Image 157-analysis-more-filters-when.png

What it shows: More filters opened: Investigate From/To and Reference From/To with the time zone and UTC echo.
How to reach it: Press More filters.

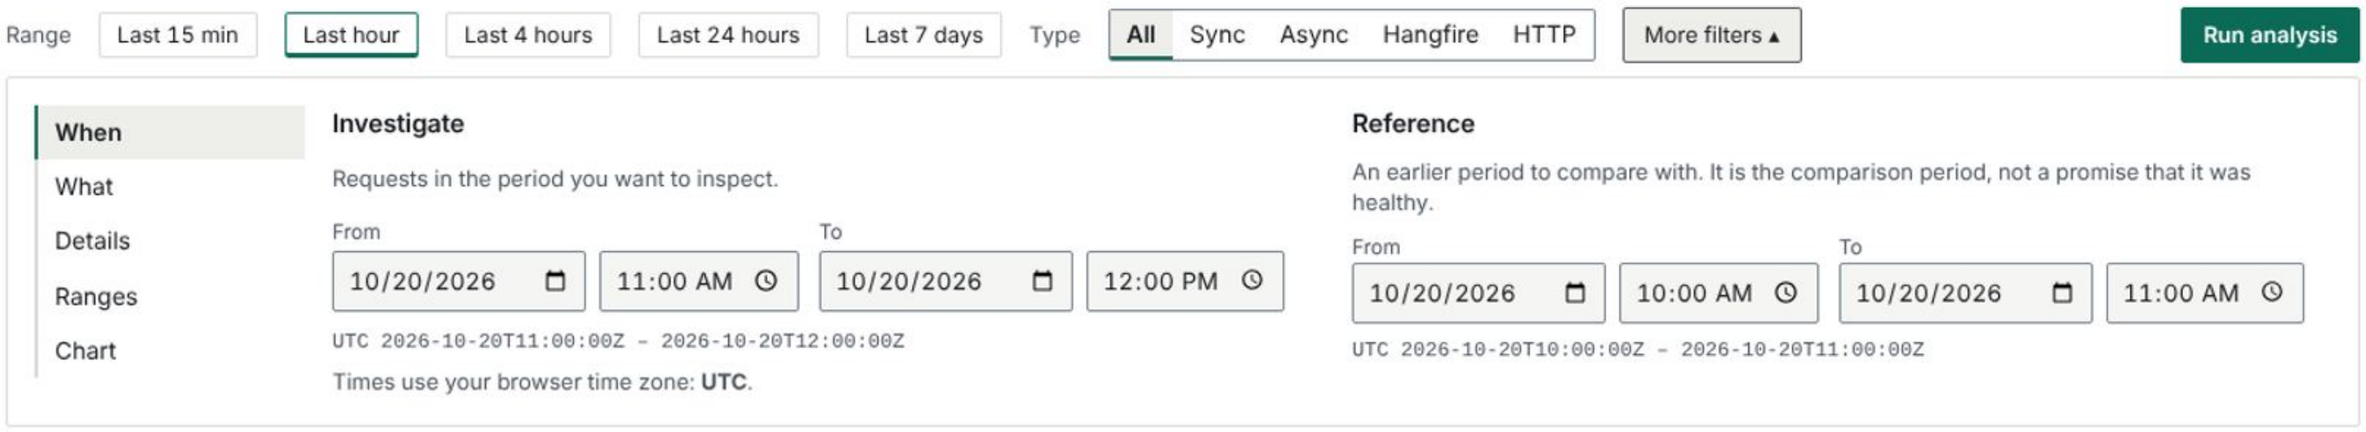

Image 158-analysis-quick-range-4-hours.png

What it shows: A quick range chip re-runs the analysis at once.
How to reach it: Press Last 4 hours.

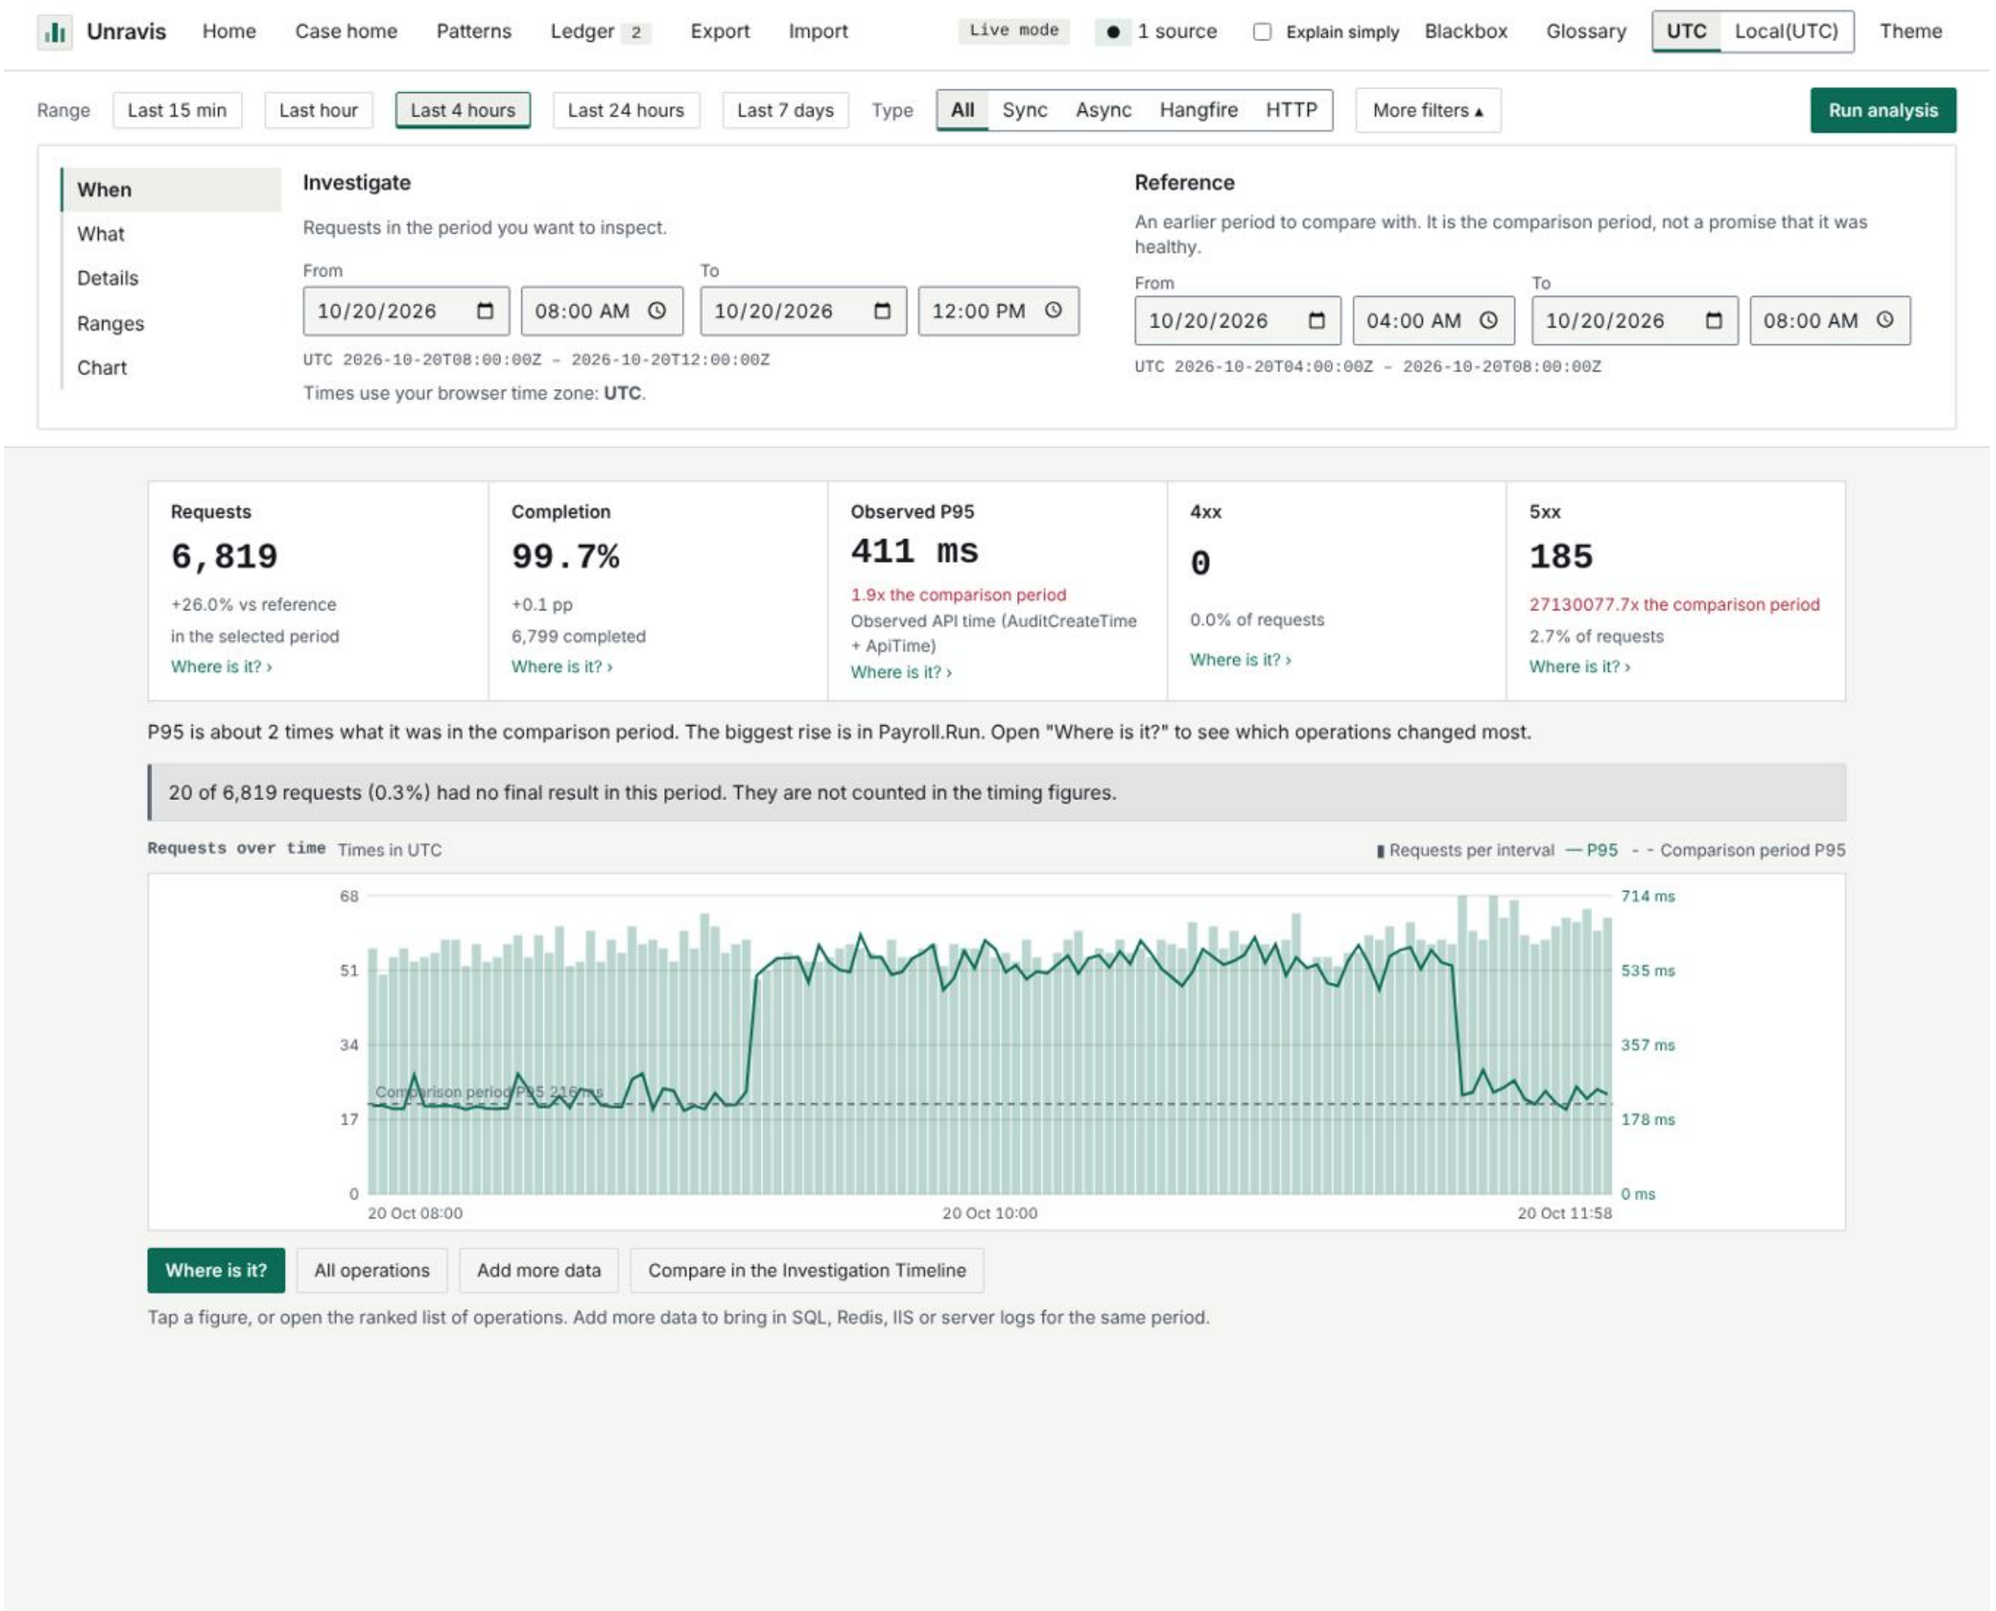

Image 159-analysis-slowdown-pulse.png

What it shows: Pulse for the slowdown against a good earlier hour: five figures with change against the reference, headline, chart.
How to reach it: Scenario a-slow.

