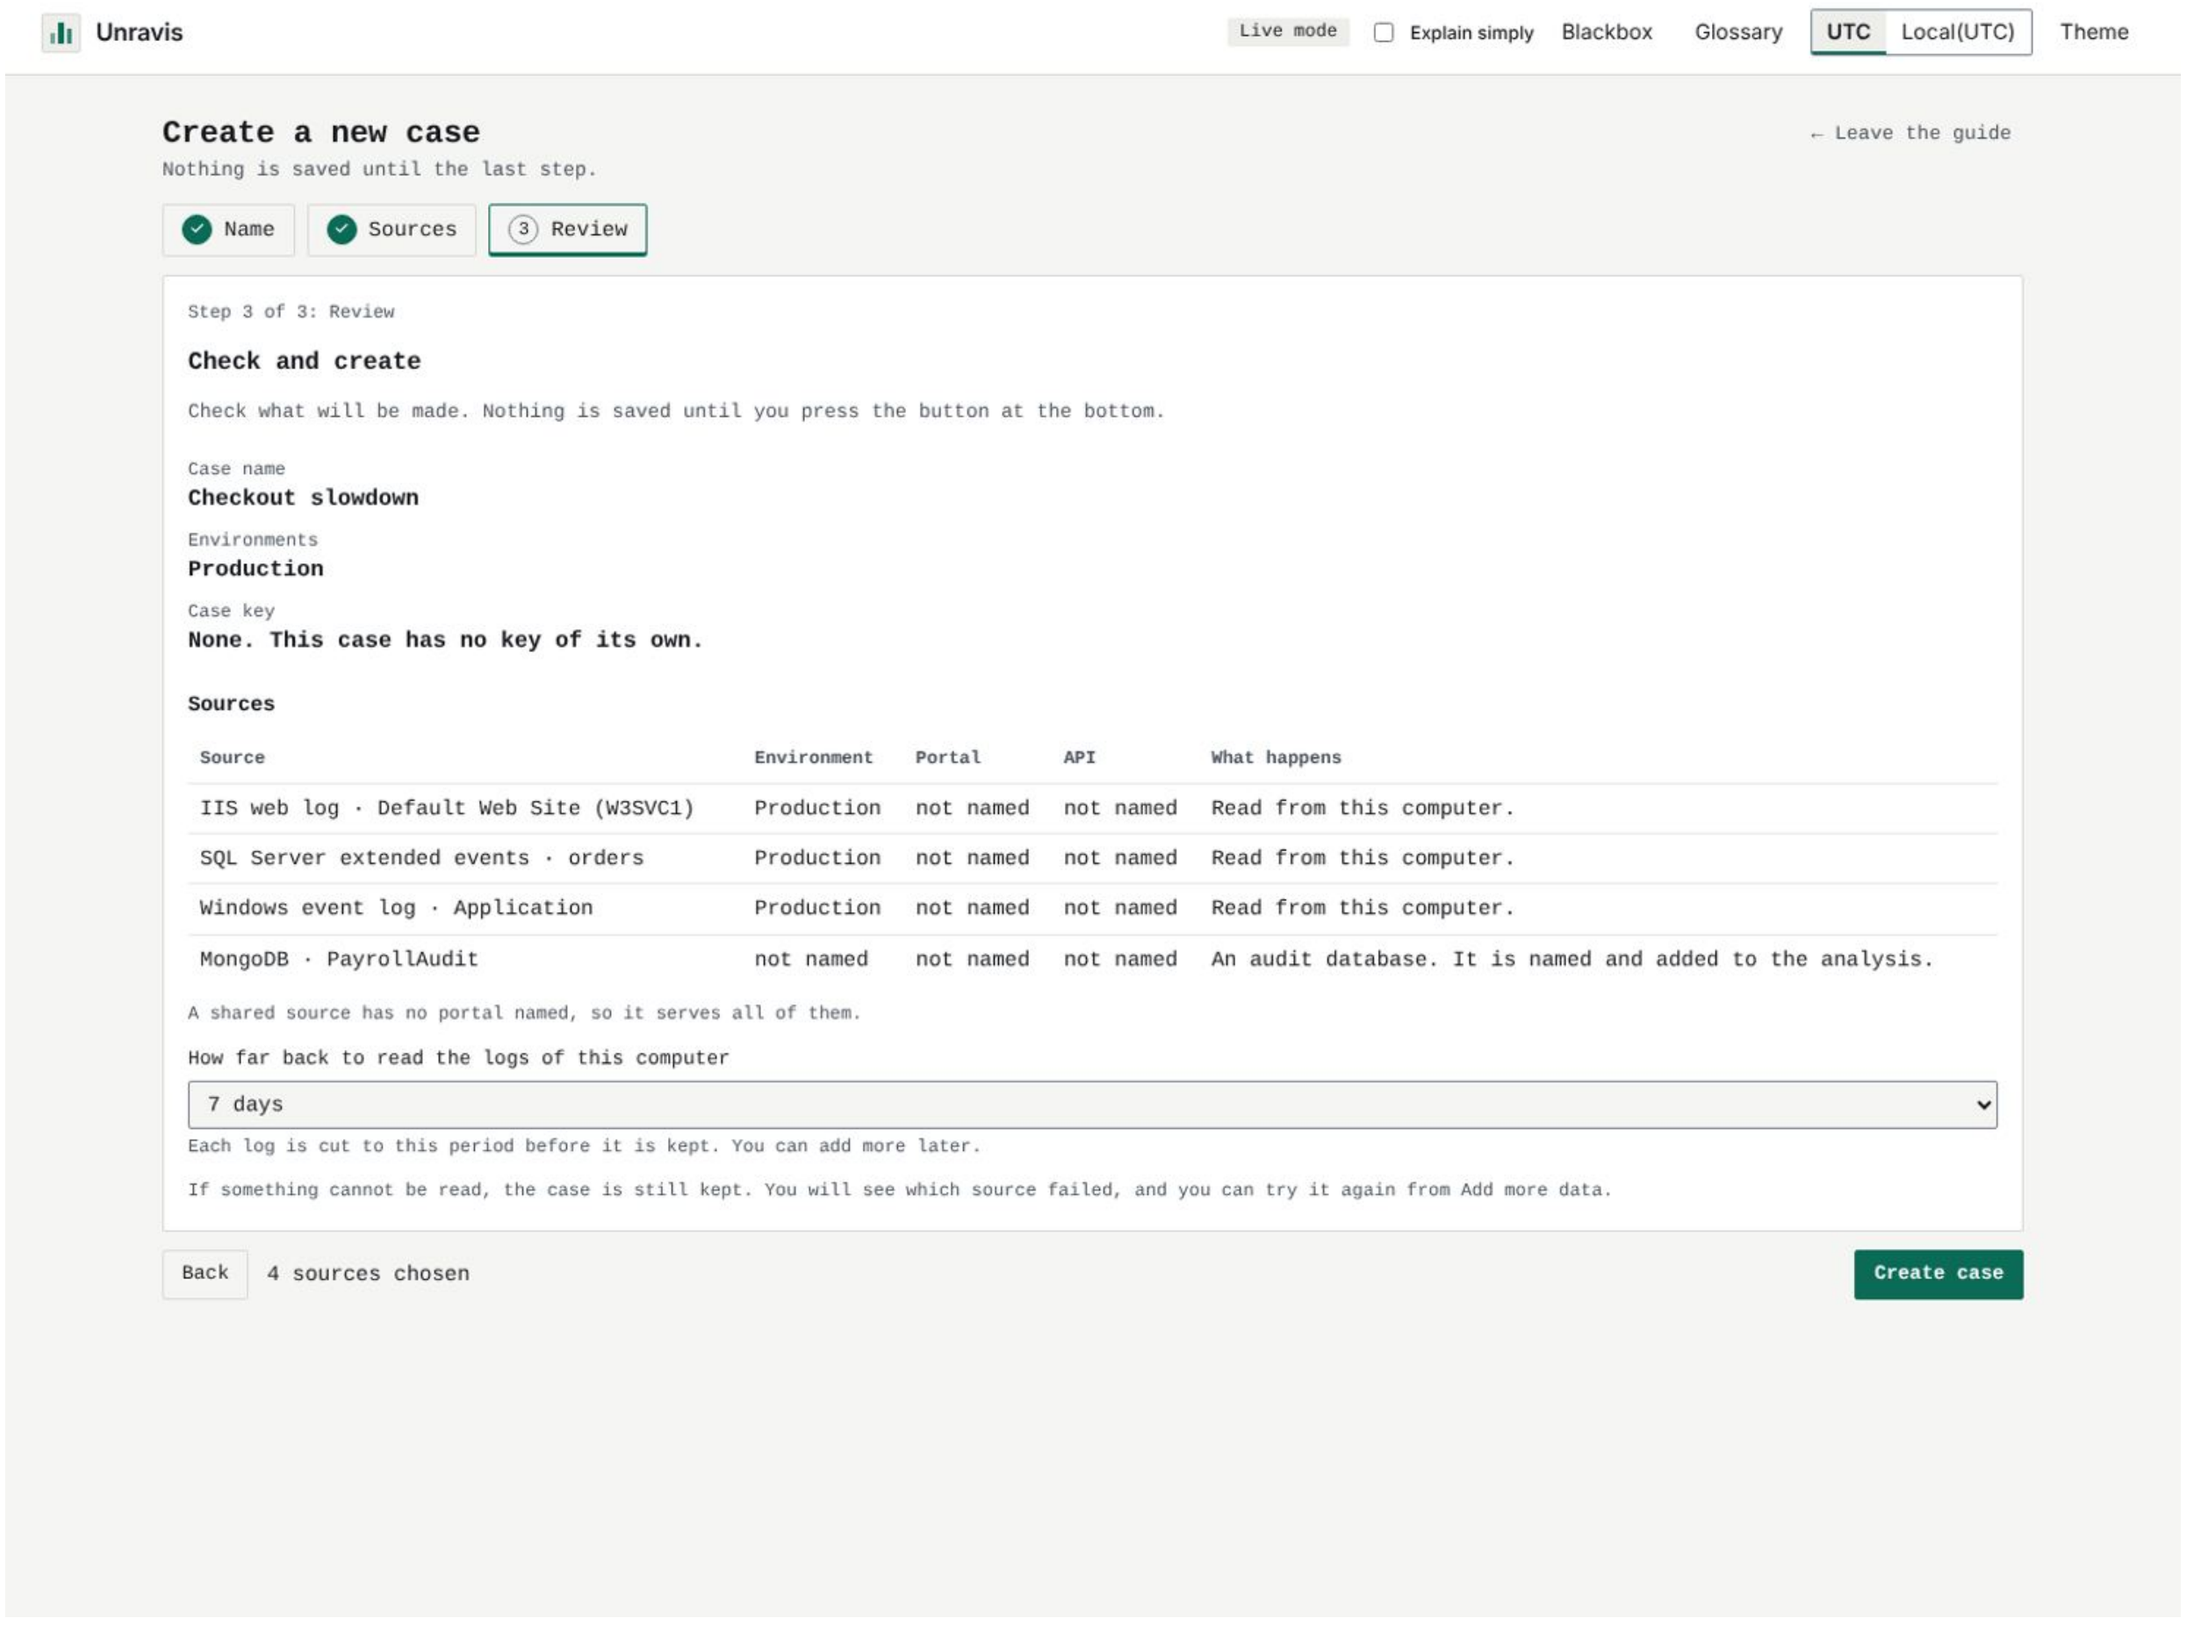

Image 098-open-case-from-list.png

What it shows: The list row to press: Open case.
How to reach it: Start screen, left card.

Image 099-case-home-full.png

What it shows: Case home, whole page: header, Analysis, Investigation Timeline, Databases, Story so far, Theories, Health checks, Saved connections, Files, Case key, Erase.
How to reach it: Press Open case on Payroll.Run slowdown, 20 Oct.