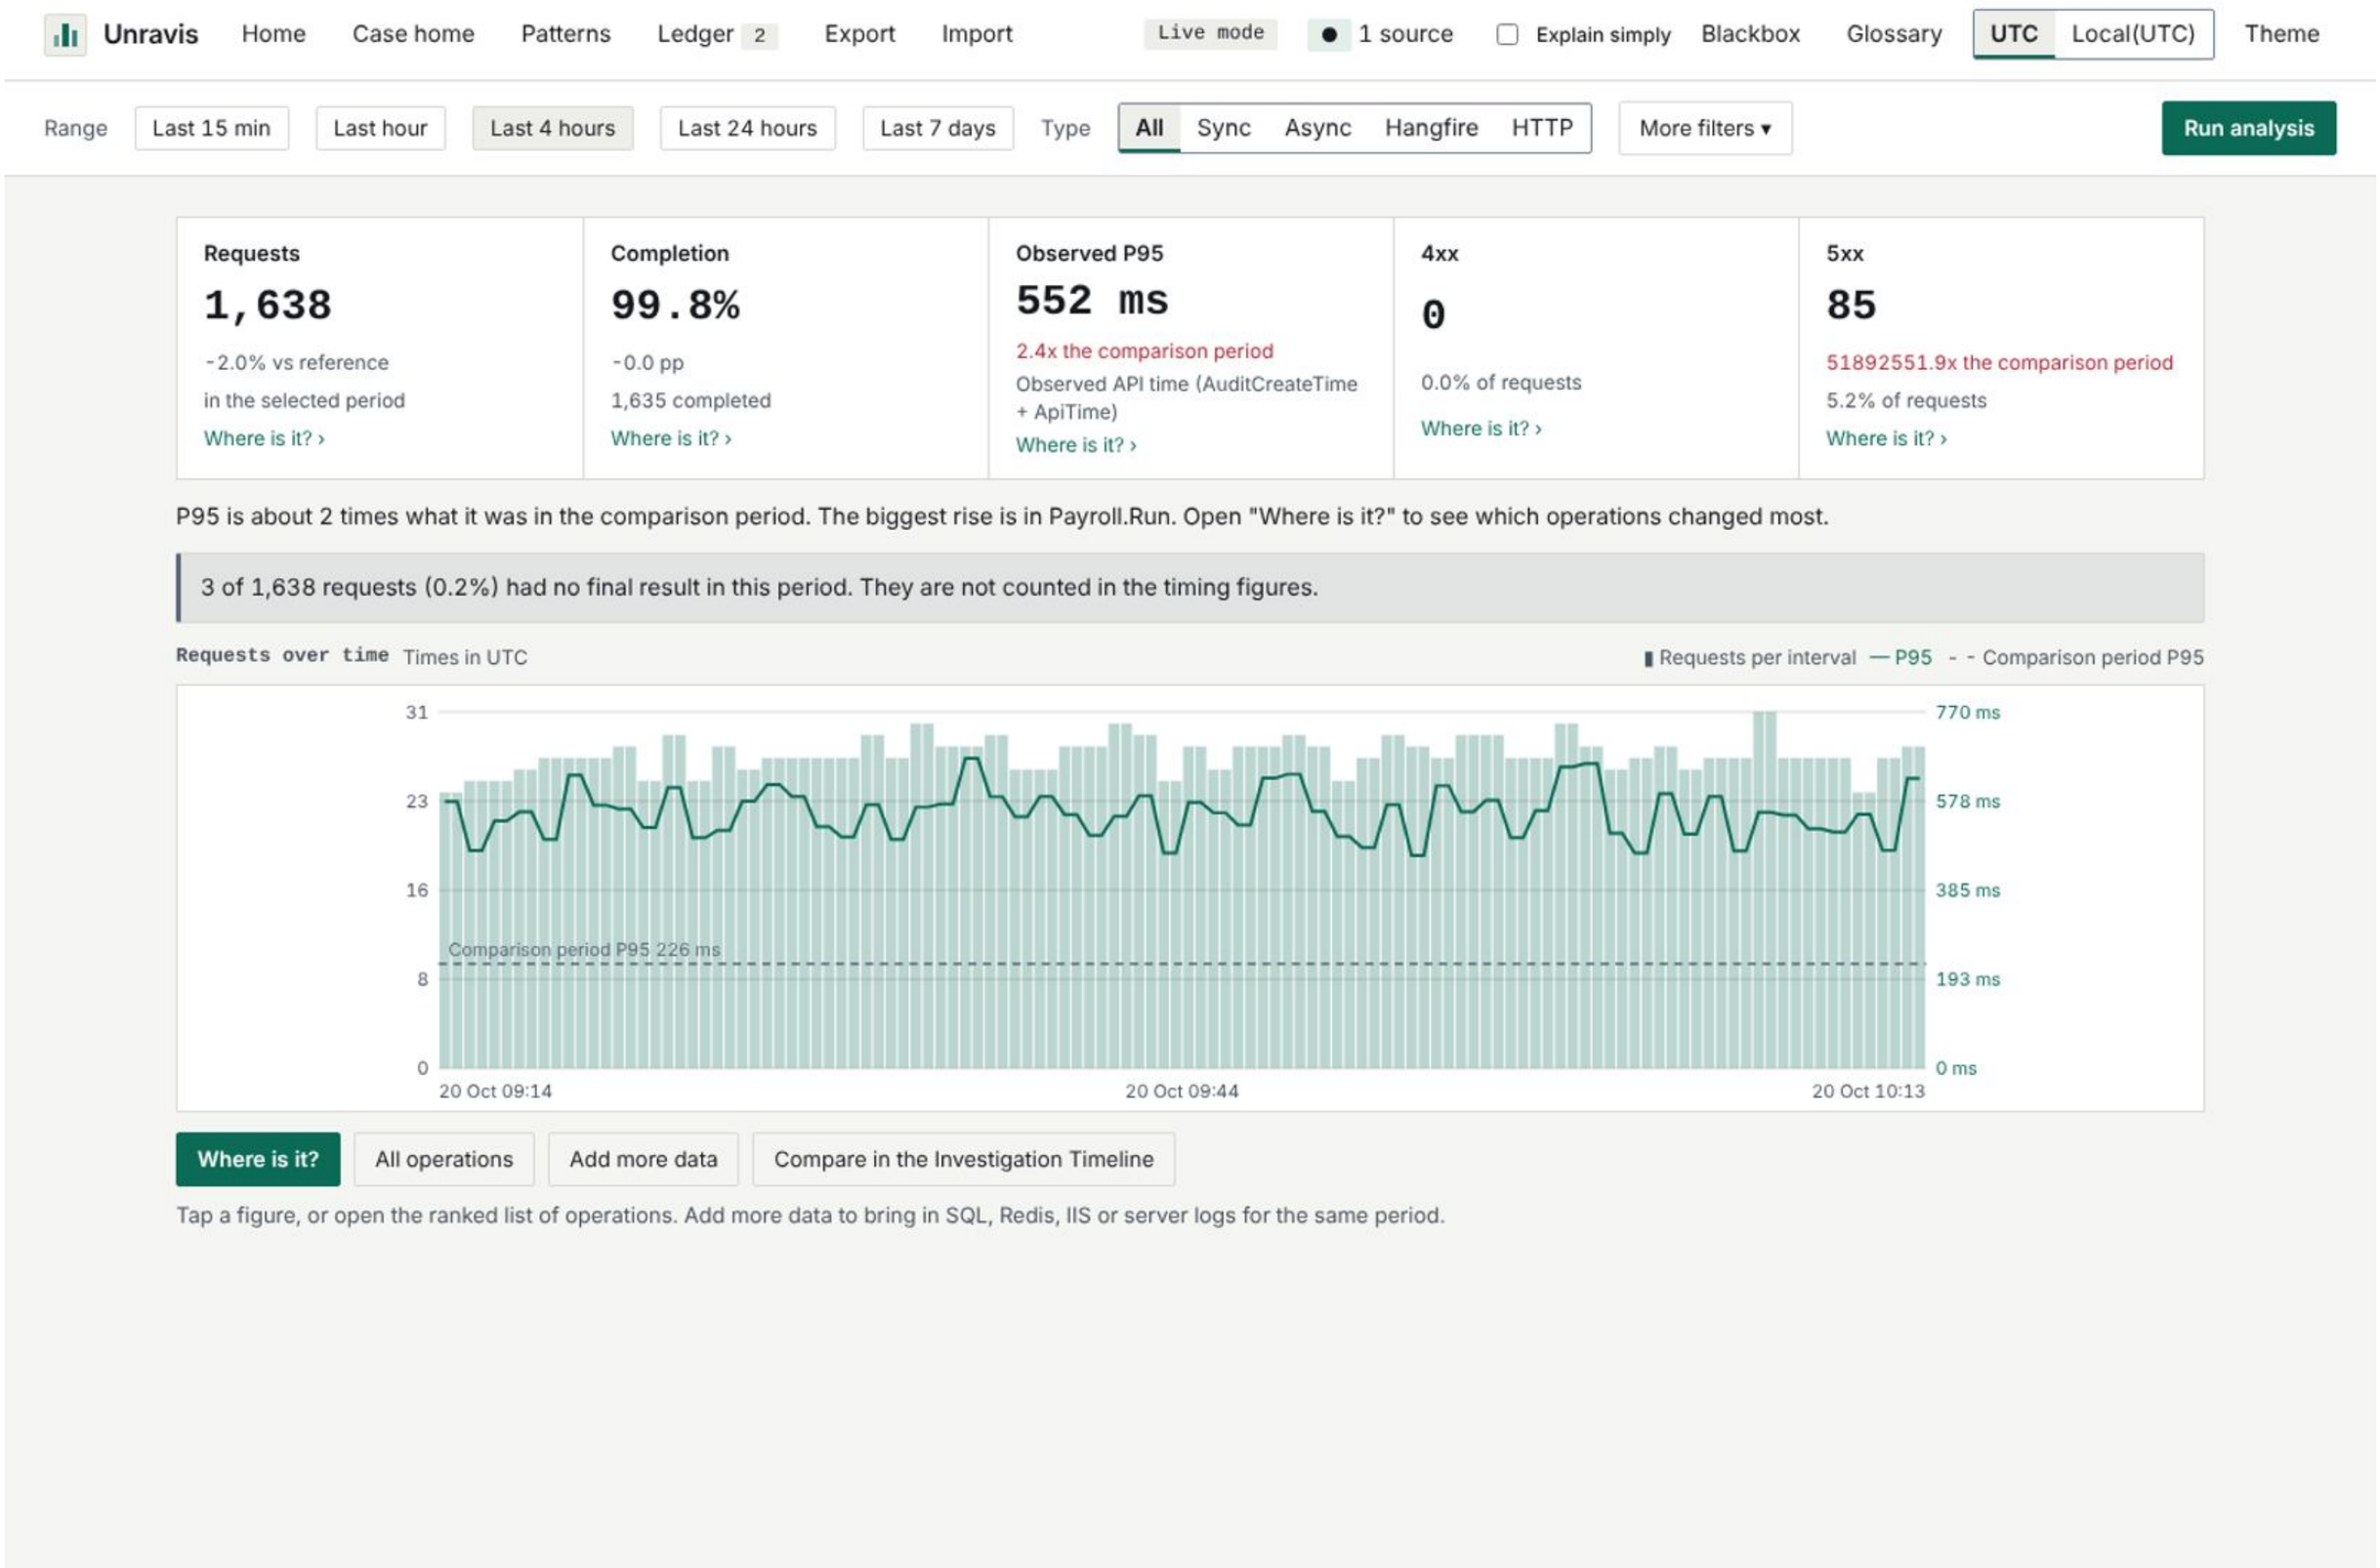

Image 160-analysis-kind-filter-async.png

What it shows: Type filter: only one kind of request.
How to reach it: Press Async in the scope bar.

Image 161-analysis-reference-overlap-blocked.png

What it shows: The analysis refuses a comparison period that overlaps the investigated period; Run analysis is off and the hint says why.
How to reach it: Scenario a-overlap.

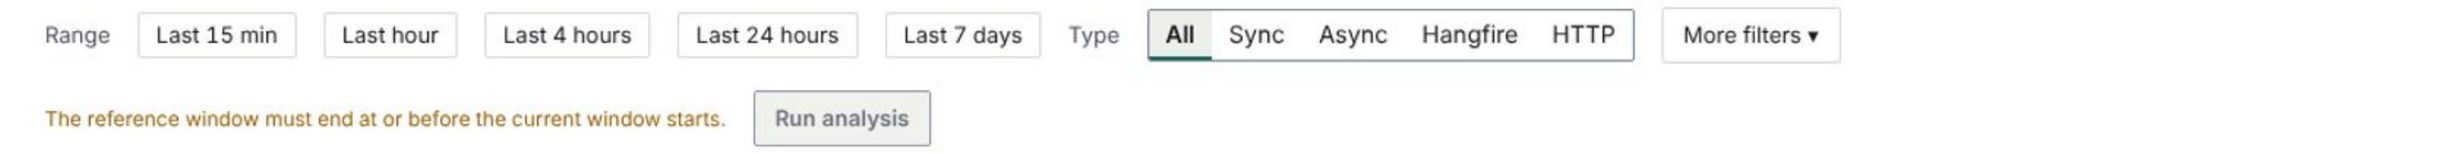

Image 162-analysis-window-over-7-days.png

What it shows: Each window can be at most 7 days here (the timeline allows 30).
How to reach it: Scenario a-long.

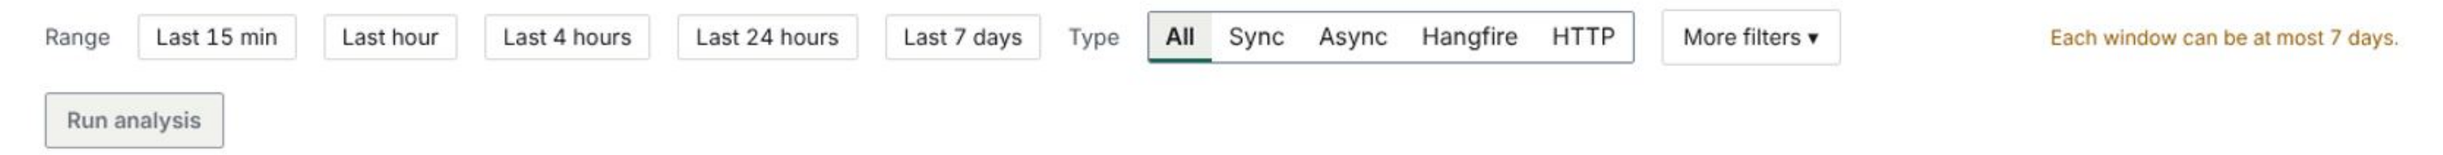

Image 163-analysis-reference-no-data.png

What it shows: The comparison period has no data: no deltas, ratios or headline.
How to reach it: Scenario a-sparse.

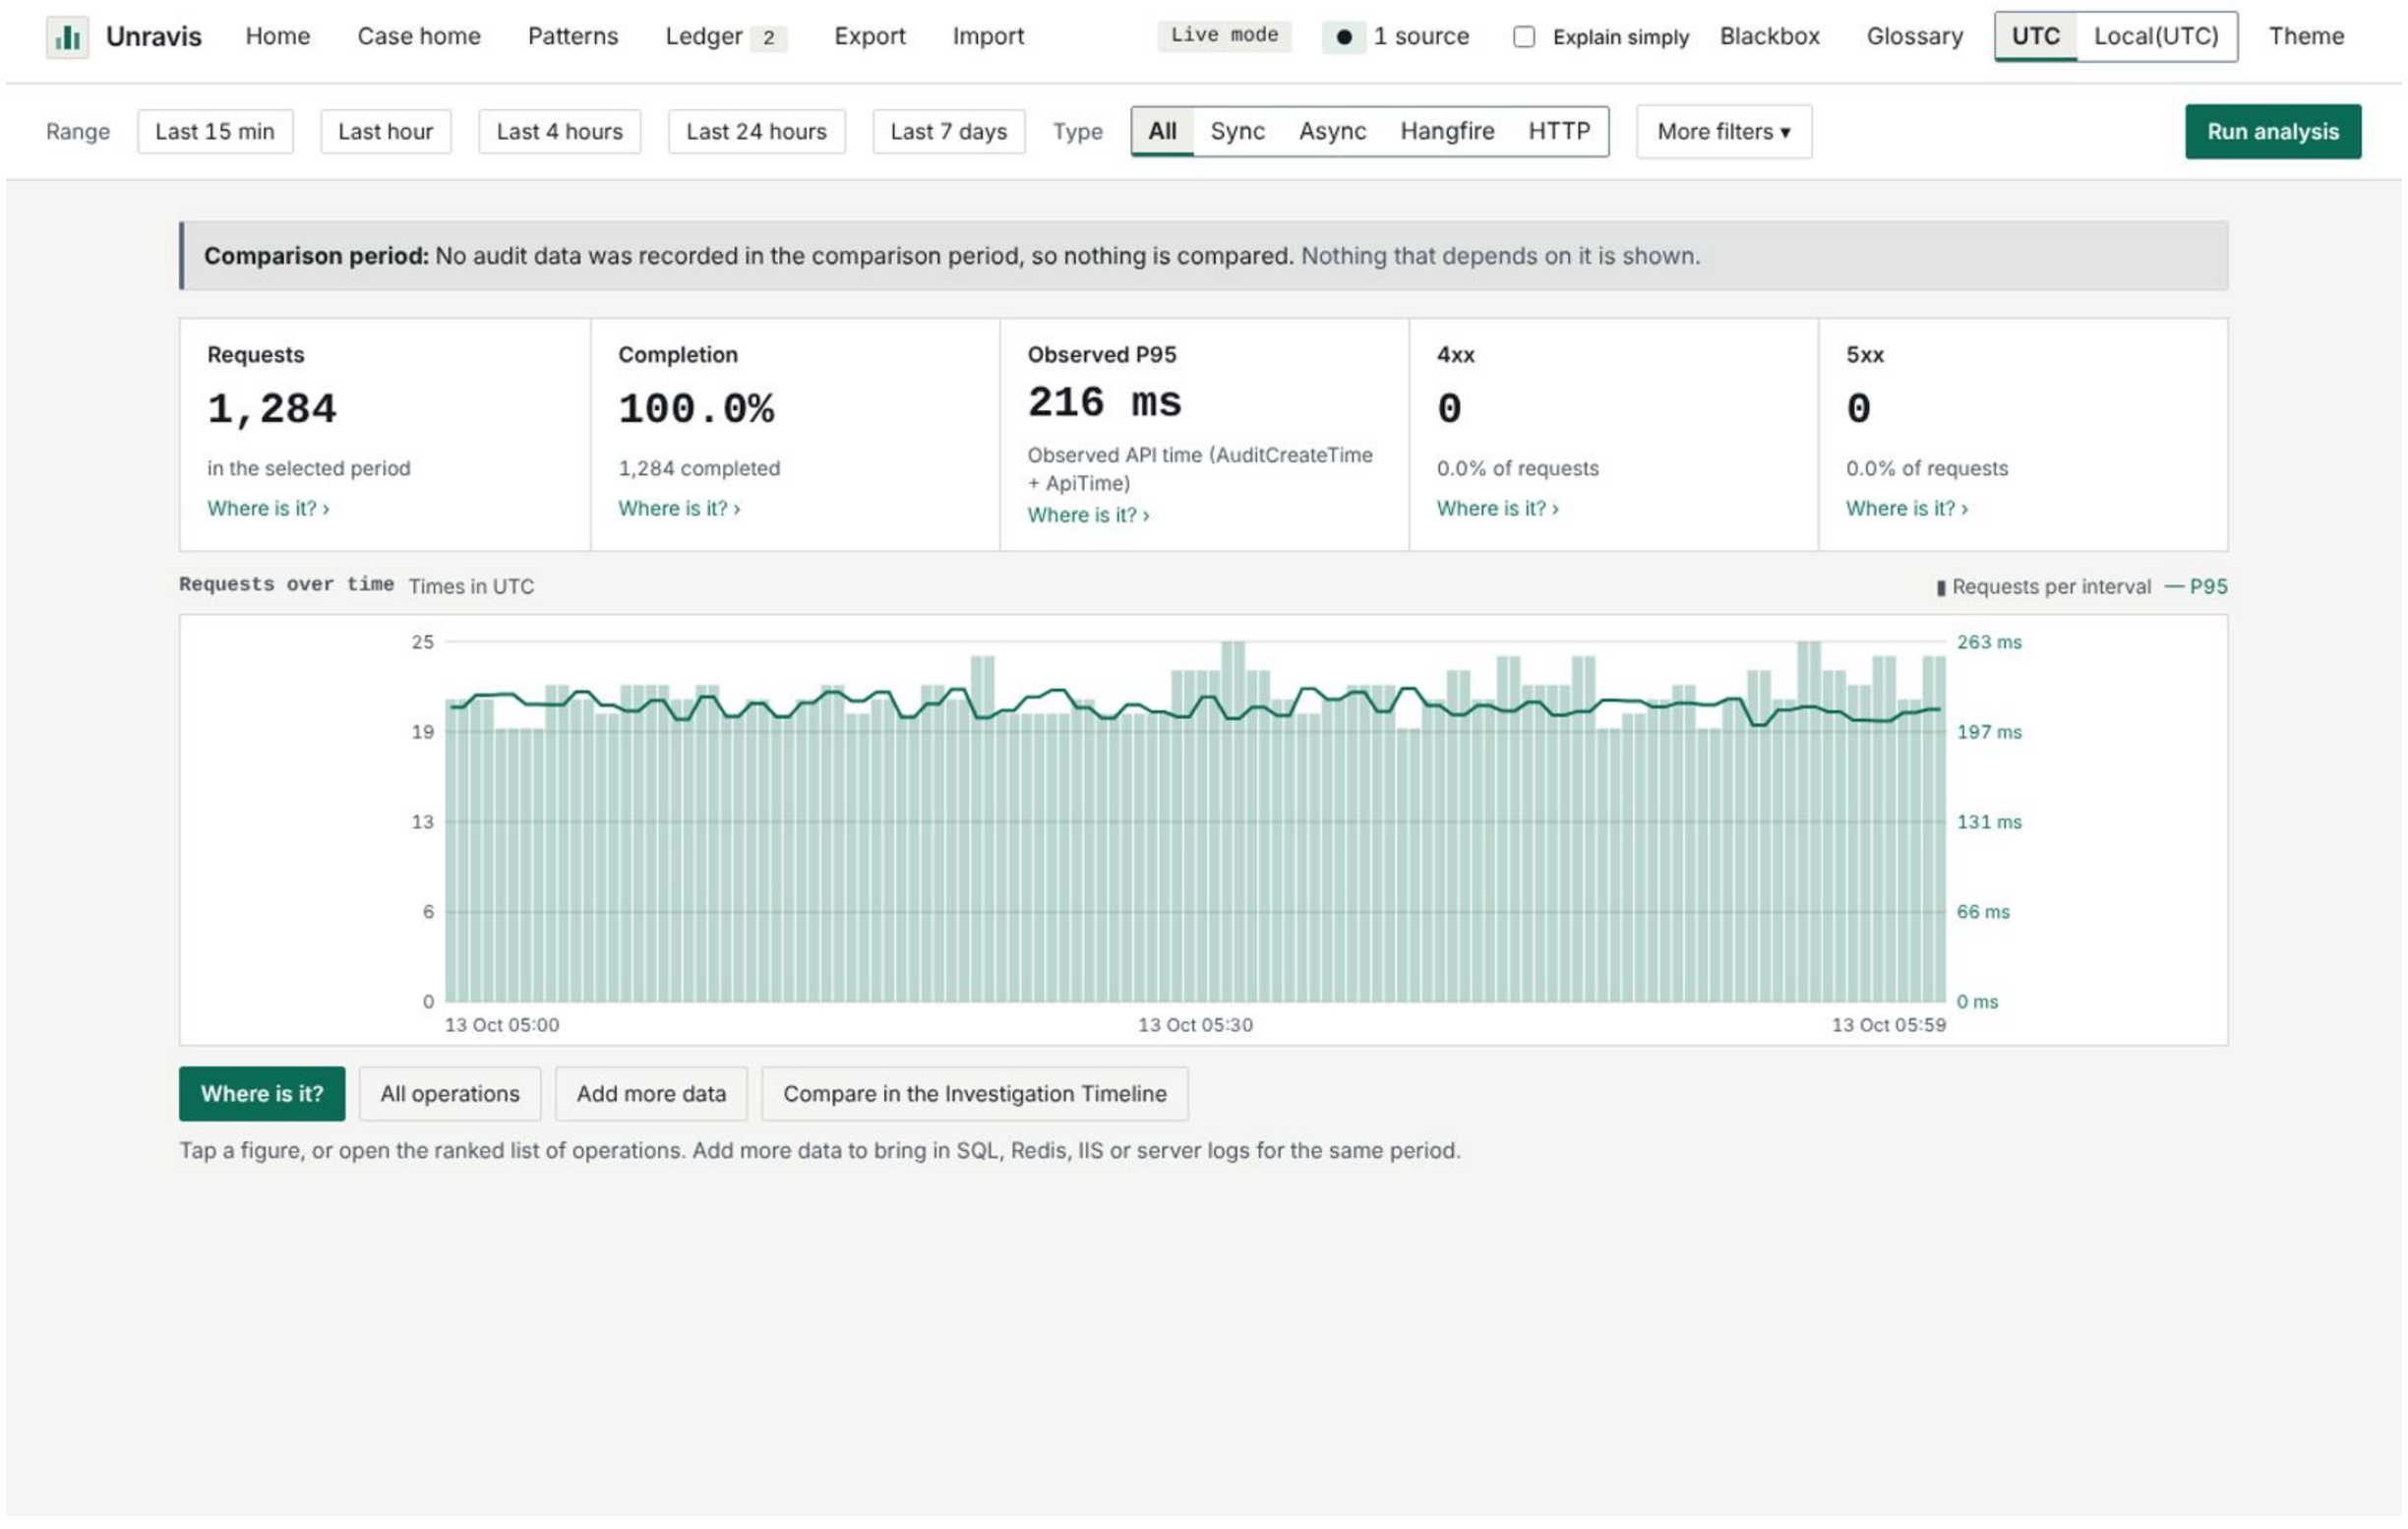

Image 164-analysis-reference-half-covered.png

What it shows: The comparison period is only partly covered: deltas stay off, the note says why.
How to reach it: Scenario a-partial.

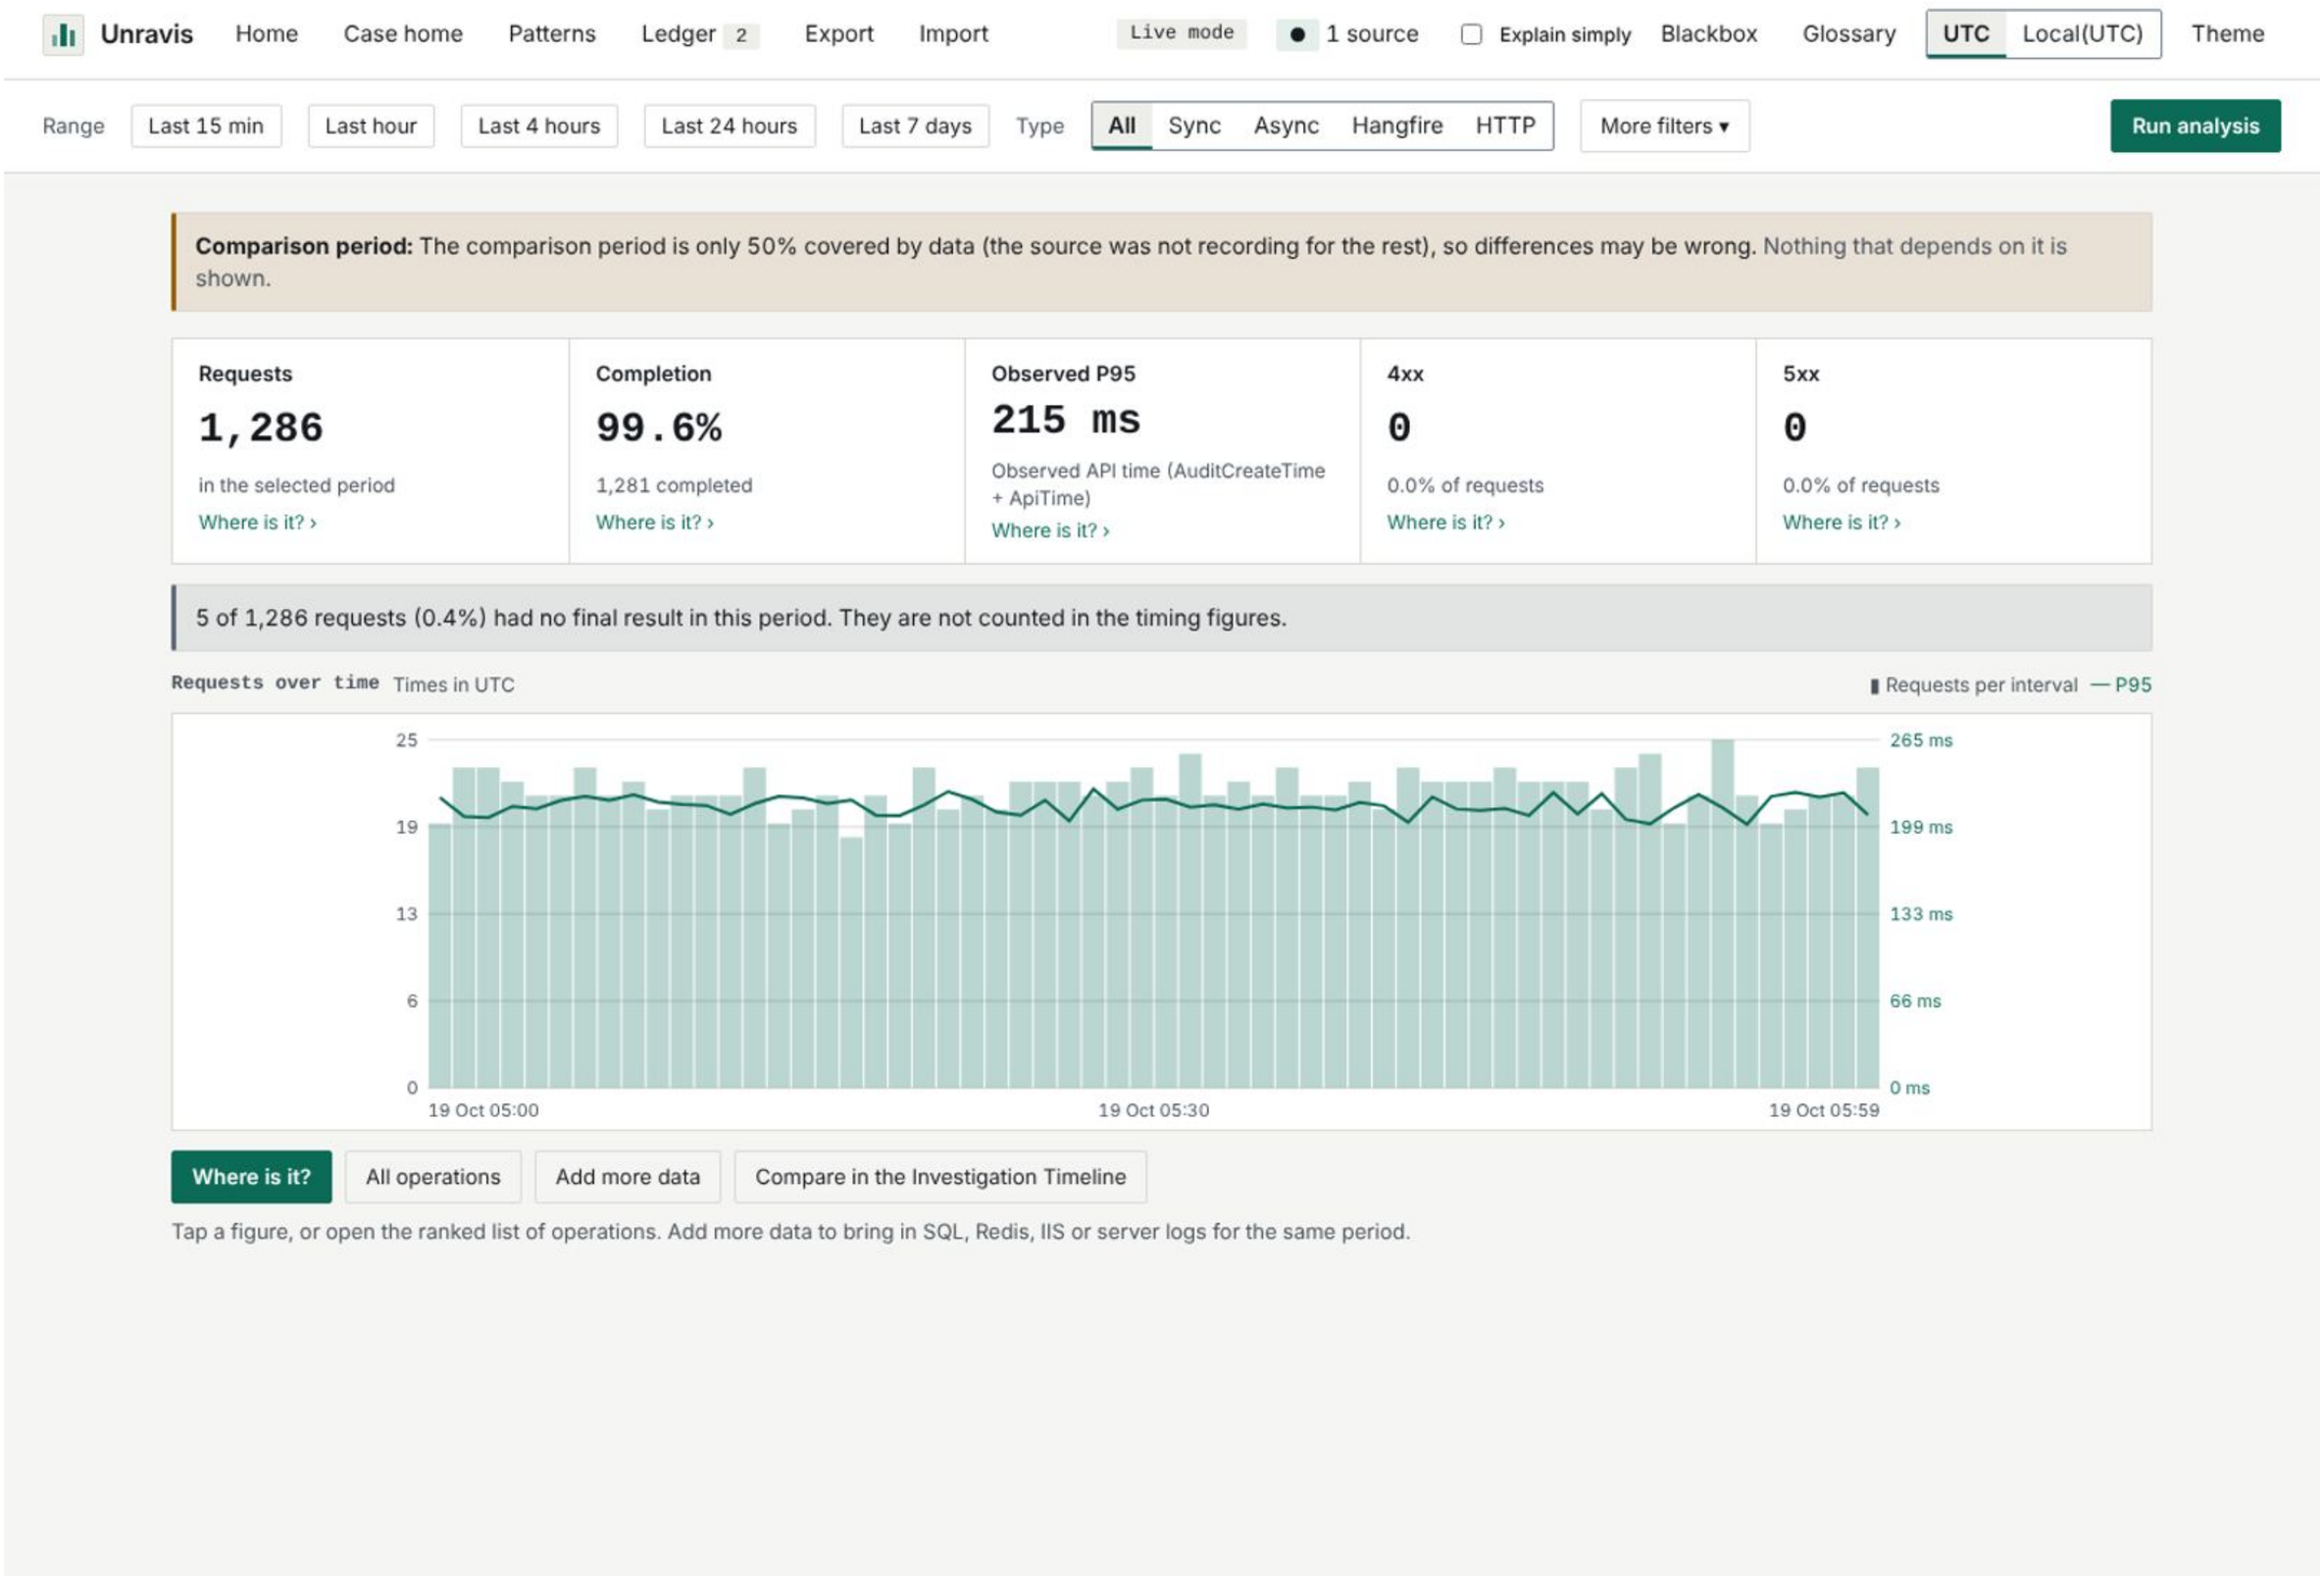

Image 165-analysis-no-data-in-period.png

What it shows: No requests in the investigated period.
How to reach it: Scenario a-empty.

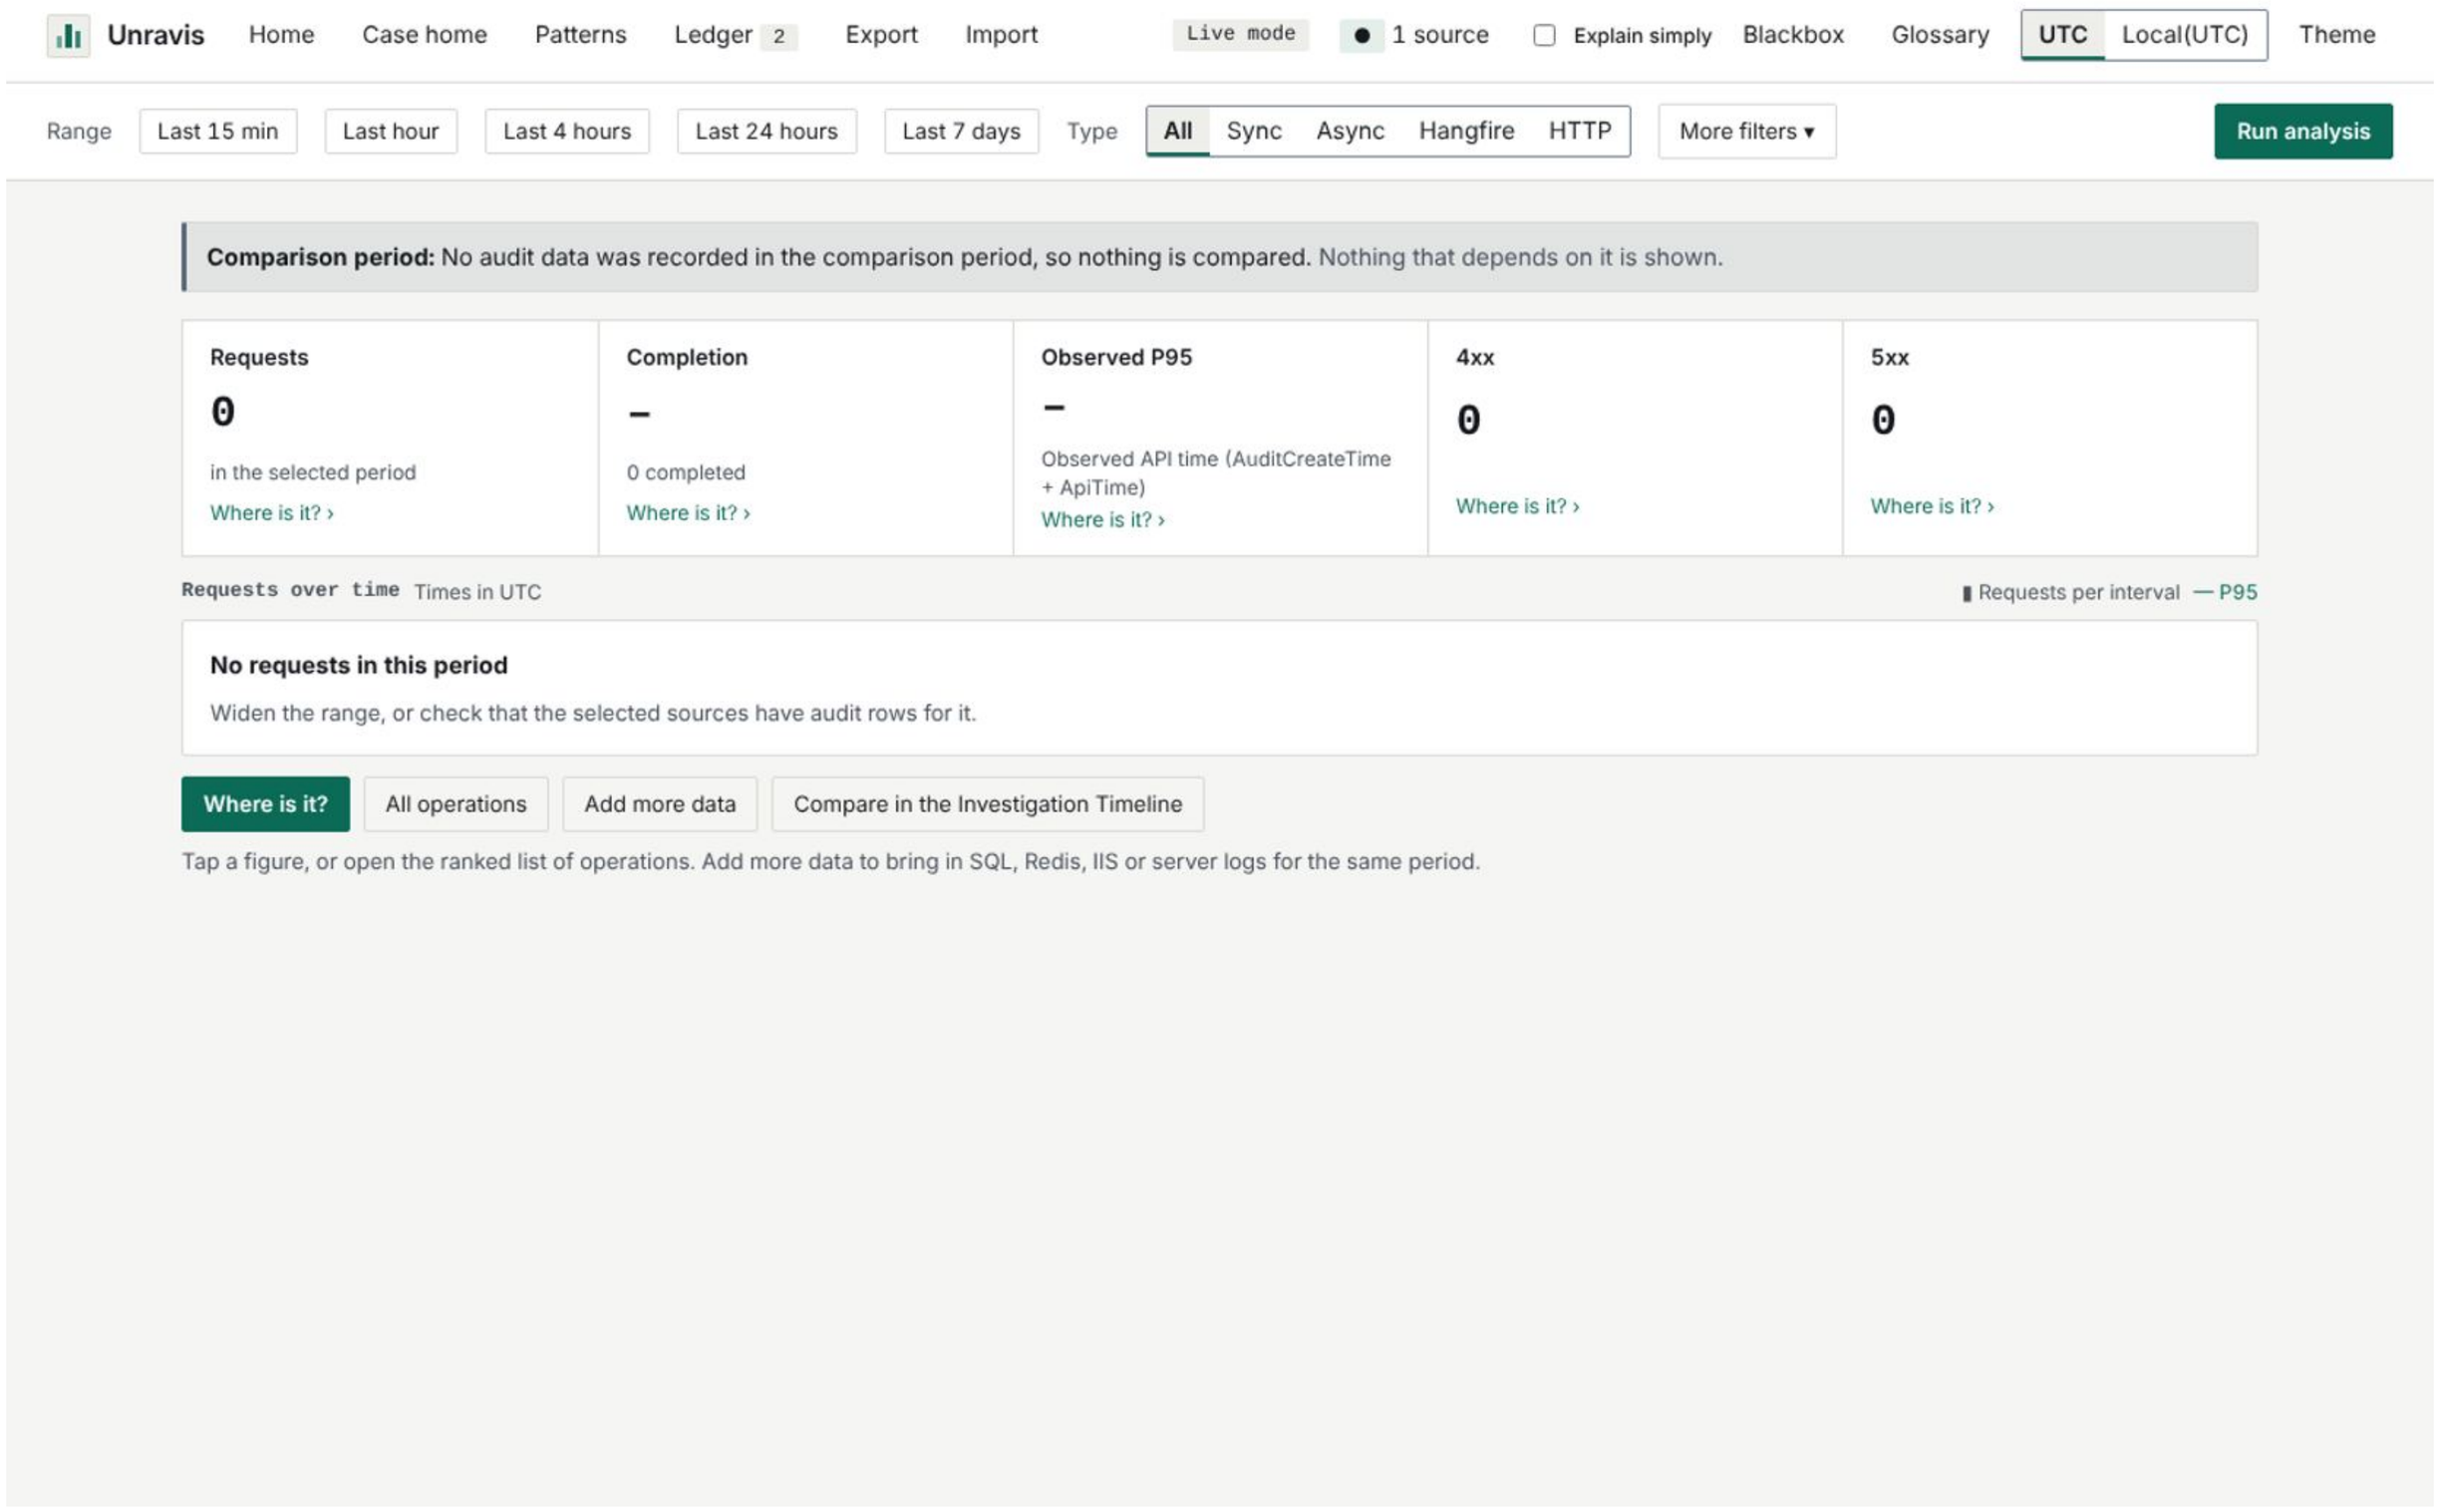

Image 166-analysis-source-failed-banner.png

What it shows: A banner names the failing source; the figures use the others.
How to reach it: Scenario a-srcfail.