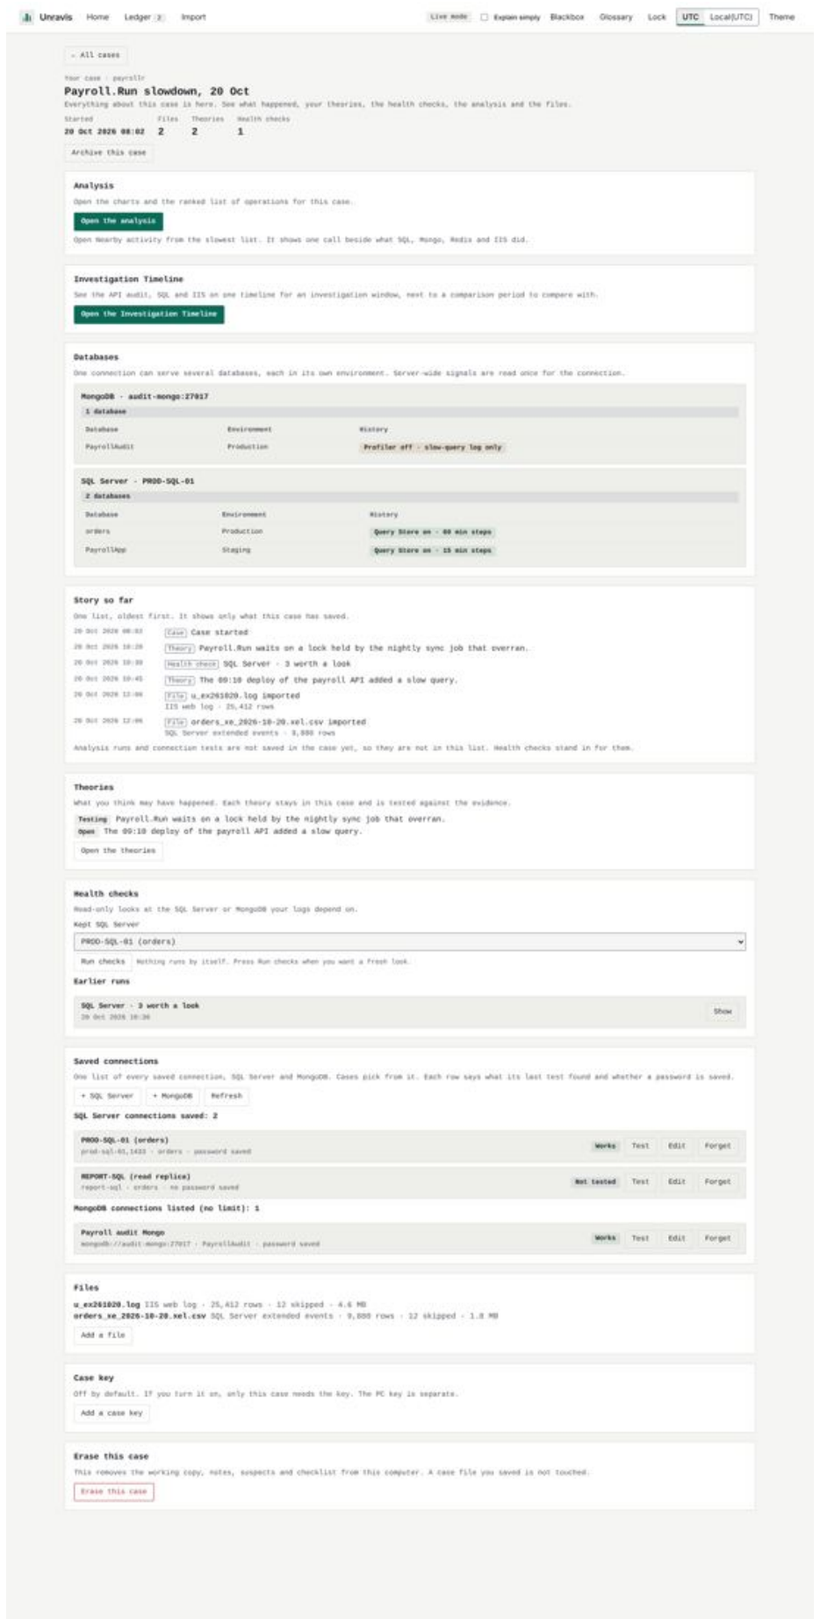

Image 100-case-home-header.png

What it shows: The case header: title, counts, All cases and Archive this case.
How to reach it: Case home, top.

```
Payroll.Run slowdown, 20 Oct
```

Image 101-case-block-analysis.png

What it shows: Analysis block: Open the analysis.
How to reach it: Case home.

Image 102-case-block-timeline.png

What it shows: Investigation Timeline block: Open the Investigation Timeline.
How to reach it: Case home.

Image 103-case-block-databases.png

What it shows: Databases block: grouped by connection, with environment and history chip.
How to reach it: Case home.

Databases

One connection can serve several databases, each in its own environment. Server-wide signals are read once for the connection.

MongoDB · audit-mongo:27017

1 database

Database	Environment	History
PayrollAudit	Production	**Profiler off · slow-query log only**

SQL Server · PROD-SQL-01

2 databases

Database	Environment	History
orders	Production	**Query Store on · 60 min steps**
PayrollApp	Staging	**Query Store on · 15 min steps**

Image 104-case-block-story.png

What it shows: Story so far.
How to reach it: Case home.