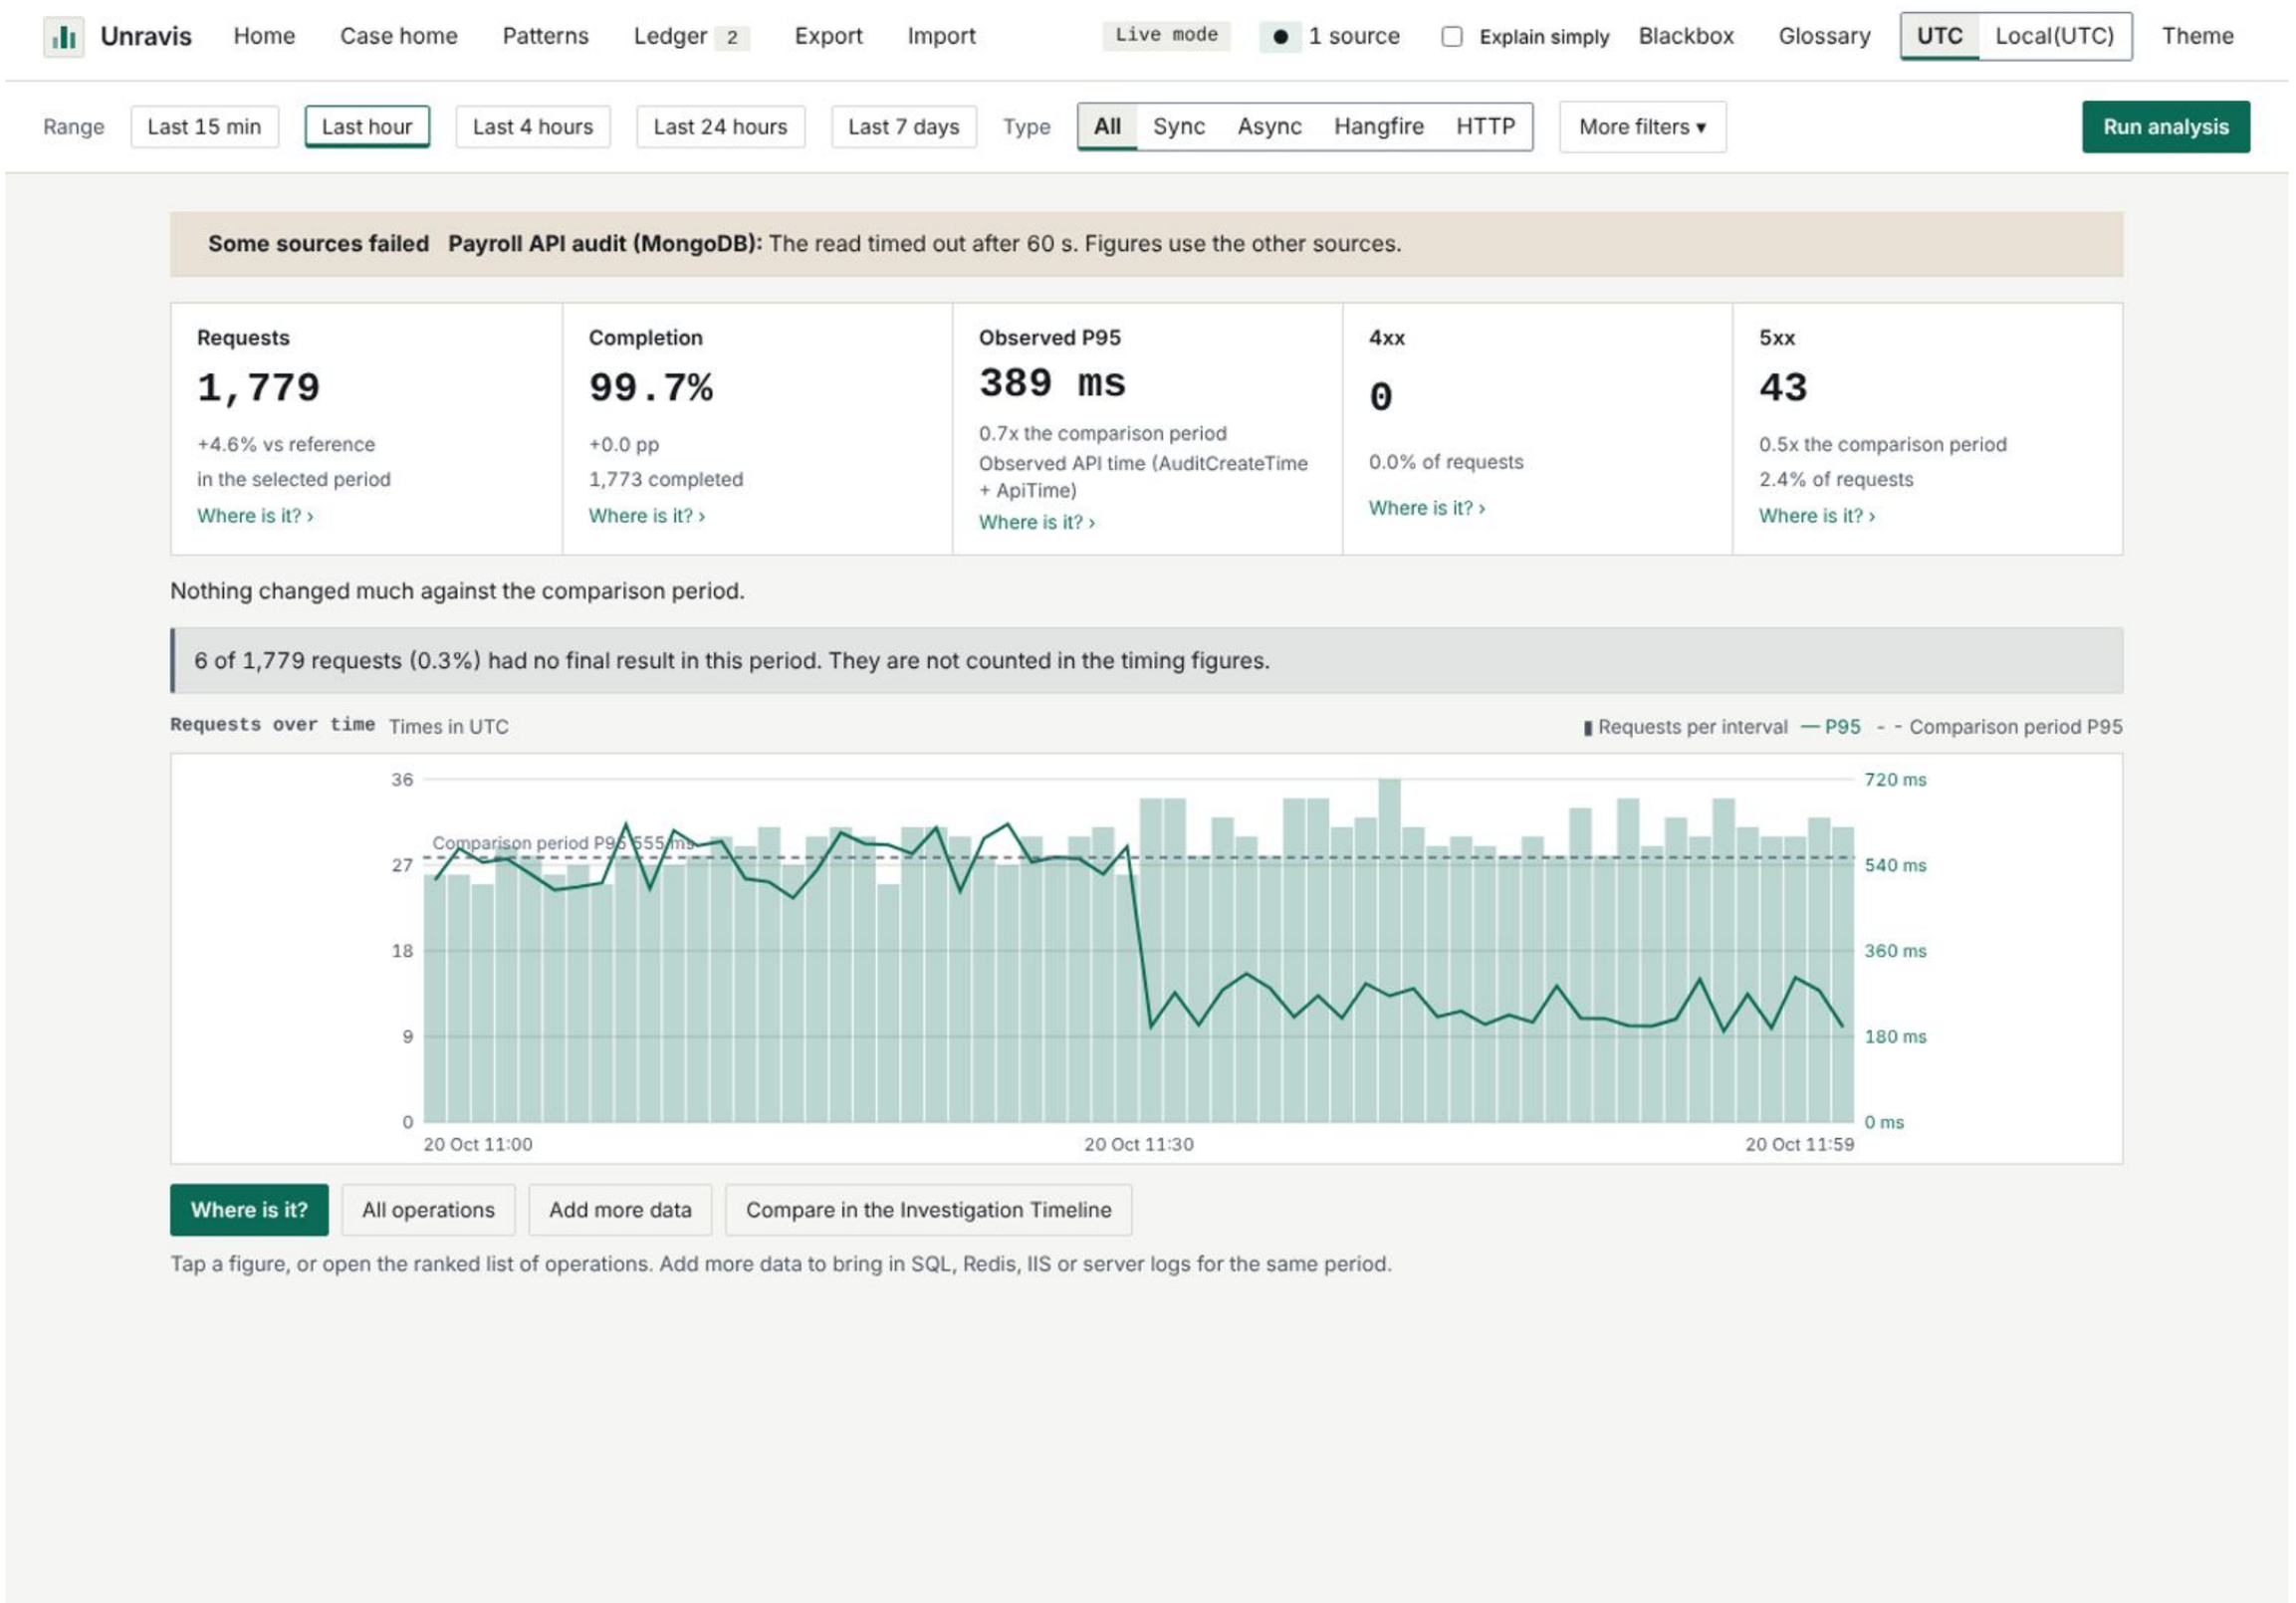

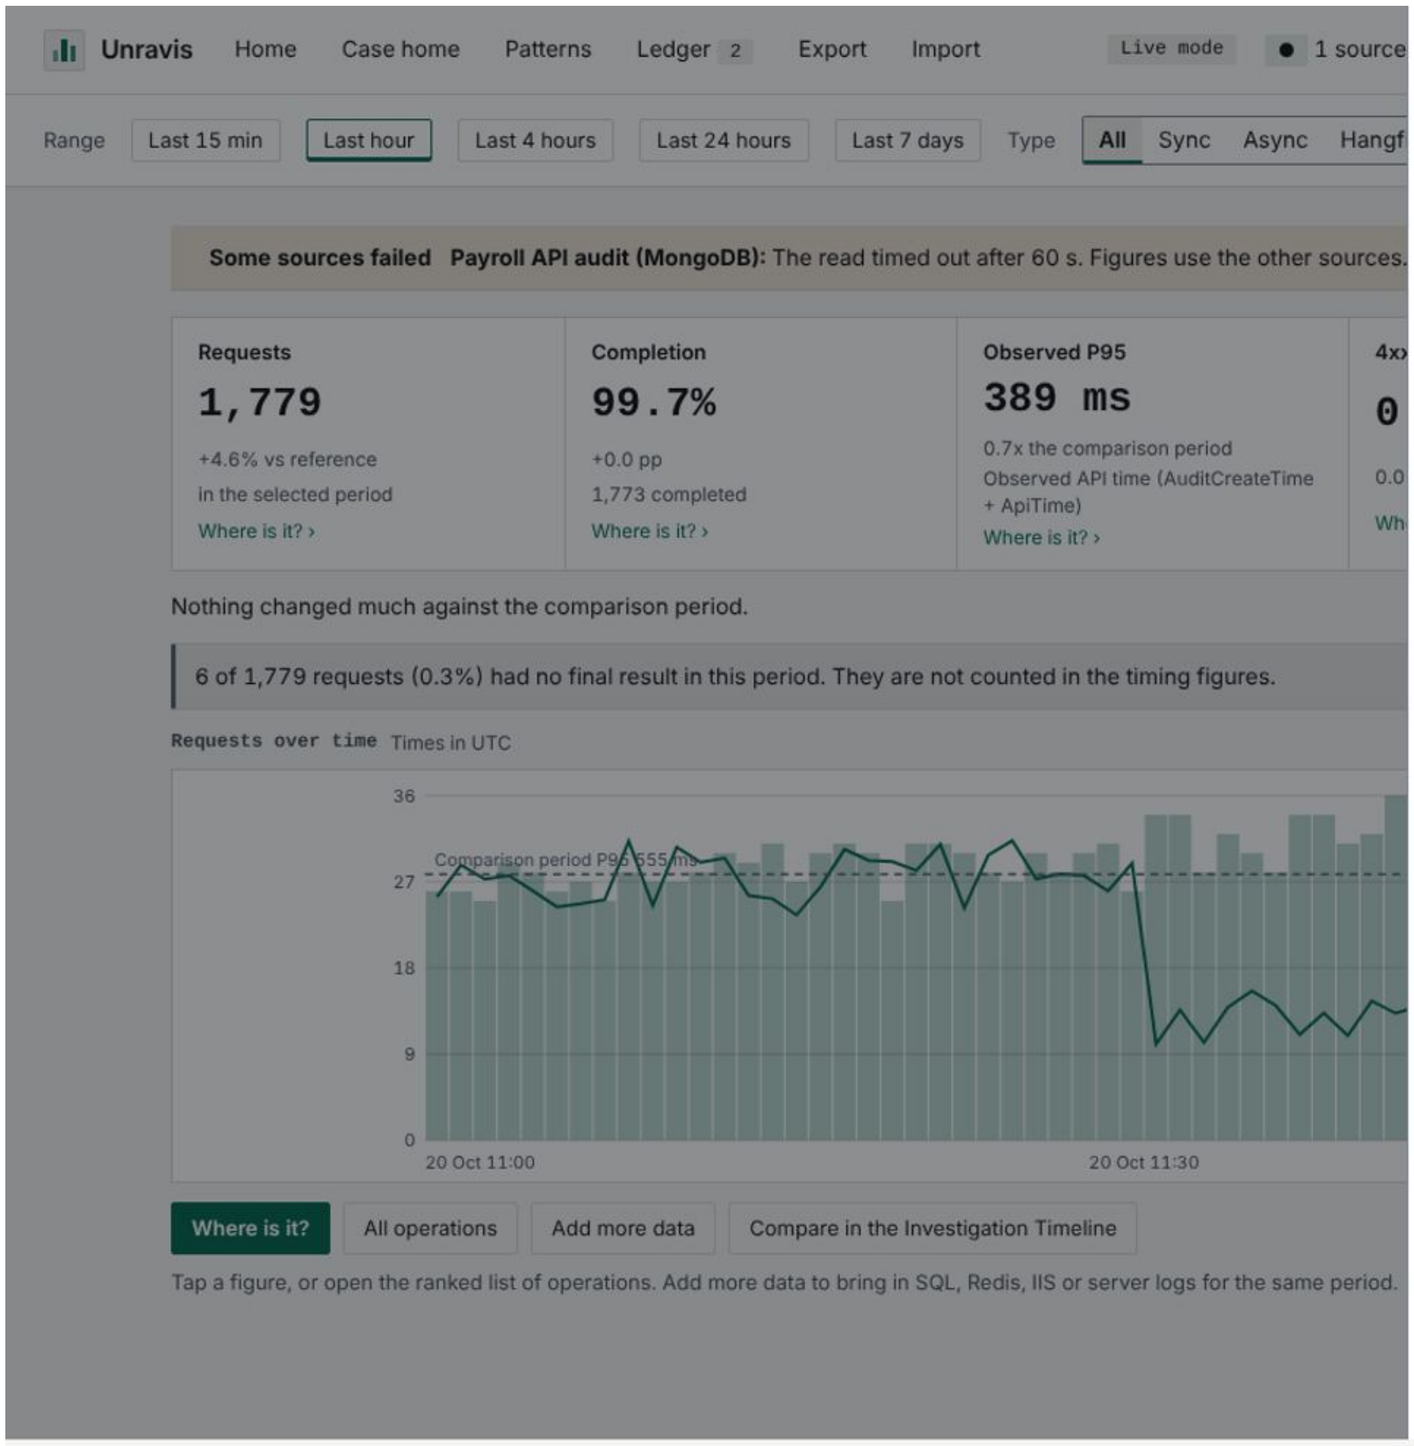

Image 167-analysis-sources-popover.png

What it shows: The sources button opens the list of sources used.
How to reach it: Press the sources button (the dot and the number of sources) in the sub-bar.

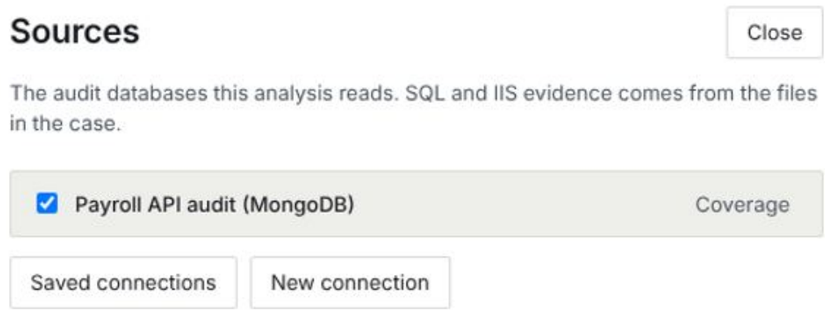

Image 168-analysis-without-a-case.png

What it shows: Analysis of the demo audit source with no case behind it: no Case home button and no timeline.
How to reach it: Start screen > Go to the analysis (scenario a-nocase).

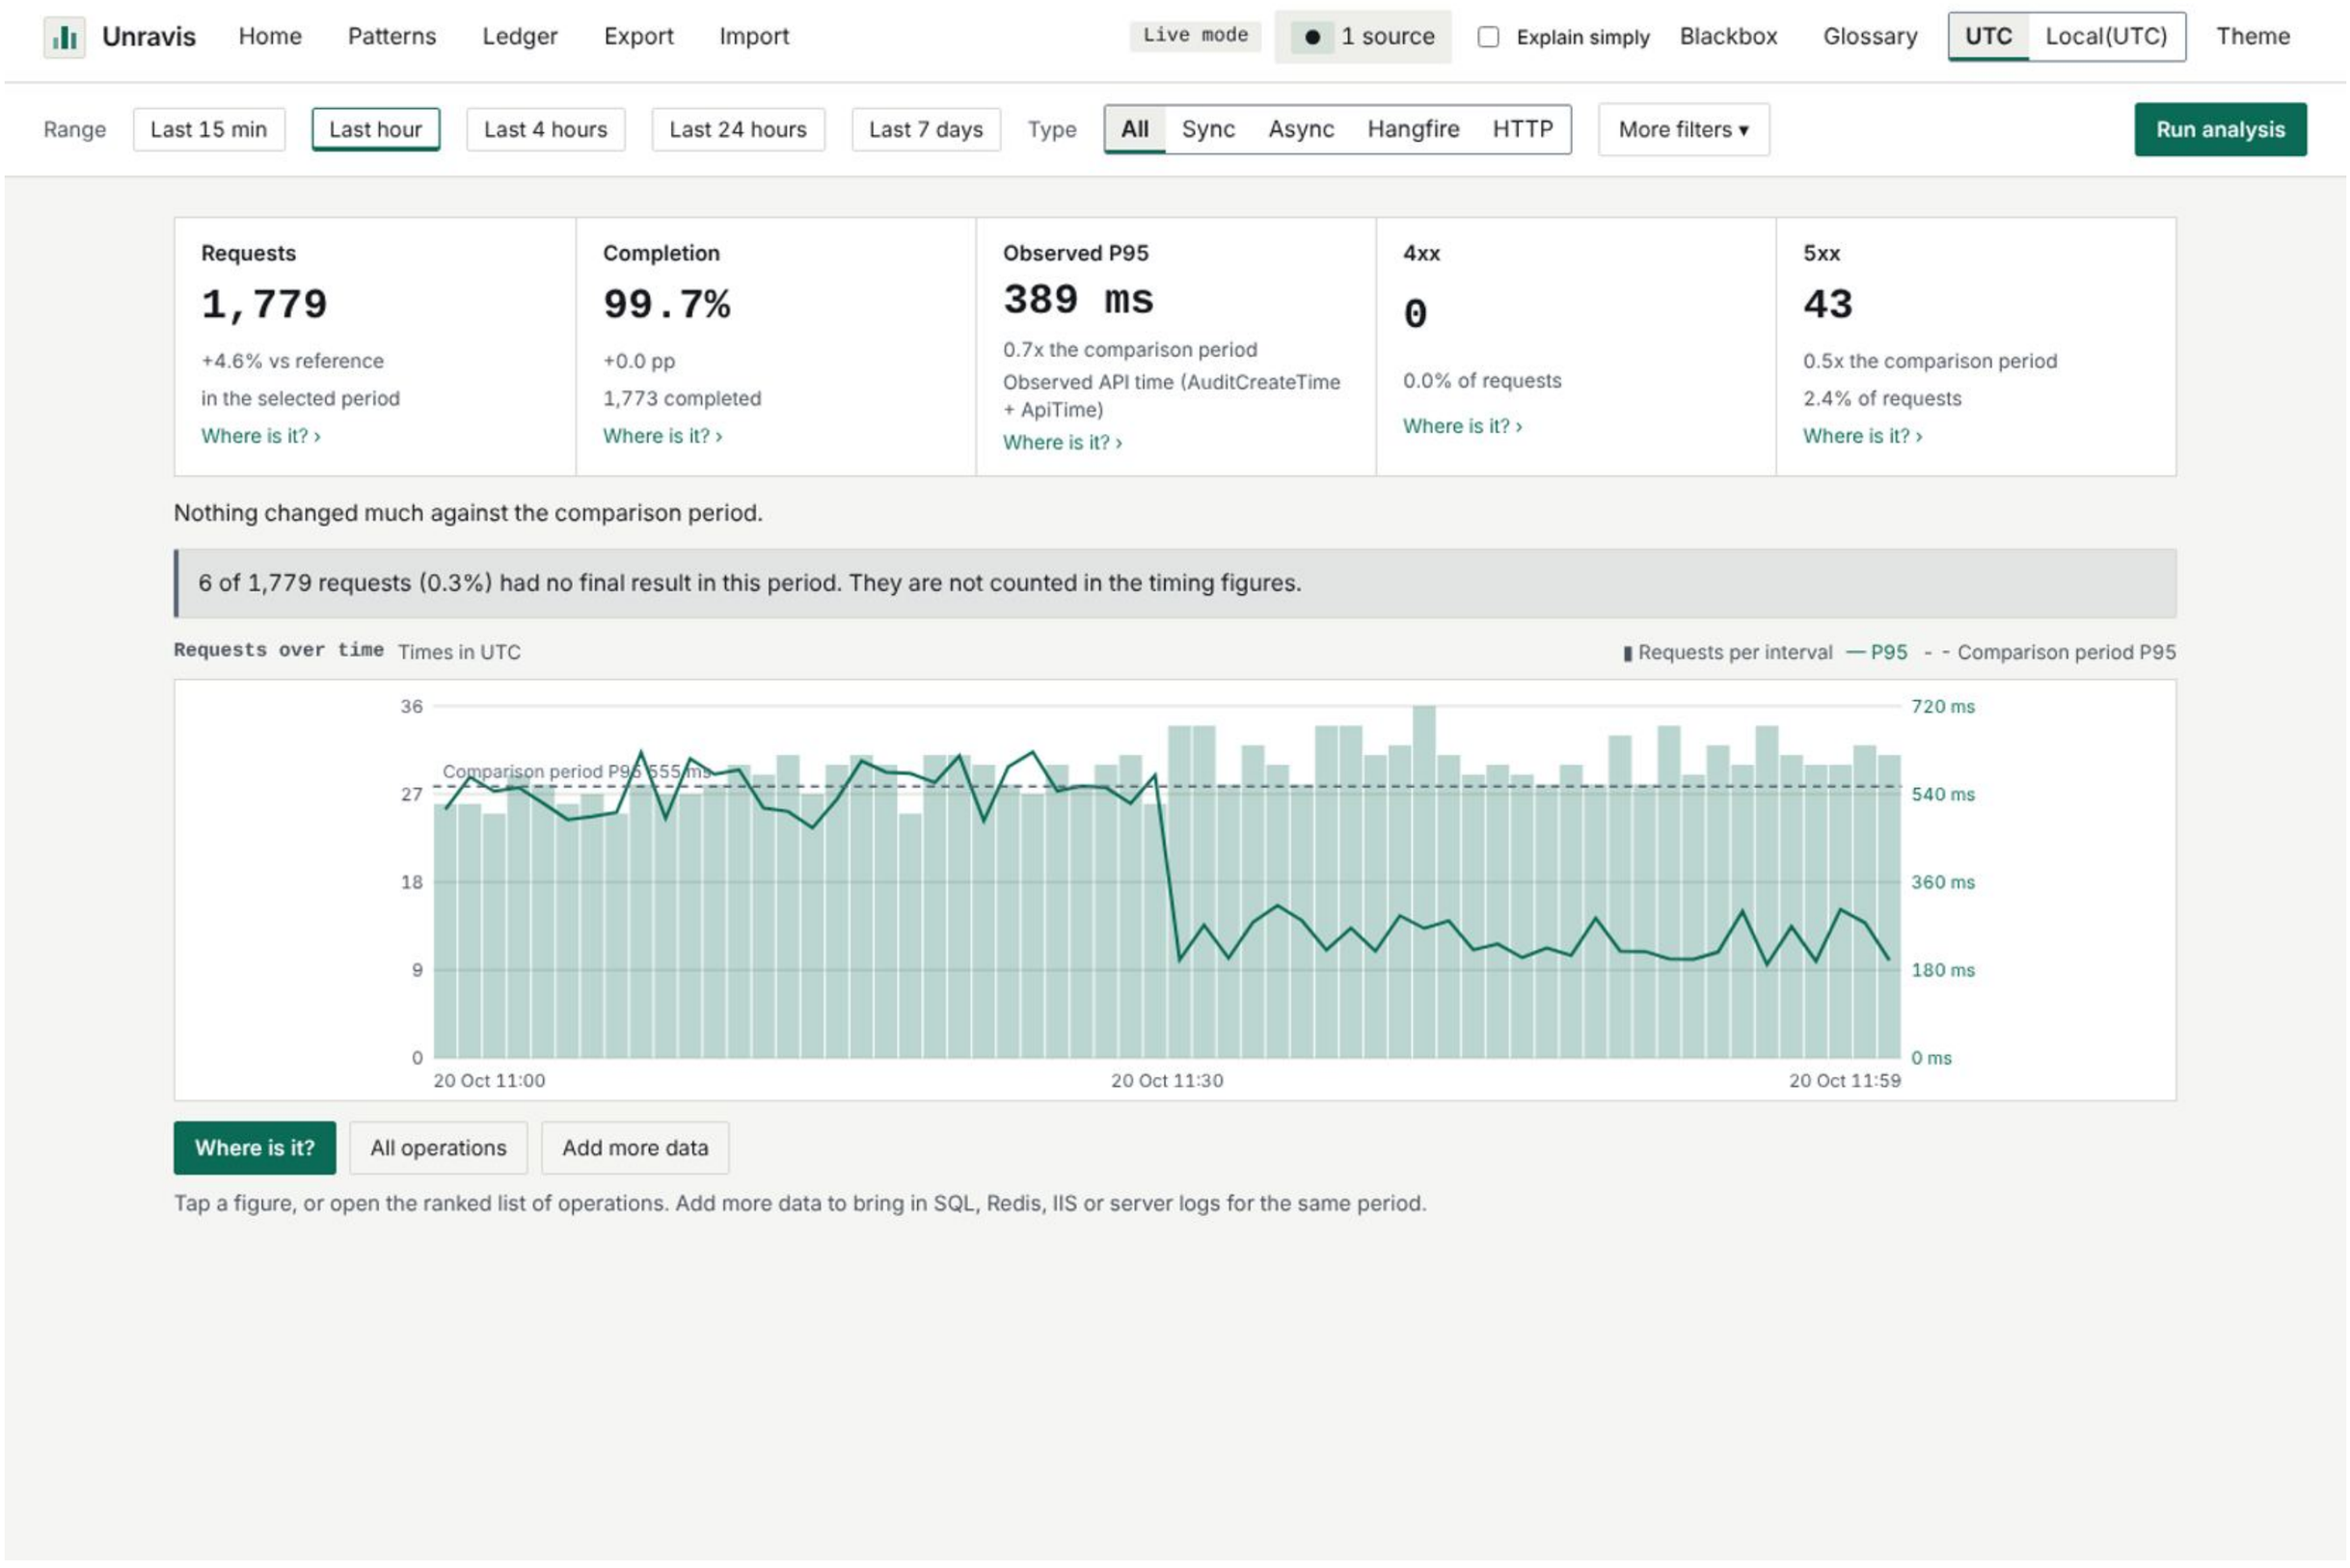

Image 169-where-is-it-view.png

What it shows: Where is it?: operations ranked by lens, with comparison to the earlier period.
How to reach it: Analysis > Where is it?

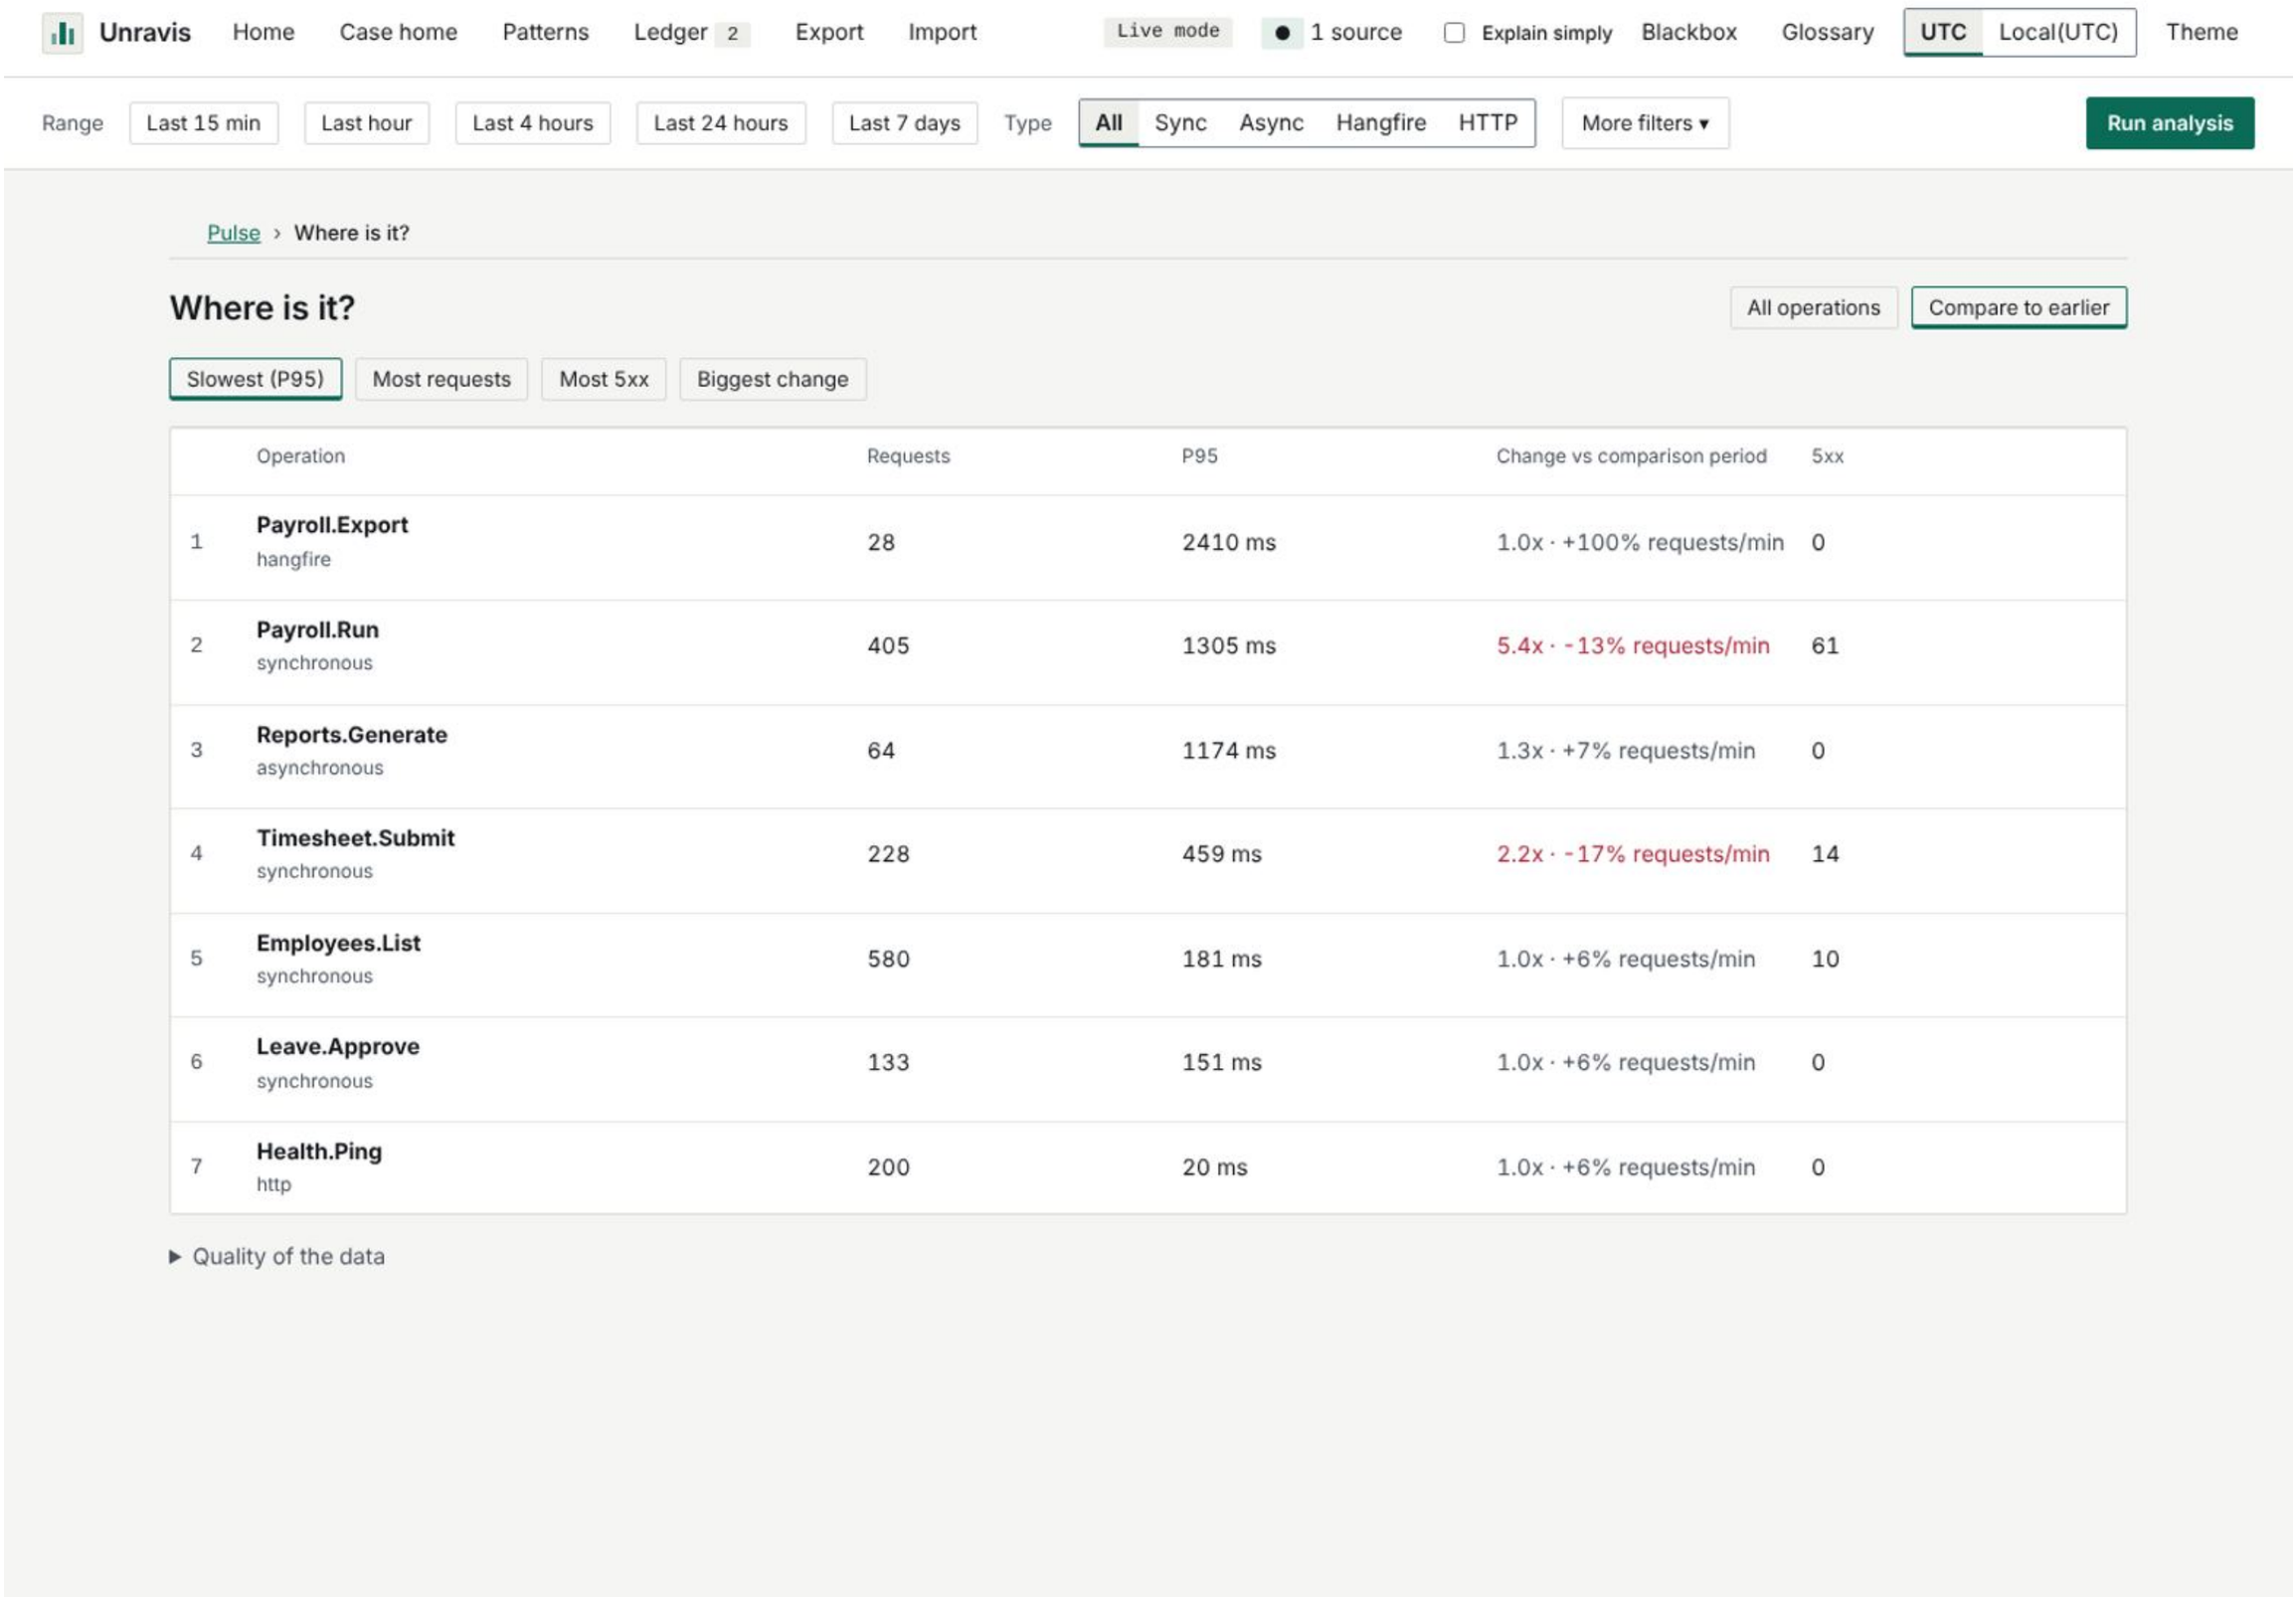

Image 170-where-is-it-biggest-change.png

What it shows: Ranking by Biggest change.
How to reach it: Press Biggest change.

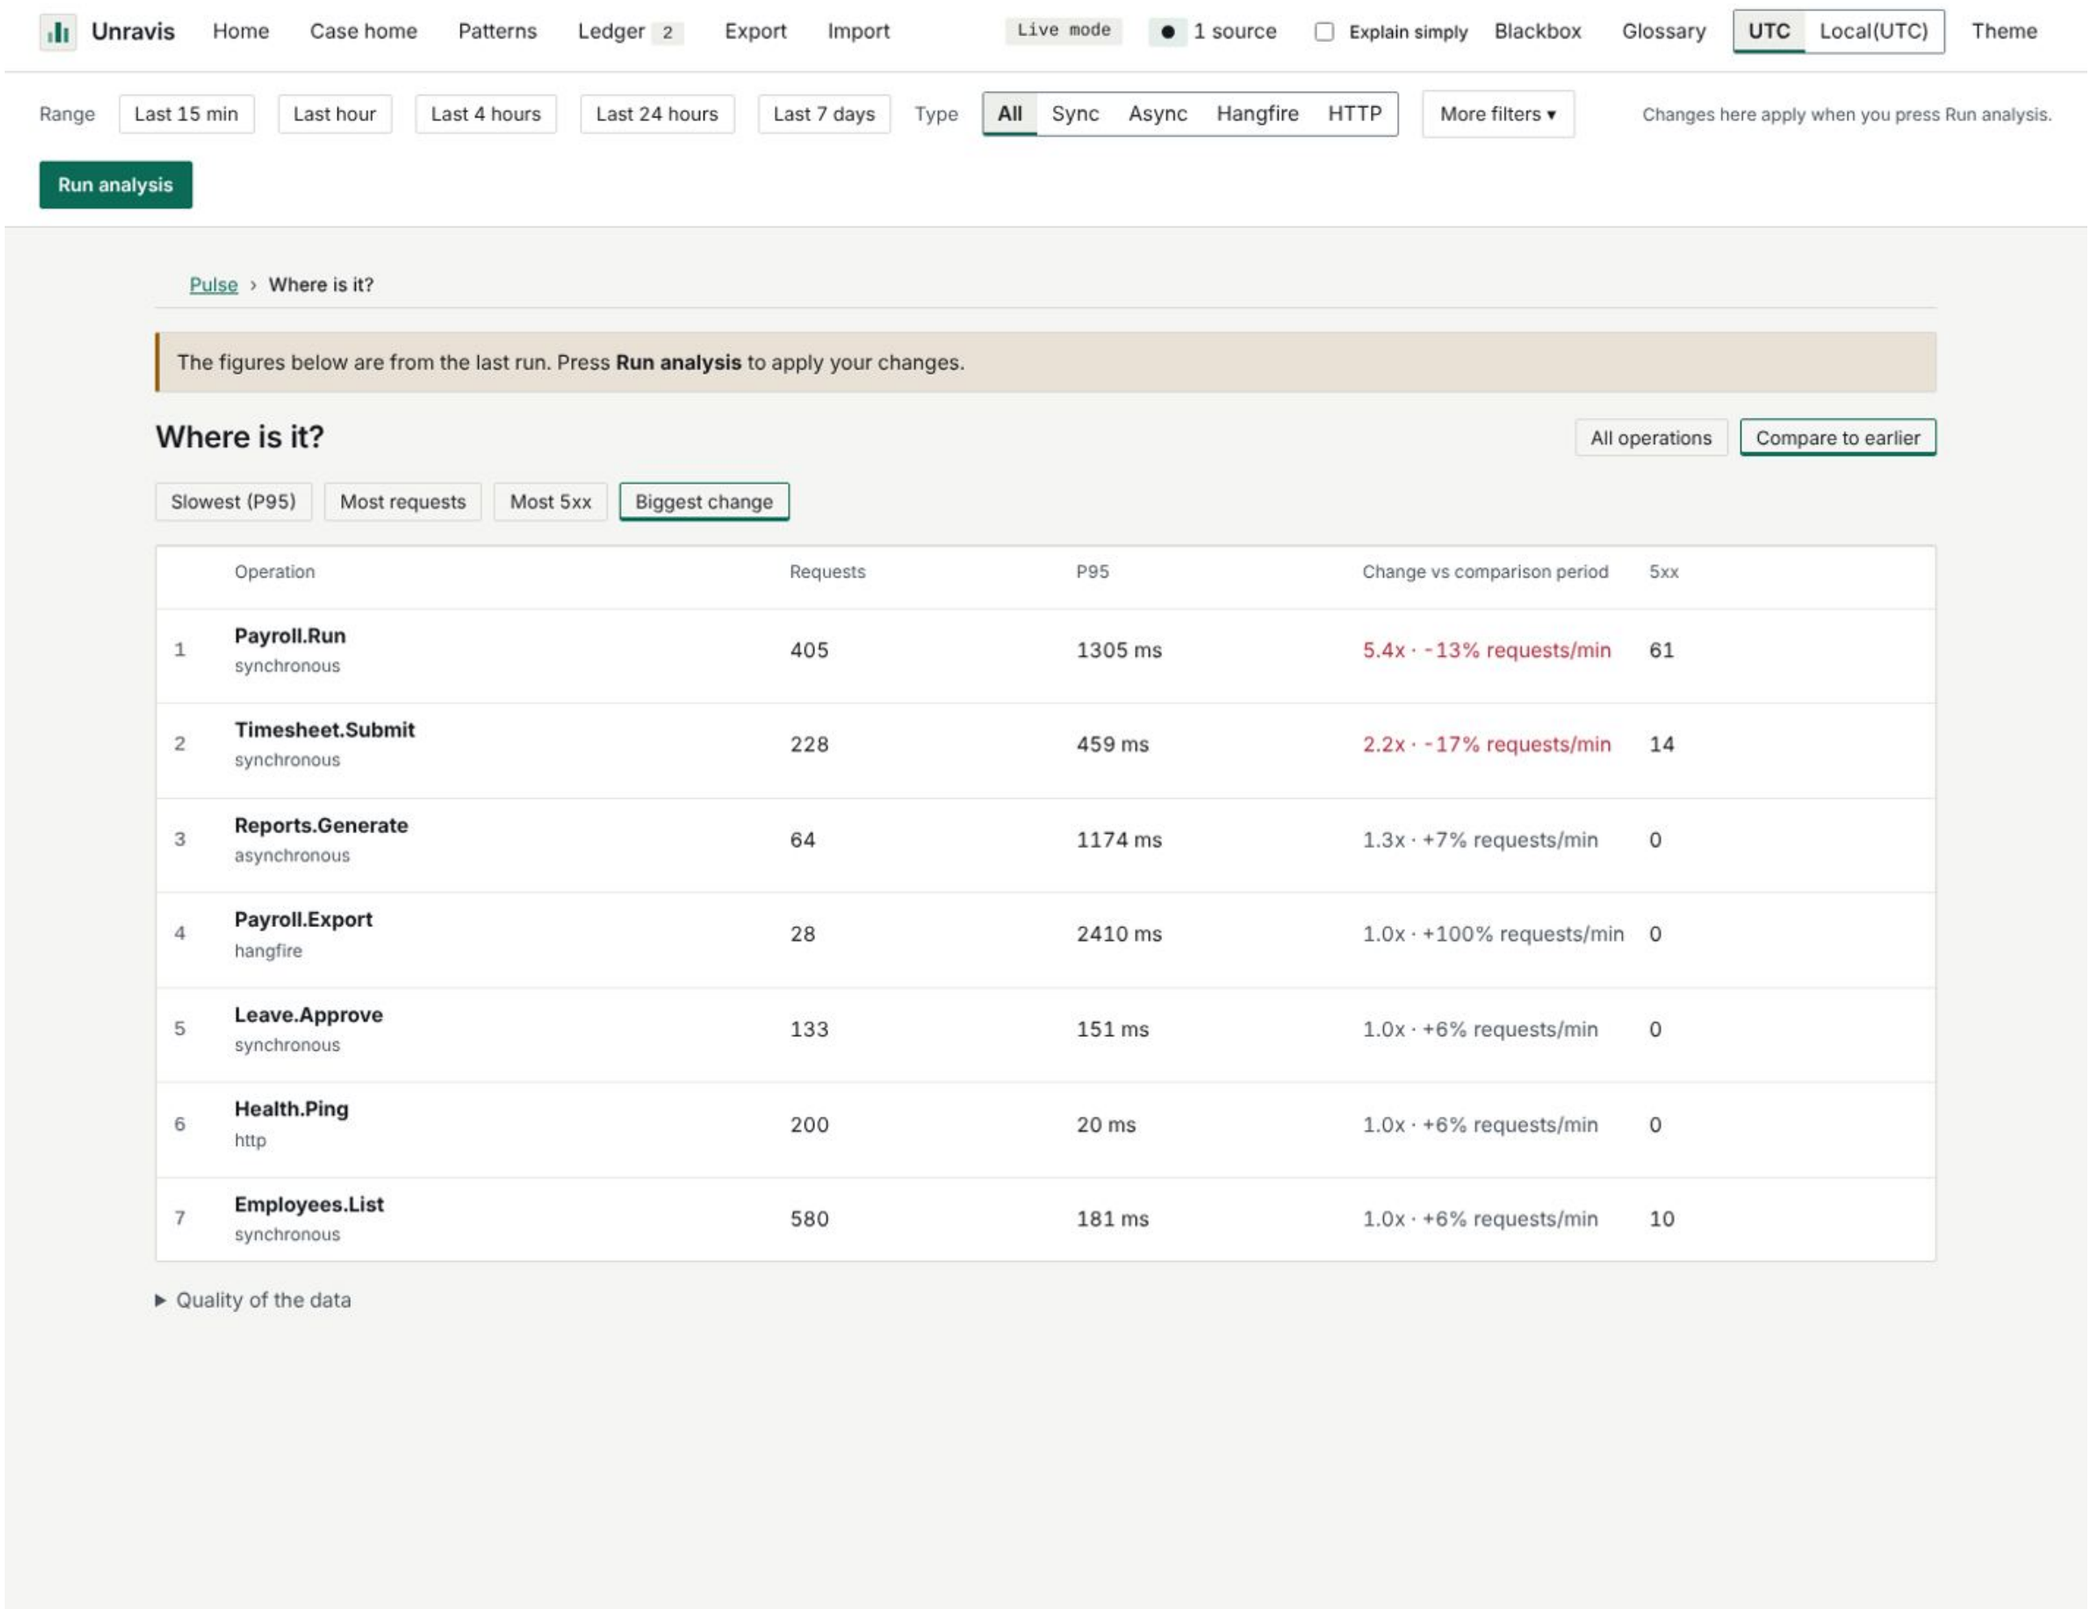

Image 171-evidence-rows-for-operation.png

What it shows: Evidence: slowest requests for one operation, with Export CSV, Inspect and Nearby.
How to reach it: Press the Payroll.Run row.

Image 172-record-detail.png

What it shows: Record detail: stored fields and fields derived by Unravis.
How to reach it: Press Inspect record on a row.

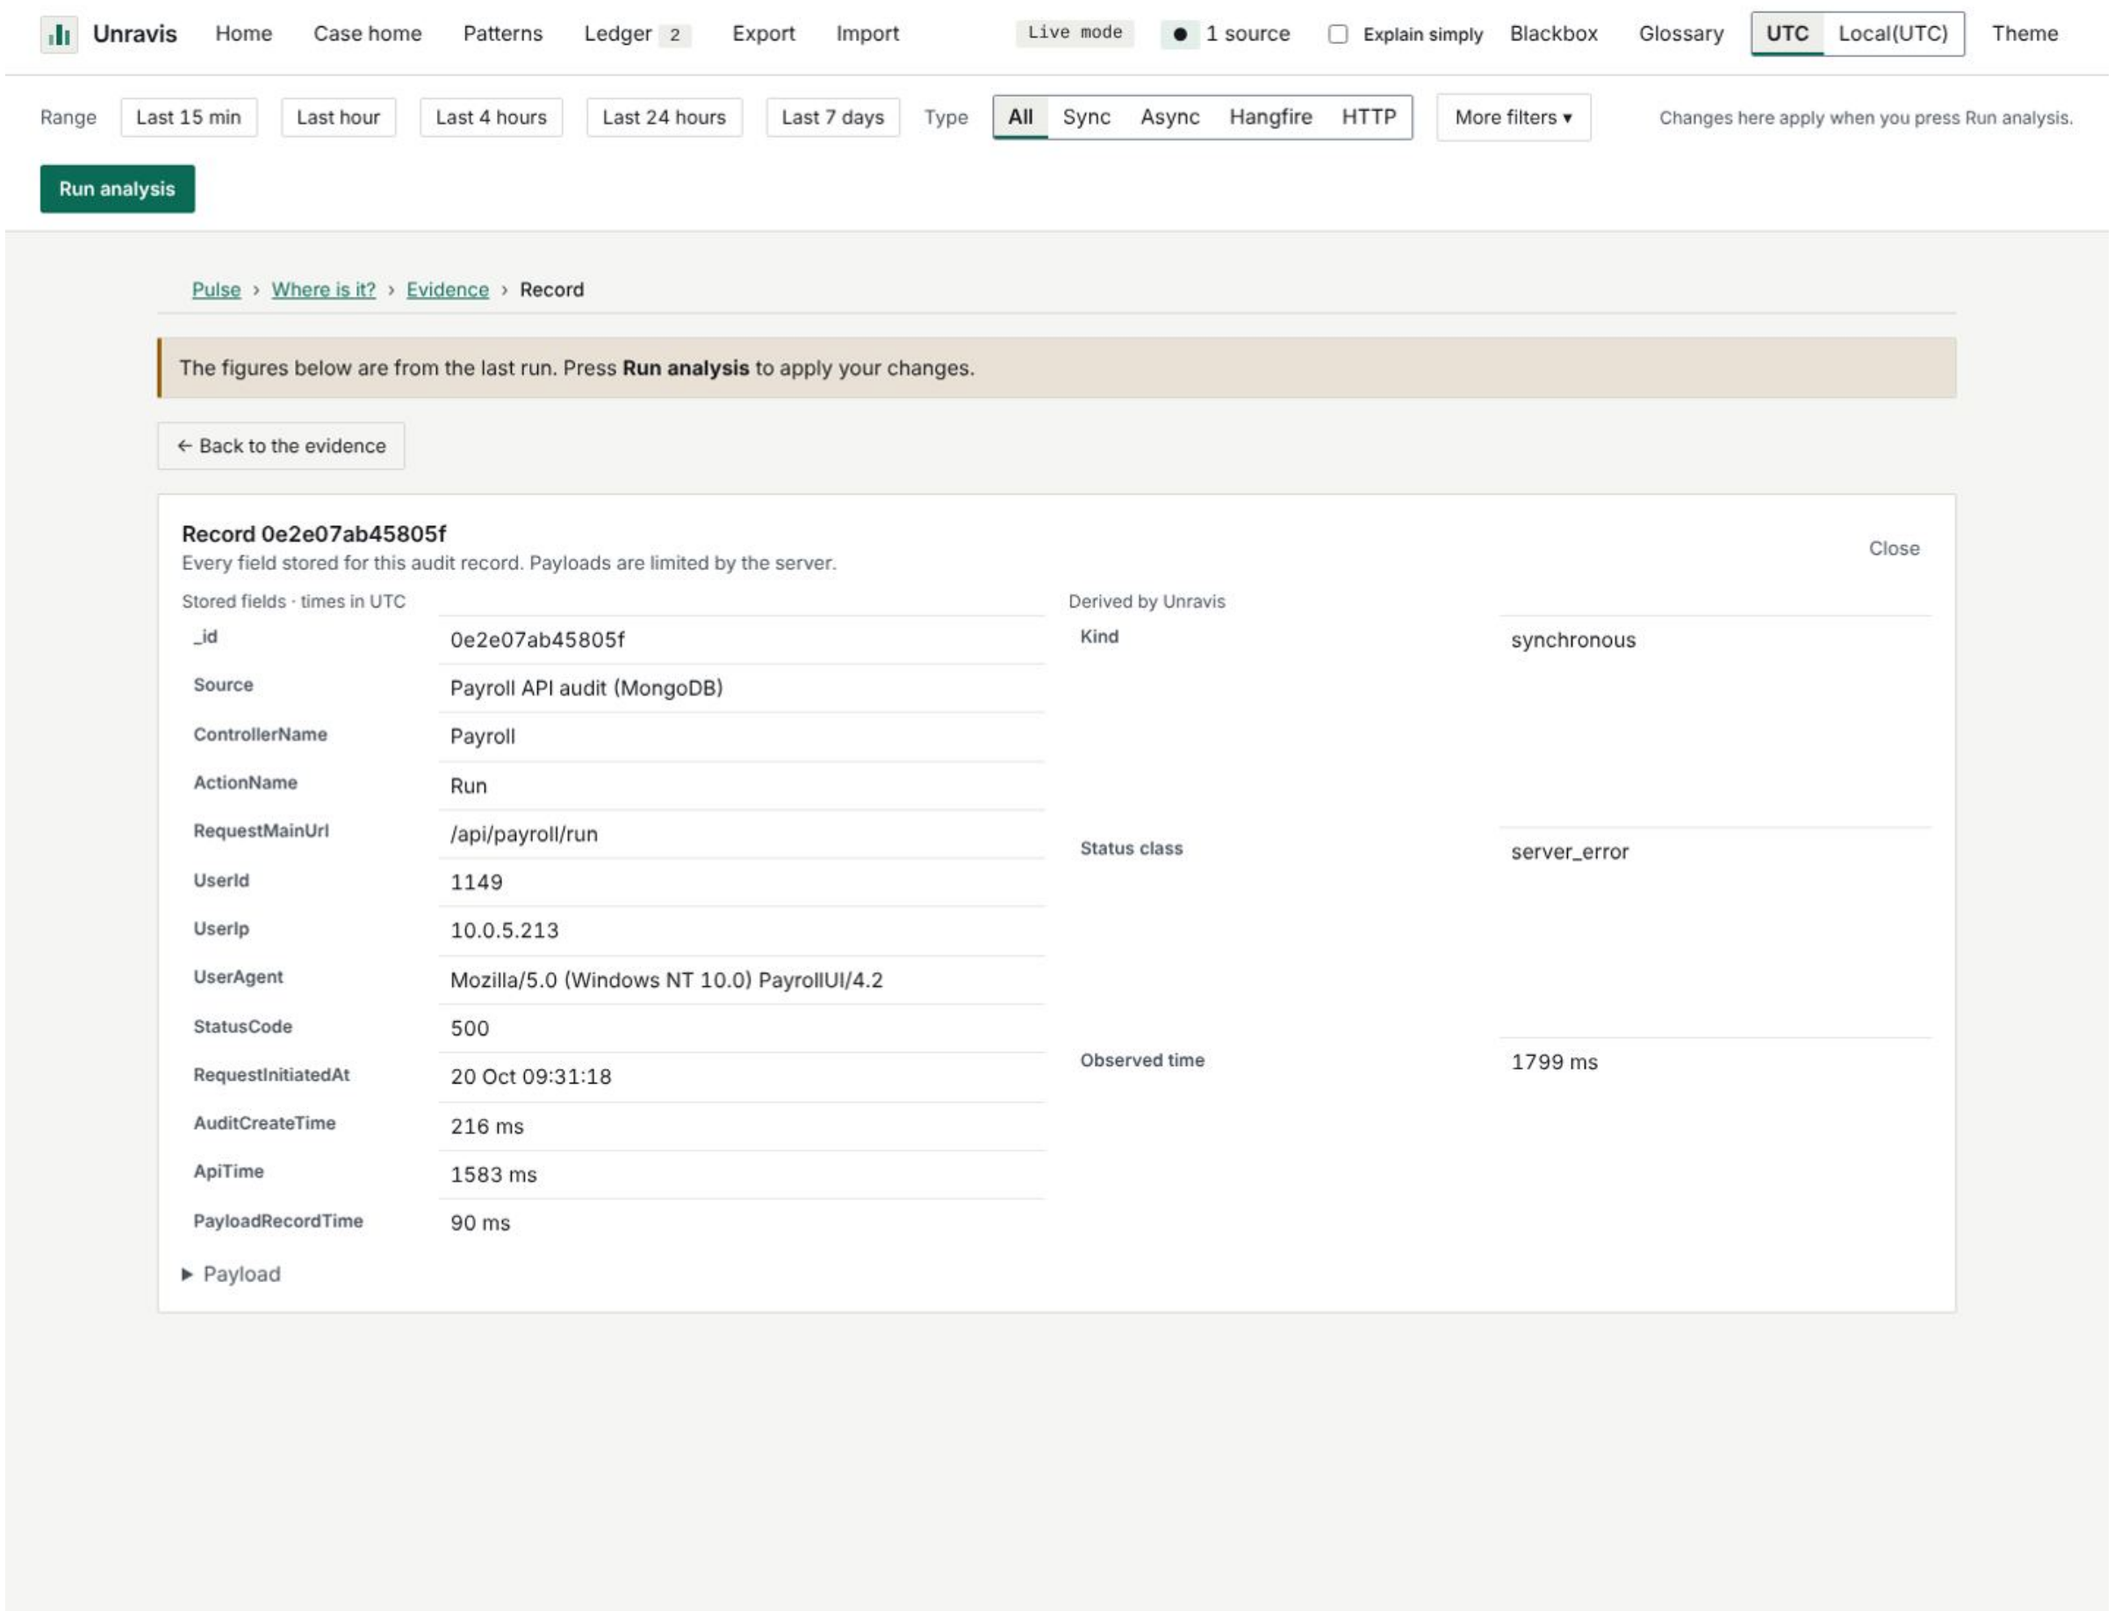

Image 173-nearby-activity.png

What it shows: Nearby activity: one call beside what SQL, Mongo and IIS did. Call trace is not wired (the screen says so).
How to reach it: Back to the evidence, press Nearby.

Image 174-analysis-breadcrumb-back.png

What it shows: The breadcrumb and Back return up one level.
How to reach it: Press Pulse in the breadcrumb.

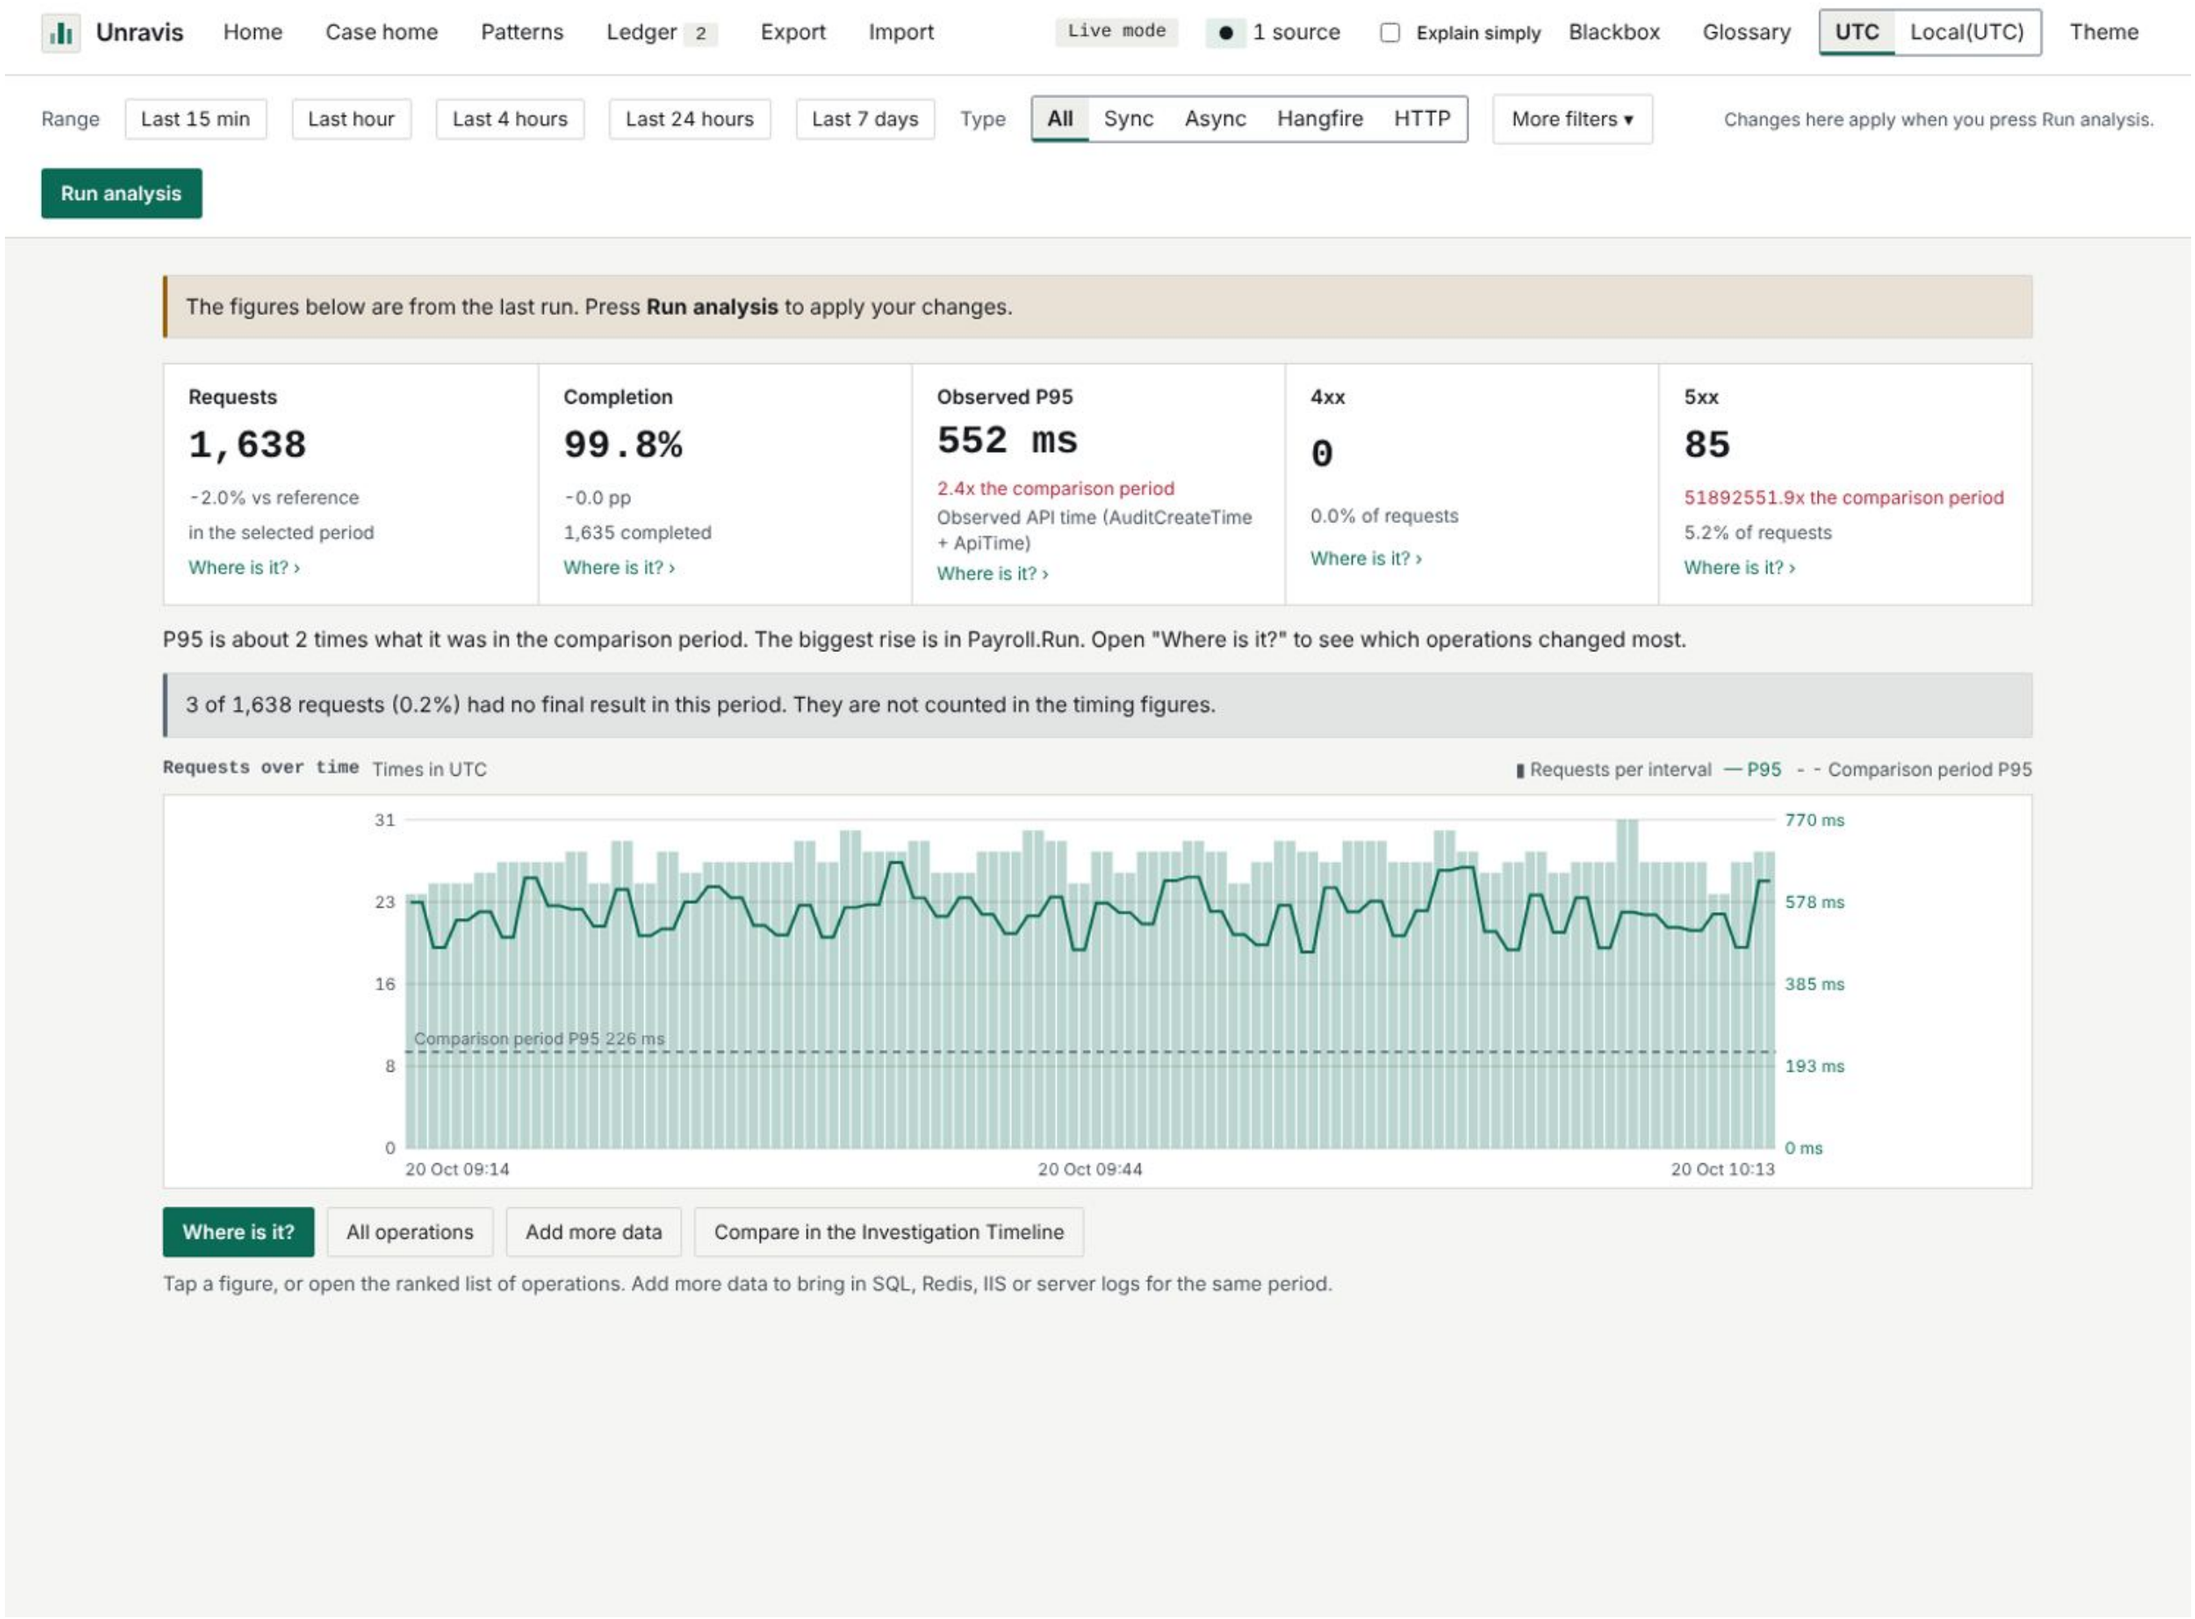

Image 175-drawer-patterns.png

What it shows: Patterns drawer (three canned entries in the prototype).
How to reach it: Press Patterns in the top bar.

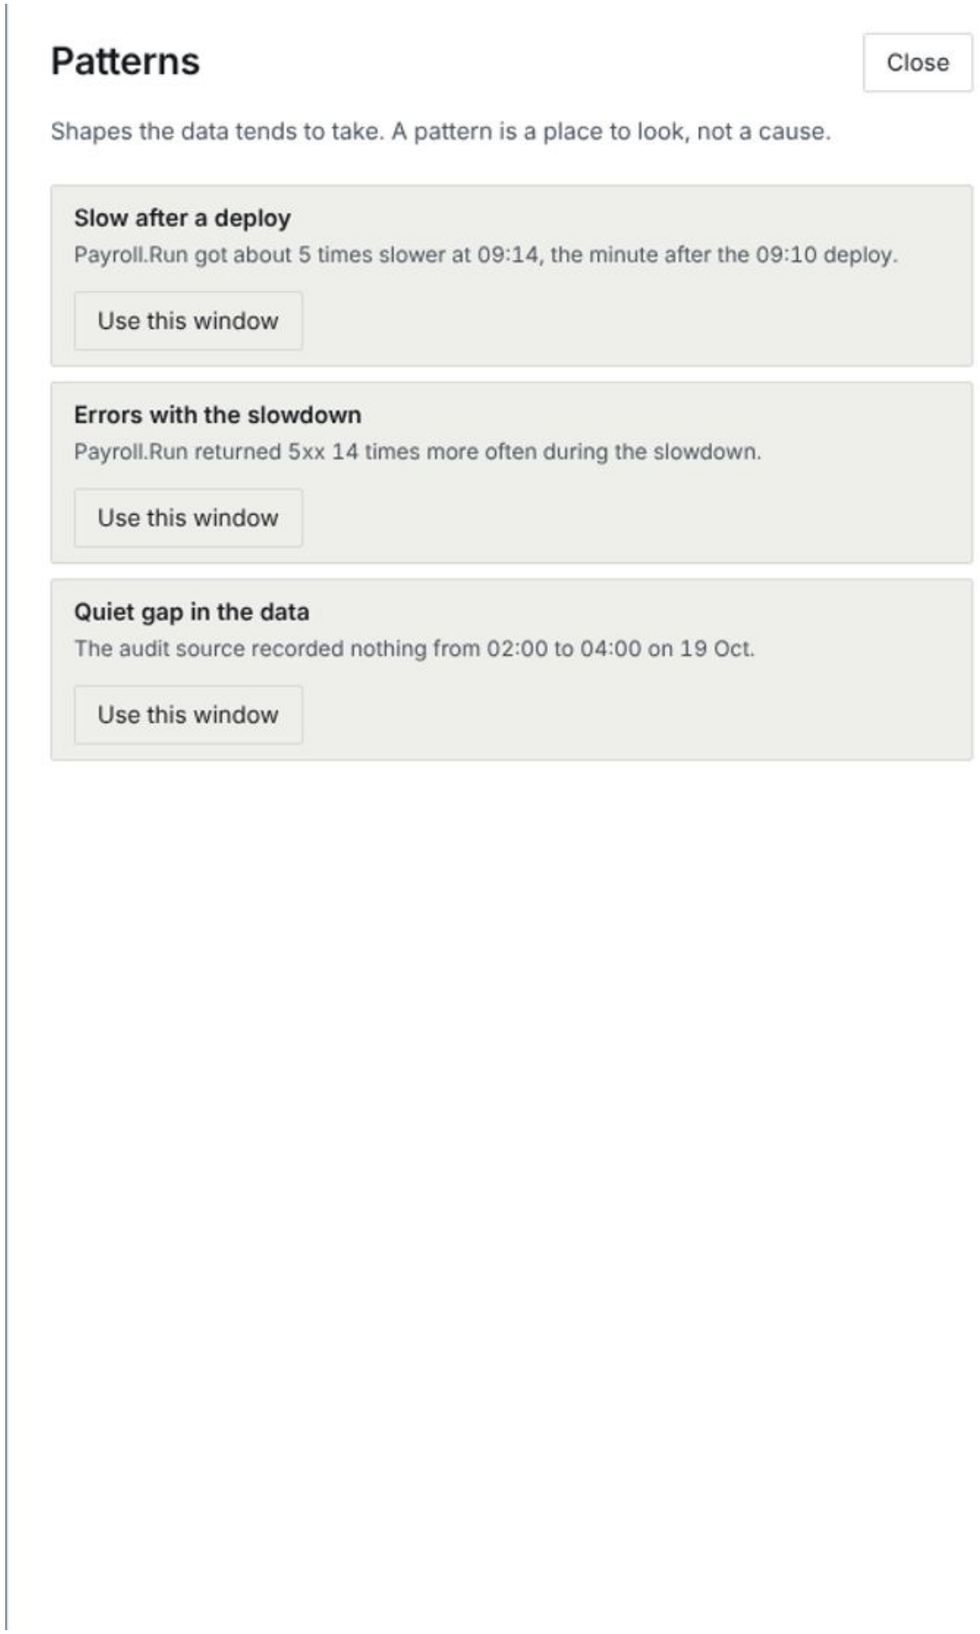

Image 176-drawer-ledger.png

What it shows: Ledger drawer from the top bar (theories).
How to reach it: Press Ledger in the top bar.

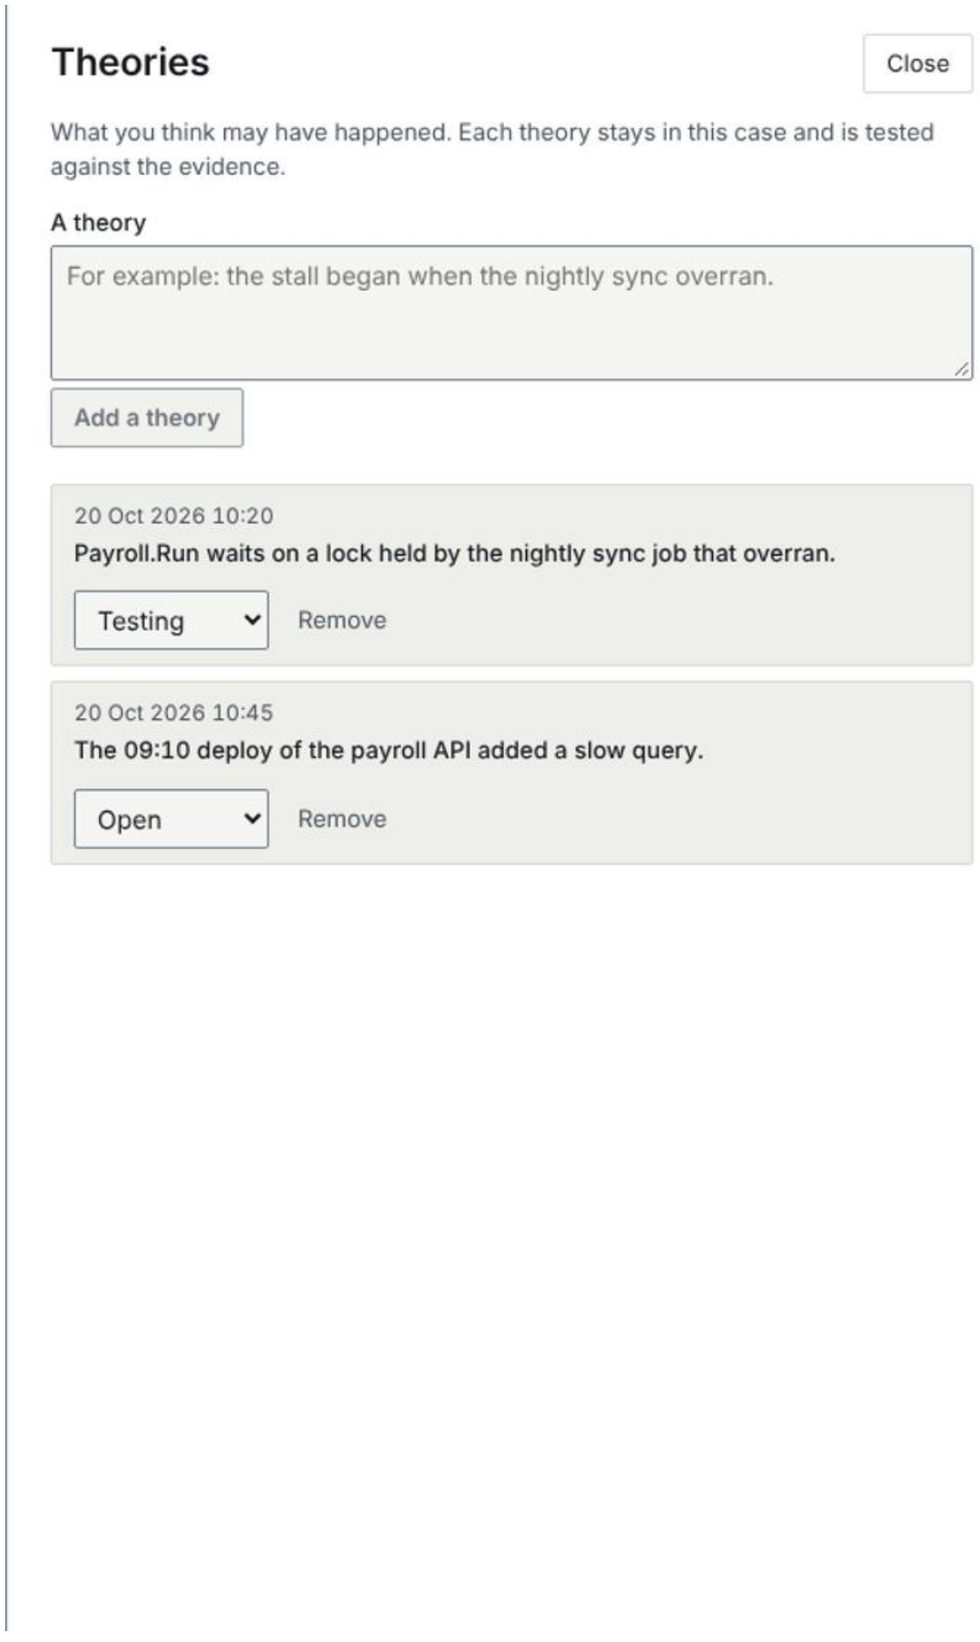

Image 177-drawer-glossary.png

What it shows: Glossary from the header.
How to reach it: Press Glossary.

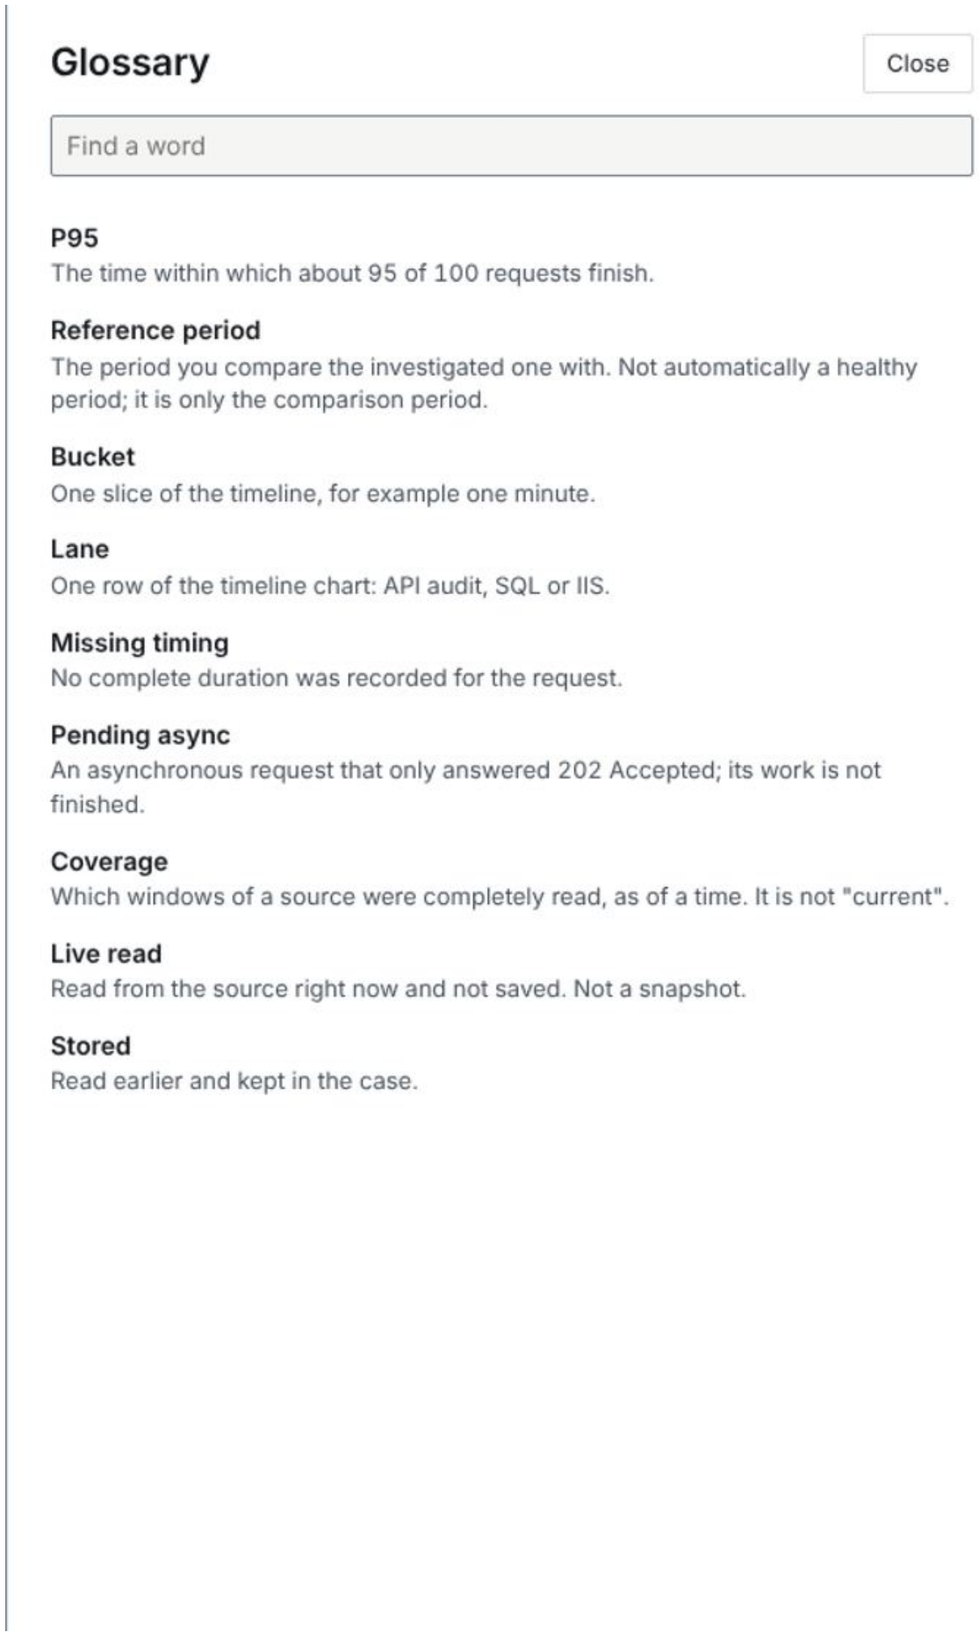

Image 178-drawer-blackbox.png

What it shows: Blackbox from the header (stub in the prototype).
How to reach it: Press Blackbox.

Image 179-export-drawer-ready.png

What it shows: Export drawer: window, options, scrub on by default, Preview.
How to reach it: Analysis > Export.

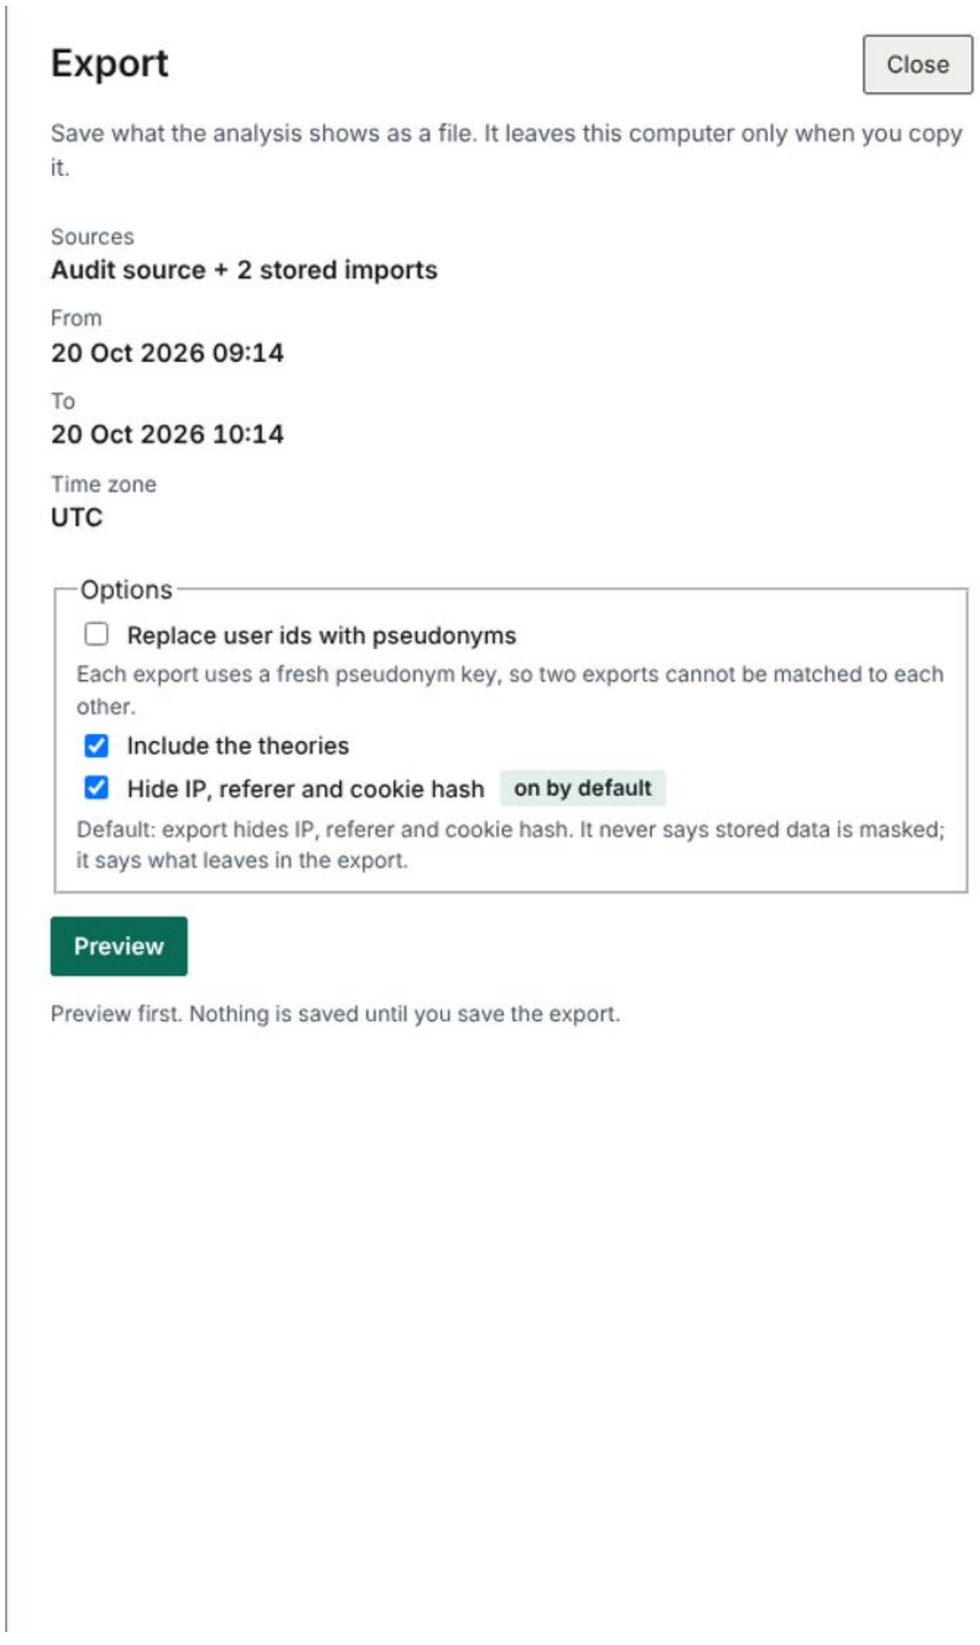

Image 180-export-preview-scrub-on.png

What it shows: After Preview: what will be left out (client IP, referer, cookie hash) and the Save the export button.
How to reach it: Press Preview.

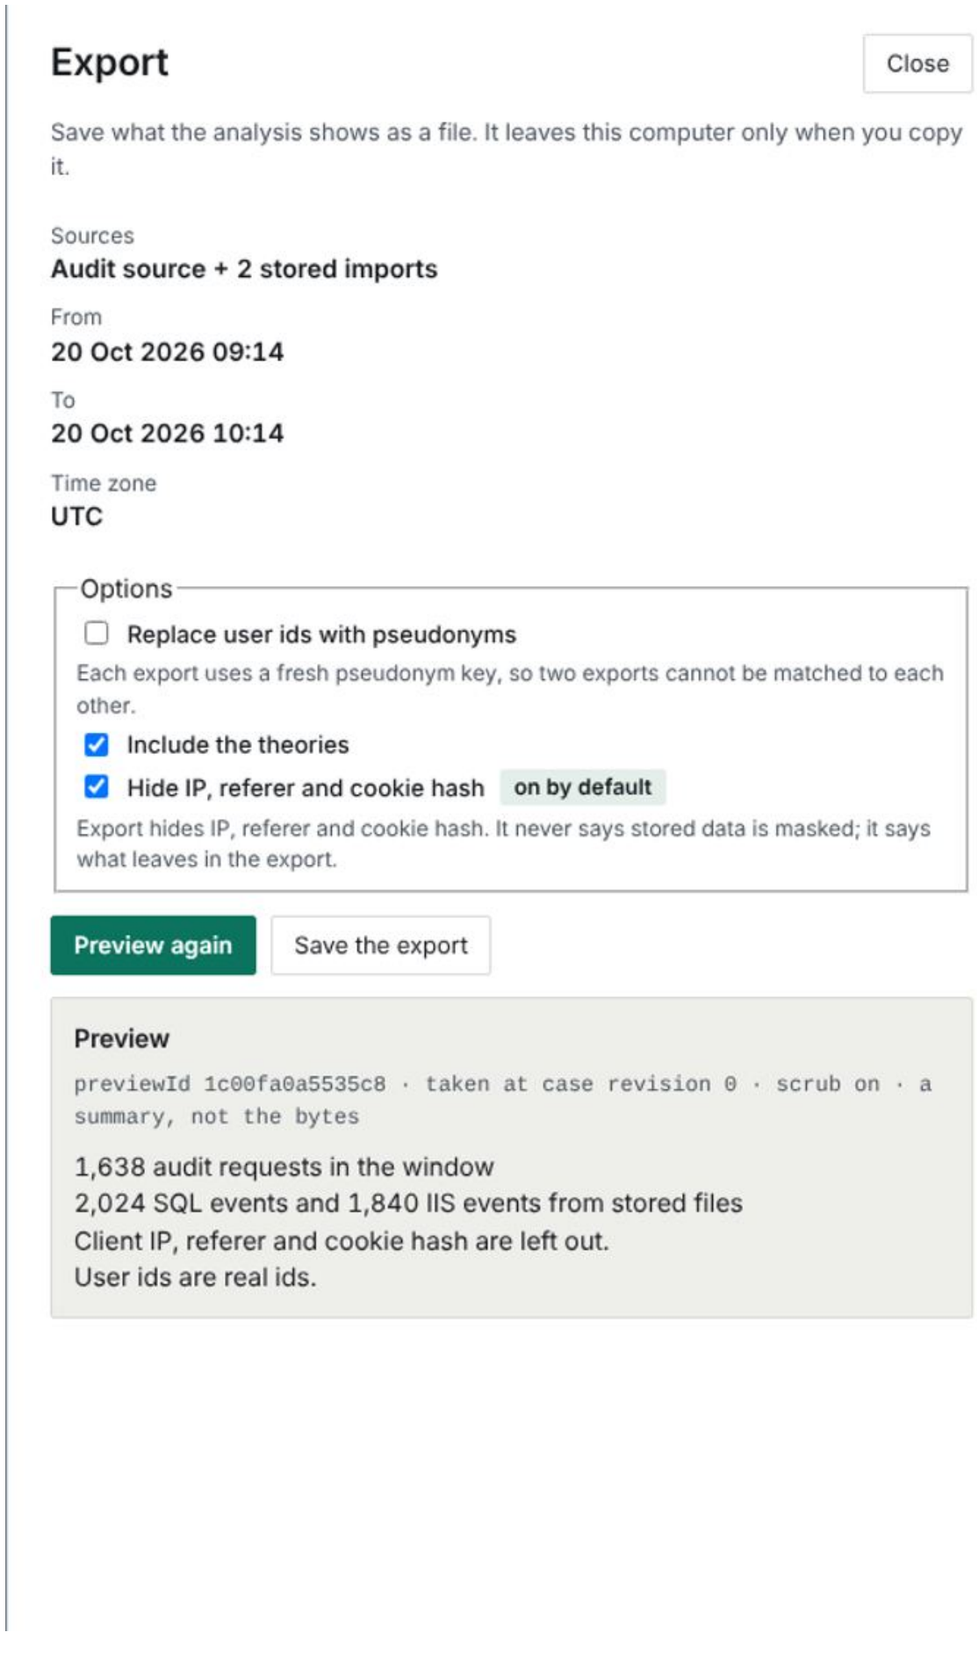

Image 181-export-saved.png

What it shows: After Save the export: Saved.
How to reach it: Press Save the export.

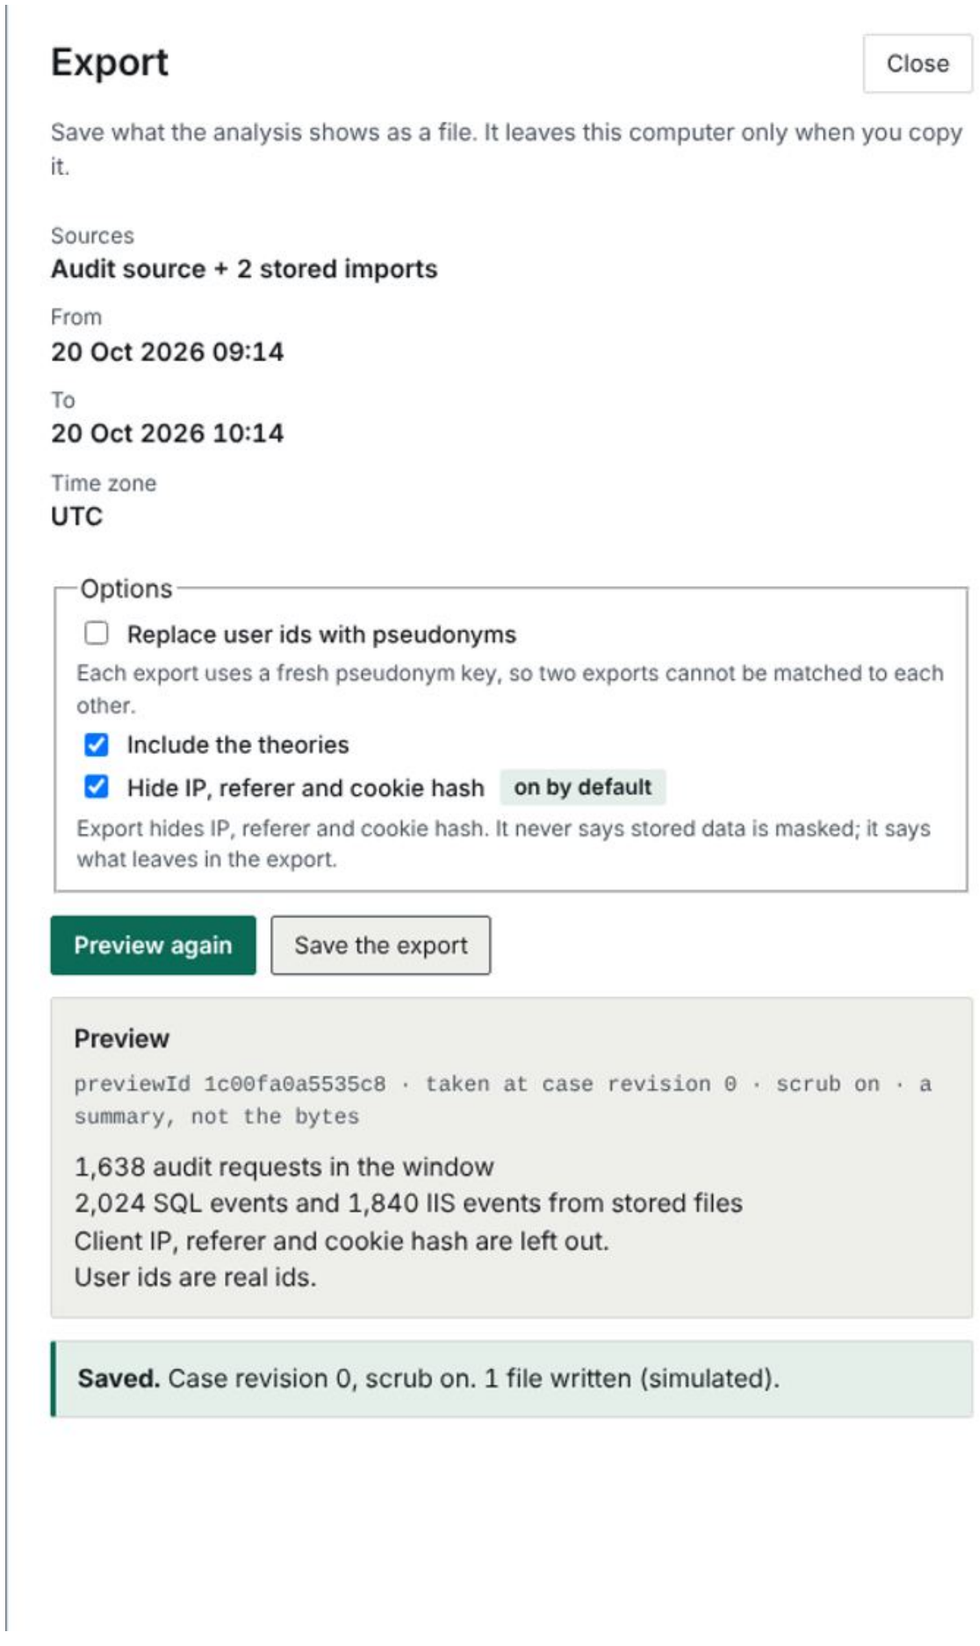

Image 182-export-changed-409.png

What it shows: The case changed after the preview: Save the export gives 409 and a new preview is needed.
How to reach it: Scenario x-changed, press Save the export.
